Annual Report State-owned Companies 2005

The Swedish state is Sweden's largest company owner.

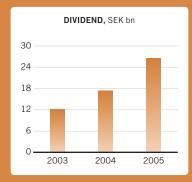

Approximately 190,000 people are employed in these companies.

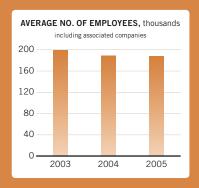

Very large values are involved and some of Sweden's largest companies belong to this sphere. The state therefore has a great responsibility to be an active and professional owner. The overarching goal for the Government is that the companies should create value and, where applicable, comply with the special societal interests.

Financial overview

STATE-OWNED COMPANIES

Foreword

Now that the accounts are available for two periods of office, it is a stronger group of state-owned companies which is looking to the future.

The state corporate group is an asset for Sweden.

They play an important role for diversity in the business sector and contribute to employment in the whole of Sweden. Some of them have special responsibility for the performance of important public services and functions. The holdings include companies that manage and develop natural assets.

The overall goal of state ownership administration is that the companies are to create value. Valuable companies are able to play an active part in the changeover and development of Sweden and provide stimulating workplaces. The Government has developed active, long-term administration on this basis.

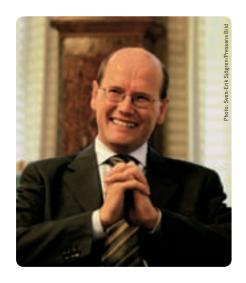

During the past two periods of office, many steps have been taken towards a more uniform and professional owner administration. The first step was taken in 1999 when regulatory matters were separated from company administration and administration was concentrated at two units at the Ministry of Finance and the Ministry of Industry, Employment and Communications. At the cabinet reshuffle in 2002, these were combined into one unit and the Minister for Industry and Trade was given overall responsibility for ownership policy and board nominations in all state-owned companies.

Openness is a fundamental part of ownership administration. With the whole of the Swedish people as owners, transparency of both the companies and their administration is of the utmost importance. The first "popular version" of the Government Communication on State-owned Companies was published in July 1999. It was intended to increase access to and transparency of the state-owned companies. This has now developed into an annual report for state-owned companies, which is one of Sweden's most important policy documents for corporate governance. Swedish state corporate administration has also attracted attention internationally, among other places in the OECD guidelines for corporate governance of state-owned enterprises. In 2000, the Government Offices also started to publish interim reports. The Government has decided that the companies' accounts should maintain the same standard as listed companies.

Financially, the state-owned companies have developed well. Net profit has, of course, been affected by the level of economic activity and decreased between 2000 and 2002 while companies have subsequently reported improved earnings every year with the best performance during the period in 2005. Shareholders' equity has increased by 76 per cent to around SEK 273 billion from around SEK 155 billion in 1999. Dividends from the companies have increased and in 2006 dividends of SEK 26.5 billion have been recommended, the highest dividend ever received by the state. The state corporate group is now valued at SEK 675 billion.

Profitable companies are able to invest to enhance their competitiveness. During this period, the state-owned companies have decided on investments for hundreds of billion kronor. Increased investment leads to higher employment and growth for Sweden. The dividends of the state-owned companies are an important contribution to the state budget. This means that all Swedes share in the profits created by the state-owned companies.

The state-owned companies are also to set good examples in areas such as the environment, ethics and gender equality. A number of state-owned companies are taking the lead here with special reports on their work for sustainable development and social responsibility and by joining the Swedish Partnership for Global Responsibility, a Government initiative to promote work by Swedish companies for human rights, working conditions, the fight against corruption and a better environment. The Government has worked purposefully to increase the number of women on company boards. During 2000, the target was set that the number of women on the boards of state-owned companies was to be at least 40 per cent by 2003. This target was achieved and the proportion of women on the boards of wholly-owned state-owned companies is now on average 47 per cent and the proportion of men 53 per cent.

The state-owned companies are also to set good examples in the sphere of innovation. Innovative state-owned companies have a lot to contribute to the Swedish innovation system. By working actively and strategically with innovation processes, the state-owned companies contribute to strengthening Swedish competitiveness. Among other ways, this takes place by working together with universities and other institutions of higher education, engaging in work to commercialise research findings and by developing entrepreneurship in the local environment, together with other actors. Some good examples are LKAB which has developed an innovation policy, Sveaskog Naturupplevelser AB which, together with local entrepreneurs, has developed commercial offers for, for instance, hunting and nature experiences, and Vattenfall which, together with other actors in Western Sweden, has created Innovatum, a board that works for the development of the innovation system in the region.

The Government's ownership policy is long-term responsible. There are many examples of this. Through the establishment of Sveaskog in 1999, our important national forest resource was developed in a long-term and ecologically sustainable way. SJ, Green Cargo and Teracom, which have received shareowner contributions, are now making a profit and face the future on a strong foundation. Vattenfall has taken the step to becoming one of Europe's foremost energy companies and is making substantial investments in renewable energy. Posten has moved from loss into profit. LKAB is on the threshold of its largest investments ever. SBAB is pushing down prices on the residential loan market and was given an expanded remit in 2005 to accept deposits from the public. And these are only some examples.

According to the very first annual report published in July 1999, state ownership policy was to "provide our Swedish state-owned companies with the best possible conditions to continue to develop and be a driving force for the whole of Sweden".

This applies today and in the future.

Stockholm, 4 May 2006

Göran Persson

Thomas Östros

The year in brief 2005

Svenska Spel awarded a prize for diversity and integration

Svenska Spel's Casino Cosmopol in Malmö was awarded the City of Malmö's Diversity and Integration Prize in 2005. A structured and forward-looking diversity plan where diversity is regarded as an important competitive advantage has laid the foundation for the company's successful integration work.

Best youth hostel

One of AB Göta kanalbolag's youth hostels – the STF youth hostel Borensberg/Glasbruket in Östergötland – was designated by STF as Sweden's best youth hostel in 2005 in the category natural and cultural experience of the year.

Important sustainability report

Vattenfall published its second annual Corporate Social Responsibility repport during the year. This extensive CSR report focused, on climate-related issues and the development of renewable sources of energy, among other things. Vattenfall's CSR report is arranged in accordance with the Global Reporting Initiative, the internationally recognised guidelines for sustainability reports.

Rail news

The Swedish state-owned train operator SJ put new regional double-deck trains and refurbished X 2000 trains into service during the year.

Imego expanding rapidly...

The Swedish research and development company Imego achieved a top position when the prestigious ranking Technology Fast 500, which lists Europe's fastest growing company in the technology sector, was announced in February.

...as well as Lernia Bemanning

Lernia Bemanning was designated Sweden's fastest growing company for the second year running in Ahrens and Svenska Dagbladet's Growth List in 2005.

Vattenfall - the best report

Vattenfall was designated the winner in the large company category in the prestigious "Best Annual Report" competition. This competition is organised by the Stockholm stock exchange.

The first coal power plant with separation and storage of carbon dioxide

In May, Vattentall announced that it was going to build the world's first pilot plant for a carbon-

dioxide free coal power plant. The plant, which is to be erected in Germany and is expected to be finished in 2008, demonstrates Vattenfall's leading role in the development of future more climate-friendly energy extraction from lignite.

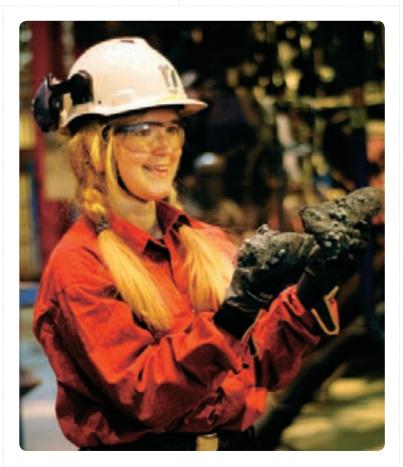

Good performance by Nordea

During the year, Nordea was appointed as the best private (commercial) bank in the Nordic countries by the magazine Euromoney. This award was motivated primarily by Nordea's complete range of services and expertise in the sphere of asset management. Nordea was also designated Sweden's best bank by the well-reputed financial magazine The Banker for the second year running.

A lot of people affected by the storm Gudrun

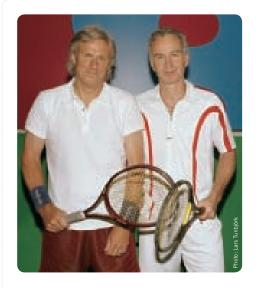

The storm Gudrun, which took place in January 2005, affected a number of the state-owned companies in different ways. Rail transport, electricity and telephone communications were badly affected. Among others, Vattenfall and TeliaSonera had to carry out a great deal of repair and restoration work. Sveaskog played an important part in processing the enormous quantities of storm-felled timber due to Gudrun. Green Cargo also made great efforts to quickly provide forest owners with good transport solutions for the storm-felled timber.

Largest investment ever for LKAB

In December, LKAB decided to carry out the company's hitherto most extensive investment. In all, this amounts to SEK 6.4 billion for investments in pellet plants, concentrating plants, measures to increase productivity in the infrastructure and in mines and extensive environmental improvement measures, including in the form of exhaust gas purification. The new pellet work, commissioned in 2008, will be LKAB's sixth.

Tennis veterans among advertising prizewinners

Vasakronan's campaign "Borg v. McEnroe" and SBAB's campaign "Scrap the top loan" won awards when the prizewinners of Dagens Industri's and the Swedish Advertisers' Association's advertising campaign 100-wattaren were announced. SBAB also won a prize for its successful long-term brand management.

Further steps towards an integrated securities market

During 2005, the merger between OMX and Copenhagen Stock Exchange was completed. This transaction is a further important step towards an integrated Nordic and Baltic securities market.

Sweden's most contented staff?

The employees at Specialfastigheter are among the most contented in the whole of Sweden. Investments in preventive health care and management training are two of the reasons why Specialfastigheter scored over 80 per cent in the Satisfied Employee Index (NMI) in two consecutive measurements. The average for NMI is around 70 per cent.

- 1.4 billion kronor. Vasakronan sold the business park InfraCity in Upplands Väsby to Orion Capital Management for SEK 1.4 billion.
- 3.65 billion kronor. The agreement for the acquisition by Korsnäs of all AssiDomän Cartonboard Holding shares was for SEK 3.65 billion. This transaction is expected to be completed in 2006.
- 9 million boxes. ABSOLUT VODKA's annual production was 9 million. The historic record was broken on 15 December at V&S plant in Åhus.
- million US dollars (SEK 100 million). This is the size of Swedfund's biggest investment to date the construction of a cement factory at Obajana, Nigeria. The borrower is Obajana Cement Plc.
- per cent. This is Telia-Sonera's share of the Norwegian mobile market after acquiring the majority of shares in Vollvik Gruppen AS, owner of the mobile operator Chess/Sense.
- Vasallen scored 81 in the index when Fastighetsbarometern designated the company as Sweden's best landlord in 2005. Last year's winner Vasakronan came second at 79.
- million kronor. Systembolaget is investing SEK 100 million over a five-year period to create a new focus in the alcohol issue through the subsidiary IQ-initiativet AB launched in May.

The most contented mortgage customers are at SBAB

SBAB has Sweden's most contented residential mortgage customers. This was shown by the Swedish Quality Index's measurement of customer satisfaction among Sweden's residential mortgage customers for 2005.

Important acquisitions for SEK

In August SEK took over the business operations of BDO Financial Services. Through this merger, SEK's financial advice gained both strategic and financial expertise.

From analogue to digital

The first stage of the transition to digital TV was completed on 27 November when Teracom shut down the analogue transmissions in the terrestrial network from the broadcasting station in Motala in the county of Östergötland on 27 November. Just as in Gotland and in Gästrikland, which had previously gone over to digital transmissions, the inhabitants of Östergotland were well prepared and the transition was very smooth. The rest of Östergötland is next in turn for digital-TV when stage two starts in 2006.

Strategic energy deal

In April, Vattenfall acquired 35.3 per cent of the shares of Danish Elsam for around SEK 10.4 billion. In June, Vattenfall entered into an agreement with another main owner of Elsam, Danish Dong, which meant that Vattenfall – in exchange for a shareholding in Elsam – took over 24 per cent of the total production capacity in the Danish companies Elsam and E2 acquired by Dong.

Flying start for Europaflyg

On 1 September, SAS launched the new concept Nya Europaflyget. Among other features, lower prices and single journeys that can be freely combined as well as simpler booking make it easier to discover Europe.

Ownership activities 2005

Authorisation to divest Imego

In the research policy bill, Forskning för ett bättre liv (Research for a better life, in Swedish, Government Bill 2004/05:80), it was proposed that the Government be authorised to sell the whole or parts of the state shareholding in Imego to a new principal.

SBAB's remit expanded

In December, the Riksdag decided to expand SBAB's remit to include accepting deposits from the public. SBAB will make preparations in 2006 to also be able to offer customers savings products.

Arbetslivsresurs established

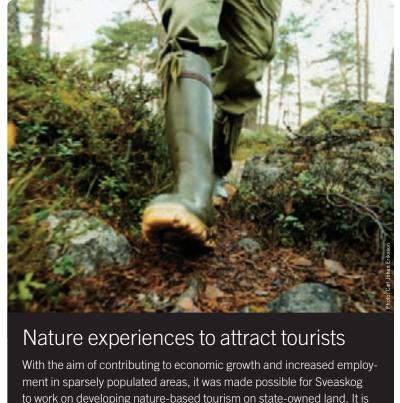

After a decision by the Swedish parliament, the Riksdag, in December on a merger of Samhall AB's subsidiary Samhall Resurs AB and AMS's unit Arbetslivstjänster, the wholly state-owned company Arbetslivsresurs AR AB was established. The company primarily works with working-life rehabilitation, preventive measures and adjustment.

SAS the most transparent company

SAS was declared the winner of Genomlyst 2005 with the motivation "SAS describes the company's strategic position and work with profitability in an industry with structural problems in a credible way. The sustainability report, which has been reviewed by the auditor, is impressive".

Meetings of chairmen

The ownership administration has gathered the chairmen of the boards of the state-owned companies on three occasions to discuss current issues.

With the aim of contributing to economic growth and increased employment in sparsely populated areas, it was made possible for Sveaskog to work on developing nature-based tourism on state-owned land. It is primarily Sveaskog's expertise in hunting and fishing that serves as the basis for the expanded commission. This activity is conducted through the subsidiary Sveaskog Naturupplevelser.

Board conference attracted a large number of participants

The Ministry of Industry, Employment and Communication's annual board conference for board members of state-owned companies was held on 11 May with more than 280 participants. The speakers included Leif Johansson, CEO of the Volvos group, Harriet Wallberg Henriksson, principal of Karolinska Institute, and the actress Lena Endre.

OECD guidelines comply with Swedish ownership policy

In April, OECD established guidelines for corporate governance issues relating to state-owned enterprises. There is a lot of interest from OECD countries and from countries outside the OECD in applying these guidelines that are largely based on the ownership policy developed in Sweden. Extensive international work has been initiated to implement these guidelines.

The Code on the agenda for board training

For the second year running, customised board training took place for board members of state-owned companies. This training consisted of the Companies Act, the State ownership Policy, and the Corporate Governance Code.

Clearer direction of business activity for Teracom

According to the Government's proposals, the Riksdag made a decision on a clearer direction of business activity for Teracom and a changed destination for dividends. The Riksdag also decided that Teracom's responsibility for matters relating to emergency preparedness is to be clarified.

New networks increase the exchange of experience

An HR network for personnel issues and a network communication have been established to broaden contact areas and increase exchange of information between companies in the state corporate sphere, and also between companies and Government Offices.

Bridge between innovations and commercialisation

Together with the seven Teknikbro trusts and the National Industrial Development Fund, the Government established Innovationsbron AB during the spring. The company will work with seven wholly-owned subsidiaries to further strengthen the conditions for commercialisation of research results and ideas from universities and other higher education institutions and in the business sector.

Sweden promoted abroad

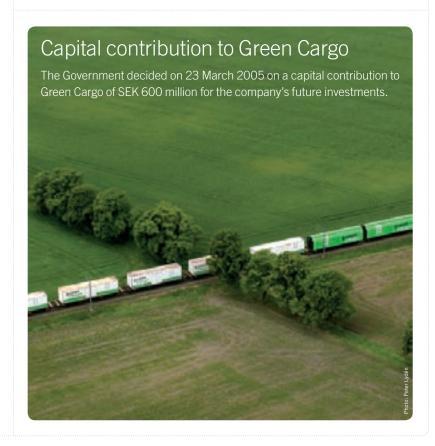

On the Government's behalf, the Riksdag has made Sveriges Rese-och Turistråd (VisitSweden AB after a change of name in March 2006) responsible for marketing Sweden's image together with the members of the Council for Promotion of Sweden Abroad. The company was also given the task of marketing Swedish destinations and experiences abroad.

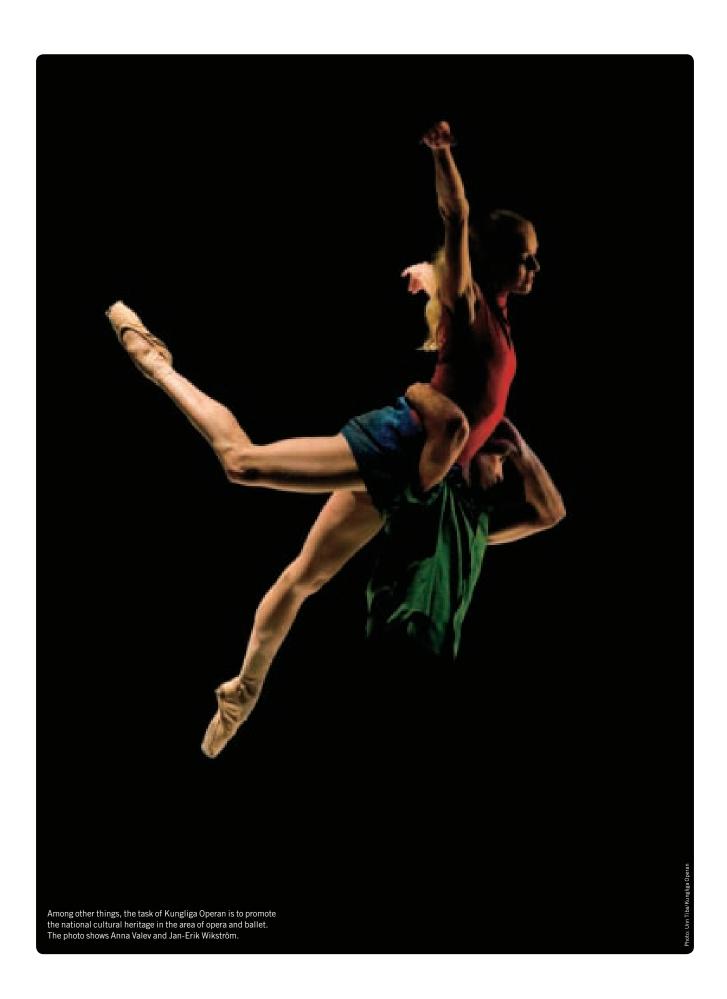

Supplement to Vattenfall's articles of association

An addition was made to Vattenfall's articles of association at the company's annual general meeting in 2005. Within the framework of a commercial approach, Vattenfall is to be the leading company in the transition to an ecologically and economically sustainable Swedish energy supply.

Review of administration by the Government Offices

The administration of the Government Offices is to be reviewed to safeguard continued high quality and to further increase the efficiency of administration of the state-owned companies. The head of the Ministry of Industry, Employment and Communications has therefore appointed Peter Lagerblad as special investigator to examine how an efficiently designed administration of state-owned companies should be designed and organised, and to consider when and how ownership instructions should be drawn up for state-owned companies. This review is to be completed by the end of October 2006. The goal is to further improve the professional, proactive and responsible administration now being pursued within the Government Offices.

Focus on the long-term creation of value

The Swedish state is Sweden's largest company owner. The Swedish Government Offices administer 55 companies/groups, of which 41 are wholly owned and 14 partly owned by the state. A total of approximately 190,000 people are employed in these companies. The Swedish state is moreover the largest owner on the Stockholm Stock Exchange. This involves a considerable responsibility and demands long-term and professional administration.

The Government's overall objective is creating value for the owners. State-owned companies can in principle be divided into two groups: companies operating under market conditions and companies that primarily have special societal interests to fulfil. The group of companies operating under market conditions also includes the listed companies. The total value of the companies administered is assessed at around SEK 675 billion.

The state owns companies engaged in activities that range from mining to opera and real estate to gambling. Many of the companies have a strong position in the market in important sectors, including various kinds of infrastructure. The goal of creating value entails requirements for a long-term approach, efficiency, profitability, development capacity and sustainable environmental and social responsibility, thus contributing to the transition in Sweden.

In the same way as businesses owned by other owners, the state-owned companies are facing increasingly fierce competition in a rapidly changing environment. State ownership administration therefore requires a clear, open ownership policy continuously adapted to the increased and changing demands made. The Government Offices' administration is being reviewed to safeguard a continued high quality and increase efficiency in ownership administration. This review is to be completed by the end of October 2006.

The Government's commission

The Government's commission given by the Swedish Parliament (the Riksdag), is to actively monitor and manage the state's assets in order to achieve the best long-term development of value and, in those cases where it is applicable, to comply with the special societal interests. Corporate governance takes place both by board work, dialogue with the chairman of the board and at the annual general meeting. Monitoring and assessment of the companies take place, in among other ways, by financial analyses, industry analyses and various reports. The companies that have special targets, besides the creation of financial value, are also to be monitored and assessed. The commission of ownership administration also includes developing and implementing the Government's ownership policy in all state-owned companies. The Government reports on the administration of state-owned companies in the annual report to the Riksdag. This report mainly consists of the annual report on state-owned companies. From 2006, no public enterprises are included in the annual report.

THE GOVERNMENT'S ADMINISTRATION MANDATE

The state's funds and its other assets are at the disposal of the Government in accordance with Chapter 9, section 8 of the Constitution. According to Chapter 9, section 9, the Riksdag, shall determine the bases – to the extent required – for the administration and disposal of the state's property. This is the administration mandate the Government has for administration of state-owned companies. The Government should thus, on certain conditions, obtain the approval of the Riksdag in the event of significant changes of direction by companies, dilution of ownership, capital contributions and the sale and purchase of shares. According to the State Budget Act (1996:1059), the Government may sell the state's shares in companies where the state has less than half of the votes or participation rights in the company unless the Riksdag has decided otherwise. However, the Government may not reduce the state's holding of shares in companies where the state has half or more than half of the votes for all shares or participation rights without the approval of the Riksdag. A decision by the Riksdag is not required for dividends since this is part of normal administration. Neither is a decision by the Riksdag required for acquisitions, disposals or close-downs that companies carry out within the direction of operations decided upon by the Riksdag. A summary of bills relating to particular companies is shown on page 108. According to Chapter 7, section 5, of the Constitution, the Prime Minister has delegated responsibility to the Minister for Industry and Trade in matters relating to the state ownership of companies, which make

1) Sold on 16 March 2006.

demands for a uniform owner policy or which concern board nominations.

CURRENT POWERS

The Riksdag has empowered the Government to phase out ownership of Nordea Bank AB, SAKAB AB, AB Svensk Exportkredit and Telia-Sonera AB and to sell the whole or parts of the state shareholding in Imego AB. The Riksdag has also authorised the Government to sell the whole or parts of the shareholding or acquire additional shares in OMX AB.

CONSISTENT AND CLEAR REPORTING

The objective for reporting by the Swedish Government Offices is to provide consistent and clear reporting that enables the reader to assess how the administration of state-owned companies is being developed. The Riksdag originally passed a resolution in February 1982 that the Government should submit an annual report on state-owned companies. Since July 1999, the Swedish Government Offices have also published an annual report on state-owned companies. The annual report is targeted at the general public, the stateowned companies, the media, the trade unions and other stakeholders, but is also an appendix to the Government's official annual report to the Riksdag on state-owned companies. It has included the consolidated income statements and balance sheets since 2000, which illustrate the overall development of the state-owned companies. As from 2000, the Swedish Government Offices have also published four interim reports per year. Work to ensure the quality of external reporting together with the ambition to publish the reports promptly after the end of the reporting period are priority aims.

Framework and tools

Decisions concerning the companies comply with administrative practice at the Swedish Government Offices. When considering matters, the regulatory framework for public access and secrecy is applied among other things.

THE SAME LEGISLATION FOR ALL COMPANIES

The state-owned companies are subject to the same legislation as privately-owned companies, such as the Companies Act, the legislation on competition, the accounting legislation and the Insider Act.

The companies' activities are primarily governed by the resolutions of the Riksdag and other provisions for the activity that may exist in law or by agreement between the state and the company. Companies active in a particular sector are also subject to special sector legislation, for instance, the Postal Services Act (1993:1684) and the Electronic Communications Act (2003:389).

EC PROVISIONS ON GOVERNMENT ASSISTANCE

There are certain provisions that are focused on capital contributions and other financial benefits from the state. The rules apply to all assistance to companies from the state, both to state-owned and private companies, and are based on EC provisions for government assistance. These rules are particularly

important when the state as a shareholder needs to provide a shareholders' contribution. The rules are intended to prevent a Member State distorting competition by assistance that strengthens the competitiveness of domestic industry to the disadvantage of companies in another Member State. In the case of contributions of shareholders' capital in stateowned companies operating in competitive markets, the EC Community acquis considers that the Market Investor Principle, MIP is to be applied. Normally, the MIP is complied with if the capital contribution is provided on conditions and terms that would also have been acceptable to a private investor. If the Member State considers at the time of the contribution, that the contribution will provide a sufficient long-term return, it is not unlawful state aid.

ACCOUNTING FOR GOVERNMENT FUNDS

Special rules on reporting of financial links apply to companies with a turnover per year of a particular size that receive state aid or other public benefits, in order to allow the EC Commission to obtain an insight into financial links to control, among other things, cross-subsidies. Open accounting is to apply to the funds provided and how they are used. The demand for separate accounting also applies for activities carried out, inter alia, by monopoly companies or other companies in a special position, when the company is also engaged in competitive activity. The rules are contained in the transparency directive, which has been incorporated in Swedish legislation in the Insight into Certain Financial Links and Related Matters Act (2005:590), which came into force on 1 August 2005.

AN IMPROVED CAPITAL STRUCTURE IN STATE-OWNED COMPANIES

The Riksdag considered in the 2003 Spring Fiscal Policy Bill that there were good reasons to create an arrangement that would facilitate capital restructuring in the state-owned corporate sphere. This could be done by ring fencing, which means that the Riksdag decides what the company's profits are to be used for. The state should in this way be able to act in the same way as a parent company that provides capital contributions to certain subsidiaries and finance this with funds from other subsidiaries. Briefly, this means that an account has been set up at the National Debt Office to which additional dividend of at most SEK 5,000 million can be transferred from state-owned

companies with a view to being used for capital contributions in state-owned companies until the end of the 2006 fiscal year. The Riksdag decides on the size of the amount to be transferred to the account for one year at a time. The Riksdag also decides on capital contributions in each individual case. Altogether, SEK 2,998 million has been transferred to and SEK 2,995 million has been made use of from the special account between 2003 and 2005.

PUBLIC ACCESS AND SECRECY

Since the state-owned companies are administered by the Swedish Government Offices, which is a government agency, a document kept and considered as received or drawn up there, may be a publicly available document. On certain conditions, the contents of a public document may be kept secret. Information may be kept secret, for instance, to protect the financial interests of the general public or an individual. This means that the person who wishes to examine a document may make a request for access to the information, but the Swedish Government Offices must, pursuant to the Secrecy Act (1980:100), make a consideration of damage before the document can be released. The information may normally be released if this can take place without damage to the state or the company that the information concerns. Certain information may be sensitive business information. In certain cases, it could thus damage the activities of the company and the value of the company, if the information was published.

INSIDER INFORMATION

Insider information is defined in the Act (2005:377) on Penalties for Abuse of the Market when Trading with Financial Instruments as information, which has not been published or is not generally known, which, if released, could have a significant impact on share prices. It is prohibited for everyone, not only for persons in leading positions, to trade with financial instruments on the securities market on the basis of insider information. Persons who have disclosed or traded on the basis of insider information can be sentenced to a fine or to a maximum of four years' imprisonment. It is also prohibited to disclose insider information and to exercise an improper influence on the market. The Act (2000:1087) on the Duty of Notification for Certain Holdings of Financial Instruments states the notification of a shareholding or change in shareholding shall be notified to the Swedish Financial

Supervisory Authority, within five working days. The Financial Supervisory Authority keeps a register of persons in positions with access to insider information in listed limited companies. The companies are to notify the persons that have such access. The Swedish Government Offices also notify persons with access to insider information to the Financial Supervisory Authority. All information that the Financial Supervisory Authority has is published on the insider list on the Financial Supervisory Authority's website.

THE COMPANIES ACT

The Companies Act (2005:551) (ABL) provides the framework for the companies and the general direction of the company is stated in the articles of association of the company. The companies' commission and activities are primarily governed by the Riksdag resolutions, statutory provisions or in agreements between the company and the state. State-owned limited companies, as privately-owned companies, are subject to the Companies Act and there are no special rules in the Companies Act that apply to state-owned companies, except those that apply to insight by the Swedish National Audit Office.

Within the framework of a performance audit, the National Audit Office can scrutinise the activity that the state carried out in the form of a limited company. The prerequisites for the activity are regulated by law or in another statutory provision or the central government has a determining influence over the activity. The National Audit Office can also appoint one or more auditors to take part in the annual audit. The National Audit Office has appointed auditors in a large number of state-owned companies.

SWEDISH CODE FOR CORPORATE GOVERNANCE

In December 2004, the "Swedish Code for Corporate Governance" (the Code) was presented. The Code is available as an offprint in the State ownership policy 2006. The overall purpose of the Code is to contribute to an improved governance of Swedish limited companies. The Code deals with the decision-making system by which the owners directly or indirectly control the company. The rules concern the organisation and forms of work of the various bodies in the company and their interaction. It also provides guidelines for corporate reports. The Code is to be applied in accordance with the principle "comply or

explain". This means that it can be just as correct not to comply with a rule if an explanation is given. The Code has been applied by the Stockholm Stock Exchange from 1 July 2005.

The principles applied by the Government in its ownership policy largely comply with the rules in the Code. The Government's ambition is to act in a credible and predictable way in its ownership administration. The Government therefore decided that the Code is part of the Government's framework for state ownership administration from May 2005. Among other things, this means that the wholly-owned state companies are to apply the Code. All state-owned listed companies apply the Code. As regards other partly-owned companies, the Government is endeavouring, together with other owners, for the Code to be applied.

The basic principle is that the Code is part of State ownership policy. In certain matters, the Government has found it justified, in accordance with the Code's principles, to give reasons for certain general departures from the Code. The foremost reason for this is that the Code is mainly intended for companies with a spread of ownership. The Swedish Corporate Governance Board has been set up to take care of and further develop the Code. Unless the Government notifies otherwise, the state-owned companies are expected to apply the Code as updated from time to time. Correspondingly, the recommendations made by the Swedish Corporate Governance Board are to be complied with. The Government's current recommendations and reasons for departures from the Code are shown under "State ownership policy". In addition, the

State ownership policy Swedish Code for Corporate Governance Administration separate from governance Legislation, Companies Act, competition etc. The Government's administration mandate

Government considers that the "10/24 companies" ¹⁾ can provide an account of the Code in a more general way than is appropriate for the larger companies.

The practical application of the Code will also be evaluated in the work of developing ownership policy. Initially, this assessment will mainly focus on checking that the company is working actively to apply the Code. Subsequently, as experiences among owners and companies that apply the Code accumulate, the focus of assessment may also shift.

INTERNATIONAL COLLABORATION

Sweden has actively participated in development of the OECD guidelines for state ownership. In 2005, the OECD adopted the Guidelines on the Corporate Governance of State-Owned Enterprises. These guidelines, based on OECD's Principles of Corporate Governance, are a collection of guidelines for how the OECD countries can administer their state-owned companies. The guidelines are largely based on the Swedish government's principles for ownership administration. Interest in governance of state-owned companies is greatest in the OECD countries and in many other countries, including in East Asia and Latin America. The guidelines are available at http:// www.oecd.org/ dataoecd/46/51/34803211.pdf

State ownership policy

In the following section, the Government presents its position on certain important principles on the administration of the state-owned companies. In consultation with other owners, the Government also intends to work for these principles to be applied in part-owned companies.

THE ANNUAL GENERAL MEETING

The annual general meeting is the supreme decision-making body for the shareholders but there is nothing to prevent the meeting being opened to the general public, if the annual general meeting allows this.

Besides the rules in the Companies Act and the Code, the following principles apply for state-owned companies:

Members of the Riksdag have the right to attend the annual general meetings of companies in which the state owns at least 50 per cent of the shares and which have more than 50 employees. The board is responsible for sending notice of the annual general meeting to the Riksdag's Office at the latest two weeks

COMPANIES WITH OPEN ANNUAL GENERAL MEETINGS IN 2006

Samhall	Vasakronan
SBAB	Vasallen
SJ	Vattenfall
SP	V&S Vin & Sprit

and at the earliest six weeks before the annual general meeting. Members of the Riksdag wishing to attend the meeting should notify the company in advance.

The wholly-owned state companies should arrange some form of event in connection with the general meeting where the public are given an opportunity to ask questions to the management of the company. The 10/24 companies do not normally need to arrange this type of event. The company management and board decide on the practical arrangements for the annual general meeting.

As a step in the Government's ambition to have swifter reporting, the Government also wishes that annual general meetings in stateowned companies be held before 30 April. 51 (38) of the state-owned companies held their annual general meeting before 30 April 2006.

THE NOMINATION PROCESS

The Government's aim is that the board should have a high level of competence adapted to the activities, situation and challenges of the particular company. Members should always have the best interests of the company in mind. The Government expects that members have a high level of integrity and to comply with the requirements for good judgment that can be expected of representatives for the state.

The composition of the board

Every nomination to the board should be based on the competence needed in the board of the respective company. It is therefore important that the composition of the board is such that it always possesses industrial expertise or other knowledge that is directly relevant for the company also when it develops and the external situation changes. In order to be considered for a seat on the board, a high level of general competence is required within either current

Definition 10/24 companies. Commercial unlisted company in which:

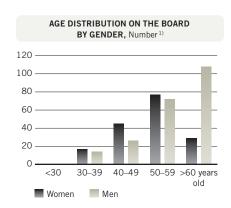

a) the number of employees in the past two financial years amounts to at most 10 and

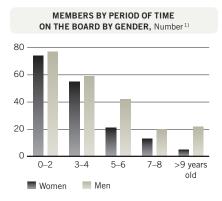

b) the net value of assets according to the set balance sheet for the past financial year amounts to at most SEK 24 million.

The Government aims for an even gender distribution on the boards of state-owned companies. An interim target, for instance, has been that the proportion of women should be at least 40 per cent in 2003. This target was totally achieved for the state-owned corporate sphere by 30 June 2003. On 3 May 2006, the proportion of women was 44 per cent and the proportion of men 56 per cent (including a proposed change in SIS Miljömärkning, which has its annual general meeting on 13 June 2006). The proportion of women in the wholly state-owned companies was 47 per cent and the proportion of men 53 per cent.

¹⁾ From the turn of the year 2005/06, no public enterprises are included in the table. From the turn of the year 2004/05 information is shown in the table for all state-owned companies included in the report, excluding companies in the process of being wound up, SAKAB where the state only owns one share and Zenit Shipping. Information prior to the turn of the year 2004/05 refers to companies where the state's ownership share exceeded 20 per cent.

¹⁾ Based on the number of appointments made by the annual general meeting. Includes all companies included in the report on state-owned companies excluding companies in the process of being wound up.

business activities, business development, sector knowledge, financial issues or other relevant areas. In addition, a high level of integrity and the ability to see the best interests of the company are required. Every board member should be able to make independent assessments of the company's activities. Around 40–60 new board members are appointed annually in the state-owned companies.

The composition of the board should also achieve a balance regarding competence, expe-

rience, age and gender. An interim target has, for example been that the proportion of women was to be at least 40 per cent in 2003. This target was achieved for the state-owned corporate sphere by 30 June 2003. At the turn of the year 2005/06, the proportion of women was 41 (39) per cent and the proportion of men 59 (61) per cent. As at 3 May 2006, the proportion of women was 44 per cent and the proportion of men 56 per cent. In the wholly-owned state companies, the proportion of women was

47 per cent and the proportion of men 53 per cent. In 33 of the state-owned companies, which is equivalent to 61 per cent, the proportion of women on the boards was at least 40 per cent.

Officials at the Swedish Government Offices are often members of the companies' boards. This representation on the board means, among other things that the state's requirement for good insight into the activity is complied with. In this respect, the state acts in the same way as the main private owner of a company.

47 officials, of which 16 women and 31 men, from the Swedish Government Offices are board members of state-owned companies.

In order to achieve effective boards, these should not be too large. The number of members should normally be six to eight. The intention of the Government is to only have ordinary members of the boards unless special reasons require otherwise. In 2005, the boards of state-owned companies consisted of 7.0 (7.6) members on average including deputies. The size of the boards varies from at least 3 to at most 10 members.

A board member should not serve on the same board for a longer period than eight years. The average age of members is 52 (50) for women and 57 (55) for men. Women have worked on average for 3.1 (3.2) years on the board and men on average for 4.4 (4.6) years.

Appointment of boards

The election committee is in the first place a body for shareholders to prepare decisions concerning appointments. In the wholly-owned state companies, the following principles replace the rules in the Code on preparation of decisions on the appointment of board members and auditors.

Uniform and common principles are applied in the wholly-owned state companies for a structured nomination process. The purpose is to ensure an effective provision of competence to the company boards. The Minister of Industry and Trade has been delegated special responsibility for board nominations in all companies administered by the Government Offices. The nomination process is driven forward and co-ordinated by the division for state ownership at the Ministry of Industry, Employment and Communications.

 $\label{eq:Aworking} A \ working \ group \ analyses \ the \ required \ competence \ on \ the \ basis \ of \ the \ composition \ of \ the$

respective board and the activities and situation of the company. Recruitment requirements are then established and recruitment work initiated. Members are selected from a broad recruitment base. When the process has been completed, nominations are to be published in accordance with the guidelines in the Code. This uniform and structured method of work ensures the quality of the nomination process as a whole.

One exception is made in relation to the Code, which is that no account is provided on the independence of the board member in relation to the state as a major owner. As previously mentioned, the Code is mainly focused on companies with spread ownership. The reason for the company having at least two board members who are independent in relation to major shareholders and for the Code stipulating that an account is to be given of the independence of all board members in relation to major owners, is mainly to protect minority shareholders. In whollyowned state companies and partly-owned companies with a few owners, there is therefore no reason to provide a report of this form of independence. However, an account is given of the independence of board members in relation to the state in relevant listed companies. The state also complies with the Code in listed companies by participating with one representative in the election committee.

Board fees

The board members receive remuneration for the work performed and the responsibility that rests on them. The fees of the board are determined by the annual general meeting. Fees to board members who work in specially appointed committees are also to be decided by the annual general meeting. Fees in the

state-owned companies are shown on the respective company page, page 47 pp.

Appointment of auditors

The task of the auditors of performing an independent scrutiny of the management by the board and the chief executive officer (CEO) and of the company's annual report and accounting records, is of key importance for the state as owner. The responsibility for the appointment of auditors in state-owned companies always rests with the owner. The practical work of procurement is usually dealt with by the company's accounting department, an audit committee or other appropriate function. However, the Government Offices administrators/ executives follow all the stages of the procurement process from procurement criteria to election and assessment. The final decision is made by the owner at the annual general meeting of shareholders. Auditors are elected according to the Companies Act for a period of office of four years. In the event of re-election of auditors, the work of auditors is always assessed. In the event of such re-election, a further period of office of three years is possible in accordance with the Companies Act. Continuous assessments are made to correct any deficiencies and to clarify the owners' wishes

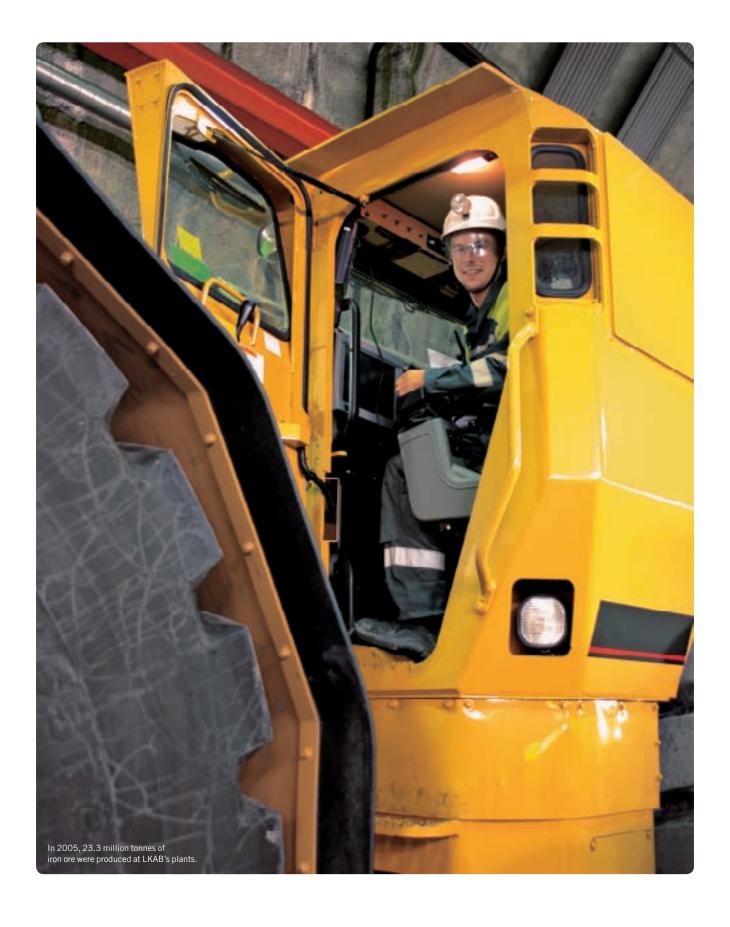

THE RESPONSIBILITY OF THE BOARD

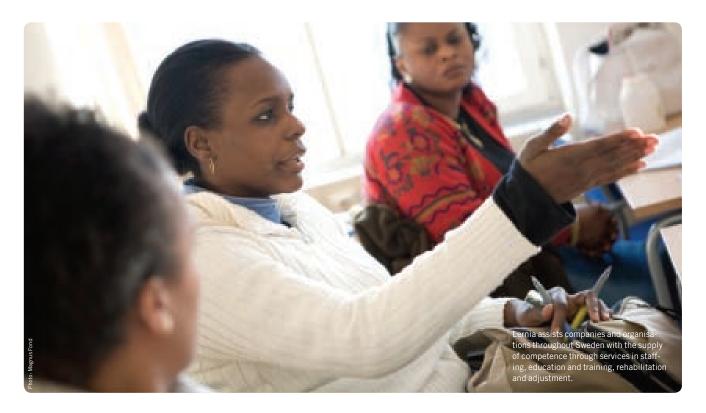

The board and executive management are responsible for the exemplary management of the companies in which the state has an ownership interest within the frameworks provided by legislation and in accordance with the owner's long-term interests. All companies, not least state-owned companies, have a great responsibility in matters concerning financial, environmentally and socially sustainable development and innovative processes.

It is therefore an important part of state ownership policy for companies to have a well-conceived strategy for handling environmental considerations, social issues, human rights, gender equality, diversity and ethics. The board is responsible for ensuring that the company has a policy in these areas. Relevant parts of the policy for the company should be complemented with an action programme with targets and measures for how the policy is to be complied with and how it is to be communicated externally and internally. External reporting is to openly report on policy and the continuous result of work on action plans. The state-owned companies should engage in active

SURVEY OF FEES, AUDITORS (SEK 000s)		0.11			D !!

Swedish National Audit Office	3,794	5	3,799	100	

This summary, which covers 49 companies where the state's ownership share is larger than 20 per cent, shows that the share of the auditing fees for audit is between 33 and 100 per cent from these state-owned companies.

work in their own companies, in their respective sector organisations and in collaboration with suppliers and customers.

Ethical, social and environmental responsibility

Trust issues are of strategic importance in a company perspective. The boards of stateowned companies should decide that the company should have a well-established and common ethical policy assuming ethical, social and environmental taking of responsibility. This policy or code of conduct should be based on the company supporting or endeavouring to comply with the relevant parts of international norms on human rights, working conditions, consideration to the environment and combating corruption. This is particularly important for companies which have business activities located in or procure from countries with deficiencies in compliance with basic international frameworks. These norms are formulated in the OECD guidelines for multinational companies and the ten principles in the UN Global Compact (www.unglobalcompact.org). The guidelines provide an excellent support for privatelyowned and state-owned companies.

The Government has stated on a number of occasions that Sweden is to show the way in

the changeover to a sustainable society. Environmental and sustainability issues are both of commercial and strategic importance. State-owned companies should therefore, like the business sector otherwise, contribute to the work for sustainable development. Companies which have an impact on the environment should regard the environmental sphere as an important strategic area to make use of new business opportunities by offering environmental goods and services on future markets with requirements for high environmental performance and to avoid environmentallyrelated risks and costs. Costs can consist of a high level of costs for measures taken or decontamination and costs due to a deterioration in reputation with suppliers, customers and the public. An environmental or sustainability management system should be introduced in the companies which have a considerable direct or indirect impact on the environment.

Through the Swedish Partnership of Global Responsibility, (www.ud.se/ga), the Government is urging Swedish companies to comply with the OECD guidelines and to the principles of the UN Global Compact. The Government aims for more companies, not only the state-owned companies, to actively report on their social and environmental commitment by joining Global Responsibility.

Setting an example in personnel policy for gender equality work

The executive managements and boards of the state-owned companies should set an example in gender equality work. The Government regards it as an ongoing and important task to make use of the competence and experience of both women and men, not least when new leading executives are appointed. The Government considers that it is very important to increase the proportion of women in executive positions. While it is the responsibility of the executive management to appoint leading executives, the board can actively influence and pursue issues related to company work and policy in personnel matters. Just as the state as owner has taken the lead in the industry to increase the proportion of women on the boards, it is now important that the state-owned companies drive development forward to increasing the proportion of women in executive positions.

Setting an example in work with diversity and against discrimination

The Government considers that work with diversity is important and expects state-owned companies to take this into consideration in their activities and personnel policy. Increased internationalisation makes demands

NUMBER OF COMPANIES WHICH HAVE AN ETHICAL POLICY, ENVIRONMENTAL POLICY, GENDER EQUALITY POLICY AND ENGAGE IN DIVERSITY WORK 13

A review of state-owned companies shows that 38 (33) companies and 98 (96) per cent of the total assets are covered by an ethical policy. The ethical policies have been subject to board decision in 76 (64) per cent of the companies. 42 (39) companies and 86 (80) per cent of the total assets are covered by an environmental policy. The environmental policies have been subject to board decision in 69 (62) per cent of the companies. The proportion of companies with a gender equality policy has increased from 84 to 86 per cent. The proportion of companies engaged in active diversity work has increased from 67 to 76 per cent.

¹⁾ The assessment includes companies where the state's share of ownership is larger than 20 per cent, excluding companies in the process of being wound up.

In twelve of the companies, there is no executive management apart from the CEO. Swedcarrier has no CEO.

DEVELOPMENT OF SICK LEAVE 1)

Sick leave, %	Women, no. of companies 2005	Women, no. of companies 2004	Men, no. of companies 2005	Men, no. of companies 2004	Total, no. of companies 2005	Total, no. of companies 2004
0-2.9 3.0-4.9	8	5 10	12 12	15 11	8 11	10 13
5.0–6.9	11	9	8	9	12	10
7.0-8.9	6	5	1	1	3	4
>9.0	5	7	3	1	4	3

Sick leave is below 5 per cent in 19 companies. 22 companies reduced their total sick leave in 2005. A number of state-owned companies report a higher sick leave for women than for men. In 2005, 4.6 per cent of the number of employees in state-owned companies were on sick leave. According to Statistics Sweden, the total sick leave in 2005 was 3.9 per cent. Long-term sick leave accounted for more than half of sick leave in 56 (69) per cent of the companies.

on the employees for a high level of broad expertise. The overall objective of diversity work is that the competence and experience of all present and future staff are to be made use of in the activity and that there should be

no discrimination related to gender, ethnic affiliation, religion or other system of belief, sexual preferences or impairment in relation to employees, customers, suppliers or others that the company comes into contact with.

STATE-OWNED COMPANIES WHICH HAVE JOINED SWEDISH PARTNERSHIP FOR GLOBAL RESPONSIBILITY AND/OR GLOBAL COMPACT

prit

For instance, action plans should be drawn up as a tool to take better care of the available human capital by broadening the recruitment base and remove barriers to people's ability to contribute to growth and development and to ensure that no discrimination occurs of the kind mentioned above.

Healthier workplaces

All companies and workplaces have an important part to play in increasing health in working life. The Government expects the state-owned companies to set an example in reducing sick leave. In the Government declaration in 2002, the Government set the target of halving the number of days of sick leave by 2008. Strategies to create workplaces where people can work and at the same time feel good is an important issue for company managements. This issue should be taken up at board meetings in the same way as other matters of a strategic nature.

External reporting

For state-owned companies, the requirement for an open and professional provision of information is an issue of democracy since the companies are ultimately owned by the Swedish people. The Government therefore considers that these companies should be at least as transparent as listed companies.

The key words for administration of stateowned companies are transparency, active ownership and good order. As part of this work, the Government took the initiative to a seminar for good reporting and communication in 2004, "Genomlyst2004" which was followed up last year by "Genomlyst2005". The goal of Genomlyst is to spread knowledge and participate in an increased exchange of experience between the state-owned companies in matters relating to good reporting and communication. A jury assesses the companies' external reports according to a number of assessment criteria based on state ownership policy. The seminar will be carried out annually, the intention being to stimulate a further increase in the

quality of the companies' external reporting.

The Government decided on 21 March 2002 on guidelines for external financial reporting. The guidelines are available in the offprint State ownership policy 2006.

It is the responsibility of the board to ensure that the companies, in addition to the current accounting legislation and generally accepted accounting principles, present the annual report, the interim reports and the year-end report, in appropriate parts, in accordance with the recommendations made by the Stockholm Stock Exchange listing agreement with annexes. There is an explicit ambition that the state-owned companies should produce a year-end report at the latest by 31 January each year as from the 2004 accounts. From the

point of view of the owner, reporting by the companies is of particular importance since it is an important control instrument in the continuous monitoring and assessment of the companies. The board is to make a report of the application of the Government's ownership instructions in accordance with the Government's ownership policy in the annual report or the corporate governance report. Any discrepancies are to be explained.

New statutory requirements ²⁾ from 1 May 2005 require the annual report to include information on non-financial risks, so-called sustainability information. The ambition is for the state-owned companies to be able to contribute to developing this area. The Government takes a positive view of the state-owned companies using an accepted principle for sustainability reporting, Global Reporting Initiative Guidelines (GRI).

Committee Work

The Code states that an audit committee and a remunerations committee are to be established. The Government considers that it is the responsibility of every board for making an assessment of the need to establish a committee of this kind. When a committee is established, its work is to be guided by the principles of the Code.

EXECUTIVE MANAGEMENT

One of the most important tasks of the board is to appoint and dismiss the CEO. In order to keep the role of the board and the CEO distinct, the Government considers that the CEO should not be a member of the board. This is a departure from the Code which permits a person from the executive management to be a board member.

Remuneration to the executive management

The Government decided on changed guidelines for terms of employment and incentive programmes on 9 October 2003. These guidelines are available in the offprint State ownership policy 2006.

According to the Code, the owners shall decide at the annual general meeting of shareholders on the board's recommendations for principles of remuneration to the executive management. A prerequisite for the state as owner of wholly-owned companies make decisions in accordance with the board's proposal

Samhall	SOS Alarm	Sveaskog	Systembolaget	

²⁾ On 1 May 2005, EU "modernisation directive" was incorporated into the Swedish Annual Accounts Act.

¹⁾ After review of the companies' websites on 28 April 2006.

 $^{^{1)}}$ Refers to companies where the state's share of ownership exceeds 20 per cent.

²⁾ Refers to remuneration principles for CEOs in wholly-owned state companies with an employed CEO (excluding companies in the process of being wound up) after 9 October 2003.

³⁾ Refers to wholly-owned companies who have submitted annual reports by 28 April 2006 (excluding companies in the process of being wound up).

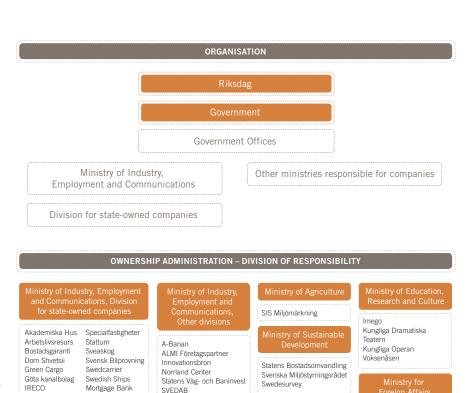

is that the proposal is within the framework of the Government's guidelines. Agreements may exist for particular individuals that have been entered into prior to 9 October 2003 and which do not completely comply with the Government guidelines. The Government guidelines are primarily forward-looking although the Government's ambition is that companies should attempt to renegotiate agreements of this kind. In the case of partlyowned companies, the state as owner will engage in a dialogue with other large owners to achieve compliance with the guidelines.

The Government's overall approach is that:

- ➤ salaries and other benefits to persons in executive management and comparable positions in state-owned companies should be competitive but not wage-leading in relation to comparable companies,
- ► fixed salaries and contribution-based pensions are recommended,
- ▶ in the special cases where incentive programmes are proposed, the programme should include all employed personnel in the company except the CEO and there should be a direct link between the targets on which the reward is to be based and the company's overall business objectives. External factors should not affect the rewards in the design of the programme. The rewards shall be reasonable. Rewards from incentive programmes shall not be paid to the individual employee at an amount exceeding two monthly salaries. The Government considers variable salary components and bonuses as being equivalent to incentive programmes. However, this does not include customary commission-based salary. Furthermore, the Government considers that gratuities shall not be paid to leading executives. A gratuity means remuneration for work already performed in addition to the remuneration that the employee was entitled to at the time the work was performed.

Organisation

As from the turn of the year 2002/2003, the Government decided to concentrate the resources and competence for administration of state ownership to a special division at the Ministry of Industry, Employment and Communications. This has improved the prerequisites to pursue a uniform ownership policy with clear targets and guidelines for the companies. The division for state-owned companies at the Ministry of Industry, Employment

and Communications is responsible for the majority of state-owned companies administered by the Government Offices. Altogether, the Ministry of Industry, Employment and Communications administers 41 companies and I company in the process of being wound up. Other ministries are responsible for 13 companies. These companies are administered by the Ministry of Finance, the Ministry of Agriculture, the Ministry of Sustainable Development, the Ministry of Health and Social Affairs, the Ministry of Education, Research and Culture, and the Ministry for Foreign Affairs. The Minister of Industry and Trade is responsible for all companies administered by the Government Offices with respect to issues that require a uniform ownership policy and with respect to board appointments.

In 2005, the state's administration expenses for state-owned companies totalled SEK 26.5 (31.5) million, of which SEK 7.1 (16.4) million

was for externally purchased services and official reports. Altogether, the total administration expenses corresponded to approximately 0.004 (0.006) per cent of the value of the state corporate sphere, which is assessed at around SEK 675 billion. The estimated value varies and depends on the assumptions made for the respective company. The internal expenses for the division for state ownership at the Ministry of Industry, Employment and Communications include current expenses, such as salaries, travel and office supplies. Services purchased mainly include fees for financial, economic and legal advice and the production of annual and interim reports for state-owned companies. The internal administration expenses for companies administered by other ministries are not reported here since they consist mainly of wage costs that are also assigned to the other tasks of the respective ministry.

Innovative state-owned companies

Individuals in research, the business sector, politics and the community as a whole have to work together closely if the innovation system is to perform well. The Government's "Innovative Sweden" strategy serves as a platform for Sweden's long-term work to strengthen the knowledge base for innovations, promoting an innovative business sector, an innovative public sector and innovative people.

The strategy is being implemented step by step in the form of measures in Government bills, by special assignments or by inputs from other public or private players. Another important instrument for implementation of the strategy is collaboration in the innovation policy council led by the Minister of Industry and Trade.

In Government Bills 2004/05:100 and 2005/06:1, the Government has emphasised that the state-owned companies can contribute to an increased extent to innovations and changeover in Sweden. The Government is now presenting, within the framework of state

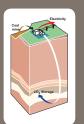

ownership policy, an "Innovation policy for state-owned companies".

"INNOVATION POLICY FOR STATE-OWNED COMPANIES"

The innovation strategy, *Innovative Sweden – a strategy for growth through renewal*, is the Government's platform for working on strengthening Swedish competitiveness. We need to strengthen the knowledge base for innovations and to promote an innovative business sector, an innovative public sector and innovative people. The innovation strategy is based on active participation by many players.

The state-owned companies with an aggregate annual turnover of around SEK 300 billion and a total of around 190,000 employees, are thus an important group of actors. The purpose of the "Innovation policy for state-owned companies" reported on page 25 in seven points, is to emphasis to directions and measures that, besides creating value in businesses, can also contribute to a stronger innovative climate in the business sector and society in general. The policy is applied on the basis of conditions of each company, within the framework of state ownership policy.

Power plant with separation and storage of carbon dioxide

In Vattenfall's strategic work, the board has decided that the climate issue is one of the most important issues to deal with in order to be a successful company.

The project aims at separating CO₂ in the production of electricity and heating using coal as fuel, making it

liquid and then storing it. The technology that Vattenfall is now investing in is called oxyfuel technology.

Pilot studies have led to a decision by Vattenfall's board to construct a pilot plant in Germany. This project started in 2000 and the plant is to have been completed by 2008 and to have been commissioned by mid-2008. It is expected to be able to start construction of a demonstration facility with a larger capacity in 2010. It is considered that the technology could be taken into commercial use towards the end of the next decade.

The investment framework totals EUR 37 million. Vattenfall is working together with various manufacturers of technology such as ABB and is also applying for funds from the EU among others.

Innovations in space as well

There is a need for satellites that can be guided with great precision. Low forces and carefully controlled impulses are needed to achieve this. The company NanoSpace is therefore developing

the world's smallest and weakest rocket engine with a thrust in the millinewton area and below. NanoSpace is developing commercial products for the space industry based on MEMS technology (Micro Electro Mechanical System).

The environmental aspect is important, among others the company ECAPS has patented a green fuel based on ADN (ammonium dinitramide) with appurtenant engine technology and catalyser. This means that one can avoid using the fuel normally used today Hydrazine which is both toxic and carcinogenic. ECAPS, which is owned in equal shares by the Swedish Space Corporation and Volvo Aero, develops and manufactures environmentally friendly propulsion systems for satellites and rockets.

State-owned companies develop innovation strategies by...

- emphasising issues relating to innovative processes and management to a strategic level in companies In this way, the prerequisites are created for a work organisation that creates renewal: new working methods, new technology, new products and services.
- ▶ developing innovative environments in collaboration with universities and other institutions of higher education, research institutions and companies

 The common knowledge base is developed and deepened by strengthening the companies' own research, funding external research and collaboration with universities, other institutions of higher education, and research institutions. Participation in cluster development with companies, research

institutions, institutions of higher education and

other players in the surrounding environment cre-

ates opportunities for development for all parties.

- ▶ working to commercialise research results and ideas
 Active work with spin-offs, participation in innovation
 centres and technology parks and start of new activities makes visible the knowledge in companies and
 contributes to companies developing in the longterm. This work also contributes to the creation of
 new privately-owned companies.
- ▶ working for a long-term provision of competence
 Companies can improve their competitiveness by
 developing internal strategies for learning and the
 development of knowledge. Externally, companies
 can, for instance, support vocational upper secondary schools and collaborate with schools to arouse
 interest in technology among children and young
 people.

► contributing to the development of small and medium-sized enterprises

Companies can make contributions together with other players to develop entrepreneurship in the local environment. The services and products of subcontractors can be developed through an increased dialogue. Large system projects make it possible for advanced development at small sub-contractors and that these can take part in large tenders.

developing more efficient purchasing and procurement processes

Technology-driven procurement with high demands contributes to increased innovation among suppliers. Besides increased efficiency in own core activity, high demands can develop innovations in other areas.

▶ working for sustainable development

By developing knowledge about sustainable development, opportunities are created for innovation and commercialisation of products and services in the area of the environment. Another tool is well-formulated environmental requirements in procurements.

"Strata X-rays"

Collaboration between actors in research and development in northern Sweden is becoming ever more extensive and more important. Through the creation of Bergforsk, there is now an efficient form for prioritisation of research tasks and co-ordination of strong research environments. One such newly-created research and development environment is Process-

IT Innovations, one of VINNOVA's five VINNVäxt winners in 2004.

ProcessIT Innovation's strategic idea to bring together northern Sweden's base industry with the region's information and communication and the universities in Umeå and Luleå. The collaboration in ProcessIT extends to northern Finland.

The company Rock Tech Centre, created on the initiative of LKAB, among others, has started a strategic development project where signals generated in drilling are processed and analysed to "strata X-ray" the rock in real time. The picture can then be used to control production drilling and charging, which will result in increased ore extraction, lower use of energy, reduced impact on the environment and lower costs.

Sveaskog develops the potential in biofuel

Sveaskog is contributing to an increased refinement of biomass and is participating in several projects that develop energy, fuel and chemicals. One project is to make use of the residual product black liquor when manufacturing paper pulp.

If the newly developed gasification technology is installed at all of Sweden's sulphate mills, production of

green electricity can increase by up to 10 TWh, which is equivalent to 5–7 per cent of Sweden's electricity consumption. One alternative is to produce 20–30 TWh renewable vehicle fuels in the form of dimethyl ether (DME), corresponding to 30–40 per cent of Sweden's consumption of petrol and diesel.

In Örnsköldsvik, Sveaskog is participating in a pilot project where ethanol is being made from forest raw material. One residual product in lignine, which can be used as a fuel in combined power and heating plants or refined into lignine products.

Sveaskog is also participating in Pulpmill Biorefinery, which is operated by STFI (Svenska träforskningsinstitutet), for the purpose of creating new areas of use for lignine, hemicellulose and bark which can be reused in pulp plants.

Companies with sole rights still important

Among the companies with special societal interests, there is a special and important group of companies. These are companies with sole rights which have performed – and continue to perform – important functions in their respective industries and markets.

The clearest examples of companies with sole rights (monopoly) are Apoteket, Svenska Spel and Systembolaget. In 2005, these three companies together had a turnover of over SEK 73 billion and reported a profit of over SEK 5 billion. There are more than 15,000 employees in these three companies.

There are varying backgrounds to the establishment and development of these monopolies. However, regardless of whether it concerns a sole right to sell pharmaceutical products or alcoholic beverages to the public, which take place through Apoteket and Systembolaget, or about the licence granted to Svenska Spel to engage in lotteries and number games, there is a common foundation for the establishment of the monopoly. This foundation has been – and is – social policy.

ESTABLISHMENT OF APOTEKSBOLAGET

In the light of the fact that the then fragmentary pharmacy sector could not make use of benefits of scale at the level of distribution, the Riksdag decided in 1970 to set up Apoteksbolaget. Apoteksbolaget would make it possible to limit the rapidly growing costs of pharmaceutical products at the same time as a unified Apoteksbolag could play an important part in overall health and medical care.

In connection with the state becoming the only owner of the company in 1998, the company changed name to Apoteket AB. In addition to the operating agreement between the State and Apoteket AB which regulates the company's activities, the owner formulates, through an owner directive, a number of requirements on Apoteket AB in the form of targets for profitability and the equity/ assets ratio as well as the dividend policy.

Sales of pharmaceutical products on prescription and other medicines mainly take place through Apoteket's 900 out-patient pharmacies. With a view to ensuring the supply of pharmaceutical products in the most sparsely populated areas as well, the company has an agreement with around 850 pharmacy agents. Apoteket's national commission also includes continuously striving for improved access, through new and supplementary customer channels.

SECURE AND EFFICIENT SUPPLY SYSTEM

The Swedish pharmacy system is one of the safest and most efficient supply systems in the world for pharmaceutical products. Distribution costs are uniquely low at the same time as Sweden has among the lowest prices in Europe for pharmaceutical products. The positive effects of generic substitution – where a prescribed pharmaceutical product in replaced by the cheapest equivalent product – have also benefited the customer. The financial savings from the generic product reform introduced in 2002 are counted in billions.

In May 2005, the European Court of Justice announced a judgment in the Hanner case, the background of which was that the company Bringwell sold off-prescription nicotine replacement products in one store whereupon

the company's CEO Krister Hanner was prosecuted. The European Court did not reject the Swedish state trading monopoly in principle, but noted that Article 31.1 EC was an impediment to a sole right to retail trade designed in such a way as in this case. The regulation requires that a state trading monopoly be designed in such a way that there is no discrimination elating to the conditions of acquisition or sale between the citizens of the Member States. With a view to complying with the European Court judgment, the Government immediately made a number of adjustments in the operating agreement between the State and Apoteket. Furthermore, the mandate for the previous Alcoholic Beverages Range Committee was broadened to include appeals relating to Apoteket's stock.

APOTEKET'S MONOPOLY TO BE INVESTIGATED

In September 2005, the Government instructed a special investigator to review whether or not other actors than Apoteket AB should be entitled to engage in retail trade with nicotine replacement products. An interim report was submitted to the Government in February 2006. The investigator has been instructed in a supplementary directive to review the retail trade in pharmaceutical products in a broader perspective. An in-depth analysis is to be made, within the framework of the investigation, of the European Court's judgment with a view to establishing whether further adaptations need to be made of the Swedish pharmacy monopoly to make it compatible with EC law. The final report is to be submitted at the latest by 31 December 2007.

TIPSTJÄNST AND PENNINGLOTTERIET BECOME SVENSKA SPEL

With its 1,800 employees, the Svenska Spel group is Sweden's leading gaming firm, engaging in sporting games and games of chance and also games on prize machines. The group also includes the subsidiary Casino Cosmopol, which is responsible for Sweden's four international casinos.

Svenska Spel was established in 1997 after a merger of Tipstjänst and Penninglotteriet.

The latter firm has a history extending back to the nineteenth century; Penninglotteriet was started with a view to collecting money for the great Stockholm exhibition of 1897. The actual company was privately-owned for many years, while its profit was used for purposes decided upon by the Government. In 1939, the state took over Penninglotteriet as a wholly-owned lottery company. A few years earlier, in 1934, the private company Tipstjänst was granted permission by the state to start its activities. The reason for this was the increase in illegal betting on sport during the 1920s and 1930s, which the Government wished to prevent.

Today, Svenska Spel's commission from the state is "to meet consumer demand for attractive lotteries and games by renewal and development". Its commission also includes taking special consideration to international competition and being able to offer a competitive alternative that meets highly pitched demands for responsible gambling. Responsible gam-

bling means that the company is work in a preventive way and offer gamblers the best possibilities to control their gambling. Svenska Spel's taking of responsibility means that the company does not maximise profits to the greatest possible extent.

ONE OF SWEDEN'S LARGEST SPONSORS OF SPORT AND CULTURE

Svenska Spel is one of Sweden's largest sponsors of sport and culture and sponsors, among other things, football, ice hockey, handball, bandy and indoor bandy. Over SEK 1 billion of Svenska Spel's surplus for 2005 is paid directly to the sports movement in the form of a grant to the National Sports Confederation. In the sphere of culture, Svenska Spel sponsors projects such as the theatre Romateatern and the Mediaeval Week on Gotland. The melody festival is another event sponsored by Svenska Spel. Svenska Spel also supports the Centre for Gaming Research at Gotland University College.

Over 80 per cent of the adult population gamble at some time during the year on one of the company's games. After having been granted the Government's consent in November 2005, Svenska Spel is going to launch internet poker in the spring of 2006. The range includes some of Sweden's best-known brands, including Triss, Lotto, Jack Vegas, Oddset and Stryktipset. The company's products are sold by over 6,200 agents and around 2,000 restaurants throughout Sweden. Svenska Spel's goal is to continue to be Sweden's largest and most profitable gaming and lottery company with responsible gambling as its slogan.

CONTROLLED AND RESPONSIBLE SALES OF ALCOHOL

The state alcohol monopoly is a Swedish initiative has its origins as far back as the mid-nineteenth century. Today, there is an alcohol monopoly in Norway, Finland, parts of Canada and a number of states in the United States. The basic idea is that sale of alcohol is not to

Engelbrektsskolan in Örebro halved drinking among students by helping parents set common rules.

be governed by private profit-making interests. Sales are instead to take place through a special state-owned state retail company. In Sweden, this takes place through Systembolaget.

The monopoly has also proven to work very well in practice. Sweden's alcohol consumption, which at the start of the nineteenth century, was one of the highest in Europe, is today one of the lowest. Although consumption has increased greatly in recent years – primarily due to increased import allowances and changed drinking habits – there are still considerably fewer alcohol-related problems in Sweden than in comparable countries where there is no monopoly.

Systembolaget is the most important tool for maintaining a controlled and responsible sale of alcohol. This takes place by strict compliance with age limits, not selling to persons who are evidently under the influence of alcohol or who can be suspected of peddling and not least by the absence of commercial profitmaking interests. A well-functioning age control is a foundation of Systembolaget's activity. Systembolaget also has special responsibility for informing the public about the risks of alcohol consumption.

A HIGH LEVEL OF PUBLIC CONFIDENCE

The survival of the retail trade monopoly depends on the public's confidence in Systembolaget. Systembolaget's own surveys show that Systembolaget's retail trade monopoly is accepted and respected by a large part of the population. Confidence in Systembolaget in 2005 is at the highest level since 2001. 1)

The most important reason for Swedes wishing to keep Systembolaget is the company's social task. The social policy responsibility is also part of the activity that is expected to become even more important in the coming years. One example of this is what is referred to as the IQ initiative, the intention of which is to market successful alcohol-prevention projects that are arranged in businesses, schools, organisations and associations and thus inspire to similar activities around Sweden.

Through its over 400 stores, Systembolaget offers one of the world's broadest ranges consisting of a regular and occasional component. The regular range consists of around 2,000 items of wine, spirits and beer from some 40 countries. The occasional component includes seasonal products and temporary consignments and is renewed several times a year. Systembolaget's staff undergo continuous training to develop their knowledge of products and to be able to provide advice to customers. Systembolaget also receives a very high rating in the "Satisfied Customer" index (NKI)1). NKI shows, among other things, how well Systembolaget has succeeded in communicating its social responsibility.

The retail trade monopoly for alcoholic beverages was taken up in connection with negotiations on Swedish membership of the EU. The European Commission considered that all effects which are discriminatory between national and imported goods must be removed and, according to an agreement, certain conditions were laid down for the retail trade monopoly to be considered to operate in a non-discriminatory way. Among

other things, this concerned objective conditions for purchasing and sales, that the conditions should apply to citizens and products in the Community and that the conditions should be transparent. The Swedish Competition Authority exercises supervision over the retail trade monopoly with regard to its non-discriminatory mode of functioning and makes a report to the EU Commission twice a year.

COMPANIES WITH A SOLE RIGHT FROM AN EU PERSPECTIVE

In January 2006, the commission proposal "Gambling in a changing world" was presented to the government. This proposal is at present being considered by the Government Offices. Due to the European Court judgment in the Hanner case, a review was initiated of the Swedish pharmacy monopoly in the Retail Trade in Pharmaceutical Products Committee. The investigator is to submit recommendations in 2006 and 2007.

The design of the Swedish alcohol monopoly in relation to the provisions of the EC treaty on the free movement of goods and provisions for the state retail monopoly were considered by the European Court in the Franzén case. The European Court clarified that a Member State in certain circumstances may retain a state retail monopoly if this has been set up to promote a goal of public interest, such as the life and health of the citizens.

Individuals may import spirits, wine and strong beer to Sweden for their own or their family's use, provided that the import is made in person by travellers aged over 20. However, it is not permitted for an individual to import such beverages to Sweden for commercial purposes other than through the auspices of Systembolaget. The EU Commission has called into question whether the Swedish rules are compatible with the EU rules and has instituted a case against Sweden at the European Court (Swedish Competition Authority, Competition in Sweden 2005).

¹⁾ Systembolaget AB's year-end report 2005. Measurement of opinion index started in 2001.

Two groups of companies

The 55 (57) companies where the Swedish state is an owner are presented in two groups, companies operating on market conditions and companies with special societal interests.

State-owned companies can in principle be divided into two different groups: those operating under market conditions and those companies whose primary goal is to meet special societal interests. The owner, the state, makes market requirements for companies in the first group and the companies are assessed on the basis of these requirements. In the case of companies with special societal interests, value is primarily created in the usefulness of the companies for society. Assessment of these companies is more complex. All stateowned companies are assessed annually and presented on the respective company page (47 pp).

The ambition in this report is to make the accounting of the state's corporate participation and that of the individual companies as clear and readily accessible as possible. By dividing the companies into two different groups, the reporting of both the corporate sphere and the performance and goal fulfilment of the individual companies will be clearer and accordingly fairer.

The consolidated accounts include 49 wholly or partly state-owned companies. This report, which is a type of summary has been made without their being a parent company in

any real sense. The principles for the accounts and the categorisation of the companies are shown in the chapter on accounting principles on page 104.

In certain respects, the result shown here differs from that previously shown in the year-end report. This is because the consolidated income statements and balance sheets contain supplementary information that was not available when the year-end report was published.

COMPANIES OPERATING ON MARKET CONDITIONS

All companies in this group are to have relevant and clearly communicated financial targets based on market requirements for profitability. This means that companies are to have a reasonable financial risk through an appropriate capital structure and that the target for the return on invested capital shall exceed the estimated cost of capital taking into consideration the total risk in the company. The State normally has a determining influence in companies operating on market conditions. This facilitates the process for setting financial targets based on a dialogue between the owner and the company. The owner can also

set special targets within this framework for companies in this group. The owner, the board and the executive management shall together take responsibility for working towards these targets. More information about targets can be found on page 30–32.

COMPANIES WITH SPECIAL SOCIETAL INTERESTS

Special objectives are set for this group and the required returns can deviate from what is usual for businesses operating wholly under market conditions. The assessment and monitoring are based partly on qualitative parameters derived from socio-economic or sector policy objectives and efficiency or earning requirements. The requirements for cost effectiveness, etc. can be high, even though other objectives are of great importance. The degree of societal interest and the owner's control differ greatly between the various companies in this group. More information about that targets can be found on page 30–32.

Companies operating on market conditions

Companies operating on market conditions are characterised by one or both of the following criteria:

- ► The company operates in a fully competitive market.
- ► The owner, the state, makes market requirements for earnings, return and financial balance based on the company's risk profile.

The group consists of 31 companies. 27 companies with a total of 146,330 employees, of which 67,992 are abroad. In total, these companies account for 73 per cent of the total turnover and 91 per cent of the total net profit.

Companies with special societal interests

Companies with special societal interests are characterised by one or both of these criteria:

- ► The owner, the state, controls the activity in a tangible, direct way
- ► They operate on a market with special provisos.

Some of the group operate wholly or partly without competition, others are fully competitive. The group consists of 24 companies. 22 companies are consolidated with a total of 41,204 employees, of which 119 are abroad. In total the companies in this group account for 27 per cent of the total turnover and 9 per cent of the total net profit.

Follow-up and assessment

According to state ownership policy, the Government Offices has a mandate to actively monitor and administer the state's assets in order to achieve the best possible increase in value and – where appropriate – to comply with the special societal interests. This takes place by establishment, follow-up and assessment of financial targets, socio-economic goals and other special goals.

Depending on what the goals relate to, they are set by the board, the annual general meeting, by law or by government decision, or by agreement between the state and the company. The goals are regularly followed up and assessed in the course of current administration. Reports on the outcome compared with the set goals serve as the basis for decision for measures and changes in the company and possibly for amended goals. Since the financial targets are decided on by both the company and the owner, they are accordingly also communicated and followed up at both these levels. The owner does this in the "Annual Report on State-owned Companies" and the company in its annual report and internal follow-up.

FINANCIAL TARGETS

The purpose of the financial targets from the perspective of the owner is to:

- ➤ Secure the creation of value by the board and executive management working towards ambitious, long-term targets.
- ► Achieve efficient use of capital by clarifying the cost of capital.
- ► Keep the company's risk at a reasonable
- ► Assure the owner sustainable and predictable dividends taking into consideration the company's future capital requirements and financial position.
- ► Make possible and facilitate measurement, follow-up and assessment of the company's profitabilty, efficiency and risk level.

The financial targets are controlled, measured and valued mainly on the basis of:

- ► Profitability targets (for instance, return on equity)
- ► Capital structure (for instance, the equity/ assets ratio and the interest coverage ratio)
- ▶ Dividend targets (for instance, the share of net profit or equity)

The targets and definitions used in each particular company can vary. The difference depends, among other things, on the sector in which the company operates, the structure of its business activities, the company's financial situation and where the company is in the life cycle. In general, the company should endeavour to obtain a balance between the business

risk and the financial risk in the company. Together, these are to provide a reasonable total risk in the company:

- ➤ The higher the risk in the company, the higher the cost of capital. The higher the cost of capital, the higher the profitability target.
- ► The higher the operational risk, the higher proportion of equity required.
- ► The lower the growth in the company, the higher the dividend share can be.

In all companies, the owner and the company should take a position on the particular company's need of capital and capital structure. The company should be as efficiently capitalised as possible in order to be able to carry out its business activity, taking into consideration the company's operating risk. Consideration must also be taken to future capital requirements. A number of the state-owned companies with special societal interests lack loans, i.e. they are in principle wholly selffinanced. However, in this type of company too, a position must be taken on the total amount of equity the company should have in order to be able to engage in its activity as efficiently as possible. There is no reason for the owner/the state to have more capital tied up in the activity than is needed to achieve

Operating risk

Assessed by the level of return in a company and the variation in return from year to year.

Financial risk

Assessed by the capital structure and then primarily the share of equity.

the targets set. In the assessment of an appropriate capital structure, consideration must also be taken to the ability of the owner to provide additional capital.

In order for the capital in a company to be used as efficiently as possible, the owner must calculate the cost of capital. The cost of capital provides a motivation for the company to

¹⁾See respective company page for more detailed information about the companies' financial targets and special goals (47 pp).

²⁾ New company from 1 January 2006.

³⁾ SEKm.

strive to use capital efficiently and, on the basis of limited resources, to make priorities for the company's capital, for instance, with regard to investments. The cost of capital must at least correspond to the risk-free interest rate. Otherwise the company will not have any incentive to finance its activity in any other way than the owner's capital, i.e. borrowed capital. The cost of equity must exceed the risk-free interest rate by a sufficiently large amount to correspond to the risk in the company and to strive to create the right financial signals in the activity.

The financial targets must be decided upon at the annual general meeting. The targets should be revised when lasting changes take place, for instance, if profitability in a particular sector decreases in the long-term or there is a long-term change in interest rates.

Companies operating under market conditions

The companies operating under market conditions are to have the same prerequisites and to be subject to the same requirements on

their business activities as other players in the market. This guarantees long-term competitiveness, the increase in value and efficient use of capital. Moreover, the risk for distorting competition is minimised. For these reasons, the establishment and follow-up of financial targets for companies operating under market conditions is a fundamental part of corporate governance.

Companies with special societal interests

Socio-economic objectives are set for companies with special societal interests and the requirements for financial targets can accordingly deviate from what is customary in business activities that take place wholly on market conditions. These companies instead often strive to achieve the most efficient use of capital and to create the greatest possible benefit to society.

A number of the state-owned companies with special societal interests have a goal conflict between the financial targets and the targets for special societal interests. For

instance, there may be requirements that an activity is to have a particular geographical presence throughout Sweden despite it not being wholly justified on commercial grounds. Setting financial targets makes these conflicts clear and the owner and the executive management can more easily make priorities. The owner and the company should thus set financial targets in order to measure the efficiency of the company as a complement to the socioeconomic goals.

SOCIO-ECONOMIC AND SPECIAL GOALS IN STATE-OWNED COMPANIES

The socio-economic goals can vary considerably among the different companies. The goals can be provided for by law, although they can also be established in government decisions or by agreement between the company and the state. Assessment and follow-up are based, among other things, on:

 quantitative parameters derived from socio-economic or sector policy goals and
 efficiency/performance requirements.
 Requirements on, for instance, cost-effectiveness can be set at a high level even if other goals are very important.

In order to measure the efficiency of a company, measures can be used that relate the different cost items (for instance, costs of personnel and premises) to one another or to the company's income. Operational, productivity and/or cost measures can be used that relate income or costs to the number of employees, appropriations (if any) or other measures derived from socio-economic or sector policy goals (for instance, the number of employees with vocational disabilities in Samhall). In the cases where the outcomes cannot be compared with other companies, a comparison is made between years and the goals set.

As regards the special goals, an important part of the state ownership policy is that the state-owned companies have a well-considered strategy for managing and informing about environmental consideration, social issues, human rights, gender equality, diversity, ethics and non-financial risks, what is known as sustainability information. The companies should, in relevant cases, set special goals, have a policy, and actively drive, follow up and report back on the company's contributions to these issues.

See the respective company page for a more detailed description and definition of the different targets (47 pp).

Continued sharp improvement in earnings

2005 was characterised by substantial improvements in earnings; aggregate net profit for the state-owned companies amounted to SEK 52.0 (30.6) billion, an increase in profit totalling 70 per cent compared with 2004. The result reinforces what was already a positive development; in the past two years the state-owned companies have shown improvements in earnings of more than 130 per cent.

The Swedish economy continued to develop positively in 2005 with an increase in GDP of 2.7 (3.5) per cent. The strong increase in the level of economic activity was also reflected in prices on the Stockholm Stock Exchange where Affärsvärlden's general index increased by a total of 33 (17) per cent in 2005. At the same time as many as 76 (66) per cent of the Swedish listed companies were able to report profits for the 2005 financial year.

INCREASED AGGREGATE TURNOVER

The development of the state-owned companies continued to be positive in 2005; total turnover increased by 8 per cent during the year to a total of SEK 311.3 (287.6) billion. Vattenfall and LKAB increased their turnover by SEK 15.8 and SEK 5.3 billion respectively, accounting for 89 per cent of the aggregate increase in turnover. Apoteket, SEK, SP, Swedcarrier, Systembolaget, Teracom and V&S Vin & Sprit increased their turnover by a total of SEK 4.2 billion during the year. Sam-

hall, SBAB, Sveaskog, Svenska Spel and Venantius were among the companies whose turnover decreased in 2005 compared to 2004.

The positive development for the state-owned companies in 2005 is also reflected in the profit. 42 (41) of the state-owned companies reported net profits for 2005. 27 state-owned companies were able to report improved or unchanged profit before tax corresponding to SEK 27.4 billion and 22 companies reported a deterioration in profit before tax corresponding to SEK 1.7 billion compared with 2004.

INCREASE IN PROFITS OF 70 PER CENT

The aggregate net profit for the state-owned companies amounted in 2005 to SEK 52.0 (30.6) billion, which is equivalent to an improvement in earnings of 70 per cent. The aggregate improvement in earnings can largely be attributed to Vattenfall, Akademiska Hus, LKAB and Vasakronan which reported substantial increases in earnings during 2005.

Vattenfall's net increase in profit in 2005

alone entails an improvement in earnings totalling SEK 10.9 billion at the same time as Akademiska Hus and LKAB increased earnings sharply during the year by SEK 5.7 and SEK 3.0 respectively. The favourable development in earnings for, among others, Green Cargo, SAS, SJ, Systembolaget, Vasakronan and V&S Vin & Sprit contributed to the improved net profit.

The trend from last year when a number of companies succeeded in moving from loss into profit has continued in 2005. This year SAS, Dramaten and VisitSweden have moved from loss into profit. Among the companies that have reported a deterioration in their result compared to 2004 are SEK, Sveaskog, the Swedish Space Corporation, SVEDAB, Svenska Spel, TeliaSonera and Venantius.

REDUCED CASH FLOW

Looking at all of the state-owned companies, the cash flow from operating activities amounted to SEK-1.4 (34.1) billion for 2005, a reduc-

tion of as much as 104 per cent. The company which accounts for the largest part of the deterioration is SEK, which has reduced its cash flow from operating activities by SEK 39.5billion. Excluding companies from the financial sector, the cash flow improved by 14 per cent to SEK 46.4 (40.7) billion, however. Vattenfall's cash flow from operating activities amounted to SEK 24,423 (24,103) million. Excluding companies in the financial sector, ALMI, Dramaten, Lernia, LKAB, SJ, SVEDAB, Swedcarrier, SweRoad, Systembolaget and Vasakronan reported sharply improved cash flows from operating activities. ALMI, Lernia, SJ, SVEDAB and SweRoad moved from a negative to a positive cash flow.

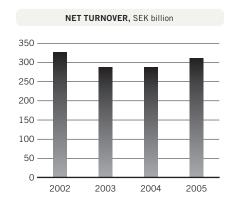

CONTINUED INCREASE IN INVESTMENTS

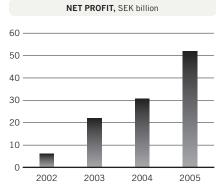

In 2005, investments increased for the second consecutive year. Gross investments amounted to SEK 39.6 (26.0) billion, an increase totalling 52 per cent. It was primarily Vattenfall and LKAB that contributed to the increased investment level, although Vin & Sprit and SJ also increased their investments. Among the companies that reduced their investments with 2004 can be mentioned Statens Väg- och Baninvest and Specialfastigheter.

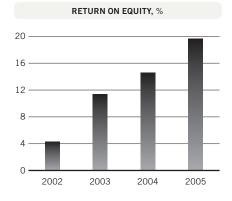

INCREASED DIVIDENDS

Dividends from the state-owned companies, which provide a substantial contribution to the state budget, are expected to amount to SEK 26.5 (17.4) billion for the 2005 financial year. This is an increase of 53 per cent compared with last year. TeliaSonera, Venantius, LKAB, Nordea, Akademiska Hus and Systembolaget in particular have increased their dividends. In all, 24 (21) of the state-owned companies have paid dividends for the 2005 financial year.

Companies operating under market conditions

Strong increase in earnings and increased investment levels

During 2005, the group of companies operating under market conditions continued to show a strong increase in earnings; the aggregate increase in net profit for the companies amounted to as much as 85 per cent for the full year. At the same time, continued increases in investments were noted among the companies as well as additional increases in dividends.

In all, net turnover increased for companies operating under market conditions by 11 per cent in 2005 to SEK 225.7 (202.7) billion. Net profit increased during the same period by 85 per cent to SEK 47.1 (25.4) billion. Shareholders' equity increased to SEK 267.6 (239.8) billion and return on equity increased from 12.7 per cent to 18.9 per cent.

VATTENFALL AND LKAB STRONG CONTRI-**BUTION TO INCREASE IN TURNOVER**

The total turnover for companies operating under market conditions increased during the year to SEK 225,737 (202,719) million. Vattenfall and LKAB increased their turnover by SEK 15,792 million and SEK 5,349 million respectively and accounted for 89 per cent of the total increase in turnover in the group of companies operating on market conditions. SEK, Swedcarrier, Teracom and V&S Vin & Sprit also increased their turnover considerably by a total of SEK 2,352 million. 18 (18) companies accounted for turnover figures totalling over SEK 500 million in 2005. All of the five companies that had the greatest turnover in this group also increased their turnover in 2005.

LKAB accounted for the greatest increase in turnover. In 2005, the company increased its turnover by 60 per cent and by 92 per cent during the period 2003-2005 from SEK 7,466 million to SEK 14,337 million. During the corresponding period, Vattenfall has also increased its turnover by 28 per cent to SEK 129,158 million, an increase which can primarily be explained by a successful integration process of the acquisitions in Germany and Poland and favourable market conditions.

CONSIDERABLE IMPROVEMENT IN EARNINGS FOR AKADEMISKA HUS

In the group of companies operating under market conditions, 25 of the companies reported a net profit, the absolute majority of which at the same time showed extensive improvements in earnings. Of the total of 27 companies, 16 companies reported improved net

profit totalling SEK 27,058 million while 11 companies reported a deterioration in earnings totalling SEK 1,141 million.

The continued favourable development of earnings can be largely attributed to three companies, Vattenfall, Akademiska Hus and LKAB which all reported substantial improvements in earnings in 2005. Vattenfall's increase in net profit in 2005 alone entailed an improvement in earnings totalling SEK 11.7 billion at the same time as Akademiska Hus and LKAB increased their net profit sharply during the year by SEK 7.9 and 4.4 billion respectively. The favourable increase in earnings for among others Green Cargo, Lernia, Vasakronan, SAS, SJ and V&S Vin & Sprit contributed to the improvement in earnings.

The Swedish Space Corporation, SEK, Sveaskog, TeliaSonera and Venantius accounted for the larger part of the deterioration in earnings by a total of SEK –1 037 million. However, SAS has succeeded in moving from loss into profit in 2005. All of the companies with a turnover of over SEK 500 million in 2005 thus reported positive results

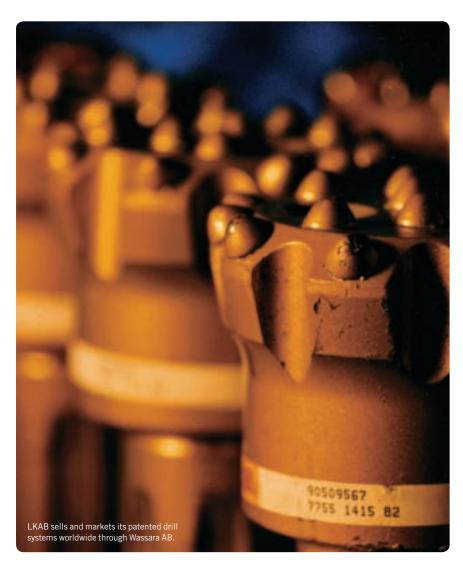

SUBSTANTIAL INCREASE IN INVESTMENT

Gross investments in companies operating under market conditions increased for the second consecutive year. Gross investments increased by over 71 per cent compared with 2004 and totalled 34.8 (20.3) billion. This increase consists mainly of large investments in Vattenfall and LKAB, but also V&S Vin & Sprit and SJ could note increased investments.

INCREASED INVESTMENTS FOR CAPACITY EXPANSION AND ACQUISITIONS

LKAB's gross investments increased by 168 per cent to SEK 2.7 (1.0) billion, which largely consisted of investments in the new pellets plant in Malmberget.

Vattenfall's gross investments increased by 92 per cent to SEK 24.5 (12.7) billion. SEK 10.0 (8.4) billion of these were replacement investments in facilities and SEK 14.4 (4.3) billion growth investment and shares. Around SEK 10.4 billion of the share investments consisted of the acquisition of 35.3 per cent of the shares in Elsam, which, according to an agreement in principle with the Danish Dong will be exchanged for around 24 per cent of the combined production capacity of Elsam and the company E2. With this agreement, Vattenfall has around 21 per cent of the Danish electricity production and around 25 per cent of the heating production from com-

bined heating and power plants. The EU competition authority approved Vattenfall' part of the transaction on 23 December 2005 and Dong's part on 14 March 2006.

V&S Vin & Sprit's gross investments increased by 332 per cent to SEK 1.2 (0.2) billion, consisting mainly of shares in Cruzan International Inc. and capacity and environmental investments in Åhus. Among the other companies that increased their investment in 2005 are SJ which, among other things, invested in refurbishment of the X 2000 fleet and new regional trains — double-deckers and Posten (Sweden Post) which made large investments in machinery and sorting equipment for adaptation of the Swedish terminal network.

REDUCED INVESTMENT IN TELIASONERA AND SAS

TeliaSonera's gross investments decreased in 2005 to SEK 14.3 (19.4) billion, which is primarily explained by major strategic investments being made in 2004.

SAS also reduced its investments during the year. Gross investments amounted to SEK 1.8 (3.9) billion. The reduction from 2004 to 2005 is mainly due to reduced investments in aircraft and other aviation material.

STRONG INCREASE IN DIVIDENDS

Dividends from companies operating under market conditions are expected to total SEK 21.6 (12.4) billion for the 2005 financial year, which is an increase of 74 per cent.

The three companies paying the largest dividends account for 74 (76) per cent of the aggregate dividends. The change is primarily noticeable in dividends from TeliaSonera and Venantius, which are components of the companies' work to restore capital to the owners. TeliaSonera has almost tripled its dividends from SEK 2.5 billion to SEK 7.1 billion. Venantius has also paid a very large dividend amounting to SEK 3.0 (0.6) billion. LKAB and Nordea are also among the companies operating on market conditions that have increased their dividends substantially. More information about the companies' dividend policy can be found on the respective company presentation page (page 47 pp).

¹⁾ The summary shows companies whose gross investment exceeds SEK 100 million. The investments of associated companies are not included in the consolidation.

Companies with special societal interests

Stable turnover levels although decreased profits

The group of companies with special societal interests achieved an aggregate turnover in 2005 on a level with 2004. At the same time, a small reduction in net profit for the same period can be noted; the companies reported an aggregate net profit of SEK 4.9 (5.2) billion for 2005.

In all, net turnover for companies with special societal interests increased by 0.8 per cent in 2005 and totalled SEK 85.6 (84.9) billion. Net profit decreased by 5 per cent during the same period to SEK 4.9 (5.2) billion. Shareholders' equity decreased to SEK 16.8 (17.0) billion and return on equity amounted to 29.9 (32.9) per cent.

INCREASE IN TURNOVER FOR APOTEKET AND SYSTEMBOLAGET

2005 entailed a marginal increase in turnover for companies with special societal interests; the total turnover for companies with special societal interests increased by 0.8 per cent to SEK 85,561 (84,920) million. Apoteket, SP and Systembolaget increased their turnover by SEK 1,841 million while Samhall, Statens Väg- och Baninvest, Svenska Spel and Swedfund¹¹ decreased their turnover. In 2005, 9 (9) of the companies reported a turnover exceeding SEK 500 million and only half of the companies increased their turnover.

This year's result for the group of companies with special societal interests entailed an aggregate decrease in earnings of 4.6 per cent. The largest improvement in earnings was accounted for by Bostadsgaranti, Dramaten, Samhall, SP, Systembolaget and VisitSweden while Operan, SVEDAB, Svenska Spel and Swedfund¹⁾ accounted for the largest decrease in earnings. Svenska Spel accounted for 93 per cent of net profit in this group.

DRAMATEN MOVED INTO PROFIT

Of the companies with special societal interests, 11 reported an improved or unchanged profit before tax equivalent to SEK 366 million and 11 companies a deterioration in earnings equivalent to SEK -561 million. In all, 17 (16) companies reported a net profit and 5 (6) companies a net loss in 2005. During the year Dramaten and VisitSweden have succeeded in moving from loss into profit.

REDUCED GROSS INVESTMENTS

After having increased in 2004, investments again decreased in 2005 for companies with special societal interests. In all, gross investments were SEK 4.7 (5.7) billion, a reduction of 20 per cent compared with 2004.

Most companies reduced their investments. The greatest impact is from Statens Väg- och Baninvest which decreased their investments

 $^{^{\}rm 1)}$ The table shows companies with a turnover exceeding SEK 500 million.

¹⁾ Swedfund's business activity mainly consisted of risk capital commitment, which means that the turnover and earnings can fluctuate.

by 18 per cent to SEK 3.2 (3.9) billion. However, Svenska Spel increased its investments marginally to SEK 492 (462) million.

SVENSKA SPEL'S DIVIDEND PREDOMINANT

The aggregate dividends from the group of companies with special societal interests were SEK $5.0\,(5.0)$ billion. Svenska Spel is exempt from tax and distributes the whole of its earnings. One part is paid as grants to the National Sports Confederation and the National Board for Youth Affairs, the other part is paid to the state. Svenska Spel's dividend corresponds to 92 per cent of the total dividends in this group.

In all, Svenska Spel's dividend for the 2005 financial year totalled SEK 4.6 (4.8) billion. Among the companies with special societal interests which have increased their dividend can be mentioned Systembolaget. The dividend policy of the companies is described in more detail in the respective company's presentation page (page 47 pp).

 $^{^{\}rm 1)} The summary shows companies with gross investments exceeding SEK 100 million.$

Strong year on the stock exchange with even development

During 2005, the market value of the state portfolio increased by over 8.5 per cent to a total value of SEK 134 billion at the end of the year. This makes the Swedish state the largest single owner on the Stockholm Stock Exchange.

The development of Stockholmsbörsen during 2005 can be summarised as being very good. Prices developed positively in every quarter, which entailed an even and strong increase in prices over the year. Although Affärsvärlden's general index increased by almost 6 per cent during the first quarter of the year, it was during the final two quarters of 2005 that the development of prices on the Stockholm Stock Exchange really accelerated.

POSITIVE DEVELOPMENT ON THE STOCK EXCHANGE FOR THE THIRD CONSECUTIVE YEAR

The very strong finish to the stock exchange year meant that the general index increased by a total of 33 per cent. This can be compared with 2004 when the general index increased by 17 per cent. The Stockholm Stock Exchange's share price development during 2005 also meant that long-term positive trend continued; this was the third consecutive year that the

value on the Stockholm Stock Exchange increased. During 2005, the market value of the state shareholding increased by over 8.5 per cent which is a poorer development than for the stock exchange as a whole. The cause of this is primarily the development of TeliaSonera' share price which did not exceed an increase of 7 per cent for 2005. This has a relatively large impact in the development of the state shareholding since TeliaSonera accounts for around 65 per cent of the state's total share portfolio.

OMX AND SAS INCREASED

The share price for OMX developed in principle on a level with the stock exchange's overall positive price development during 2005. The increase in value for the OMX share was 30 per cent for the whole year, which can be compared with the decrease in value of 5 per cent that took place in 2004.

The SAS share which decreased by a total of 12 per cent in 2004, also accounted for a sub-

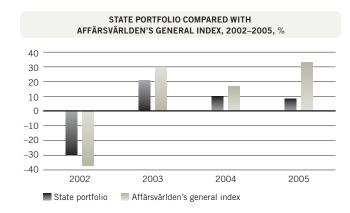

stantial recovery during 2005. The airline's share price increased by a full 74 per cent, an increase which is markedly above the general development of the stock exchange for 2005.

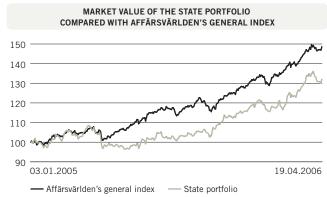

Nordea's share price continued the increase in value that started at the turn of the year 2002/2003. The strong increase in value from 2004 of 24 per cent was accompanied during 2005 by an increase in share price totalling 23 per cent. At the beginning of the year, the Swedish state sold shares in Nordea Bank for SEK 1.8 billion. Due to Nordea at the same time, carrying out its repurchase programme in the market, this has no effect on the state's share of ownership. During autumn 2005, Nordea implemented an additional repurchase programme in the market, which led to the state's ownership share increasing to 19.9 (19.5) per cent of the outstanding shares.

From the turn of the year until 19 April, the value of the state portfolio increased by 11 per cent at the same time as the general index increased during the same period by 13 per cent.

- 11 The Swedish state has sold shares in Nordea during the spring and participated in the repurchase programme in the autumn of 2005.
- ²⁾ The Swedish state has participated in the redemption programme in the spring of 2005. The transaction amounted to a total of around SEK 4.66 billion.

An important employer with a lot of employees

The state-owned companies have a large number of employees throughout Sweden and abroad in their various business activities. As employers, the companies make important contributions to growth and employment and the companies contribute in this way to the development of the business sector in the whole of Sweden.

In all, the number of employees in state-owned companies (including associated companies) totalled 187,520 (189,139) of which 63 (64) per cent were employees in Sweden. Of the total number of employees 40 (41) per cent were women and 60 (59) per cent men. 5 (5) companies, Posten, Vattenfall, SAS, Telia-Sonera and Samhall had over 20,000 employees. In all, 20 (20) companies had more than 500 employees and 16 (16) companies more than 1,000 employees.

LERNIA AND LKAB EMPLOYED MORE

Overall, the average number of employees (including associated companies) in the group of companies operating under market conditions was 146,316 (147,259) of which 53 (54) per cent were employed in Sweden. Of the total average number of employees, 36 (36) per cent were women and 64 (64) per cent

men. 4 (4) companies, Posten, Vattenfall, SAS and TeliaSonera had more than 20,000 employees. Altogether 12 (12) companies have more than 500 employees and 11 (11) companies more than 1,000 employees. Posten, Vattenfall, Green Cargo, SJ and SAS have reduced the average number of employees by a total of 3,408. TeliaSonera, Lernia, Swedcarrier and LKAB have increased the average number of employees by a total of 2,435. Among the companies that have increased the average number of employees in Sweden, Lernia and Vattenfall can be noted which have increased by 230 and 158 persons respectively.

SAMHALL CONTINUES TO BE AN IMPORTANT EMPLOYER

The total number of average employees (including associated companies) in the group of companies with special societal interests was

41,204 (41,880) of which 99.7 (99.7) per cent were employees in Sweden. Of the total average number of employees 56 (55) per cent were women and 44 (45) per cent men. 1 (1) company, Samhall had over 20,000 employees. A total of 8 (8) companies had more than 500 employees and 5 (5) companies had more than 1,000 employees. Samhall and Systembolaget have reduced the average number of employees by a total of 986 employees. Among the companies that have increased the average number of employees in Sweden can be noted IRECO Holding and SP Sveriges Provningsoch Forskningsinstitut which have increased the average number of employees in Sweden by 214 and 83 persons respectively.

and uniformity throughout the country. Several of the companies, for instance ALMI Företagspartner, Apoteket, Lernia, Posten, Samhall, Sveaskog, Svensk Bilprovning and Systembolaget are active in every county. Compared with an average of total employees in Sweden, the state-owned companies are over-represented in Norrbotten. In most cases, the business activities of the companies are of such a kind, as, for instance, LKAB and the Swedish Space Corporation, that they are situated in places where production assets and competence are located. In this way, the state-owned companies serve as an important foundation for business activity in all parts of Sweden.

The Government takes a very positive view of the state-owned companies being represented throughout Sweden. In this way, the state-owned companies contribute naturally to increased competitiveness, sustainable growth and employment throughout the country. In the light of this, it is therefore important that state-owned companies take into account the importance of their activities in a regional perspective within the framework of the respective company's market conditions.

Many of the state-owned companies have

been operating for a long time in wholly competitive markets abroad. Others have as a result of deregulation driven by technical and market developments gone in recent years from being monopolies to wholly competitive companies. These companies work on a completely competitive basis.

If companies are mandated to meet special societal interests, this is stated in their articles of association or by special sector legislation or other decisions by the Riksdag. In such cases, there are ancillary licensing conditions or agreements, where it is evident if a particular company, for instance, has a service obligation that covers the whole country. Examples of companies with a service obligation of this kind are Apoteket, Posten, Svensk Bilprovning and Systembolaget.

INCREASE IN EMPLOYEES ABROAD

The average number of employees in state-owned companies abroad increased to 69,052 (68,102), which is equivalent to 37 (36) per cent of the total number of employees. Eight companies have more than half of their employees abroad. SAS has 79 (77) per cent, Vattenfall has 74 (75) per cent, TeliaSonera

has 60 (57) per cent and V&S Vin & Sprit has 67 (68) per cent of their employees outside Sweden. Sales abroad amounted to SEK 166,028 (139,915) million. Vattenfall and TeliaSonera accounted together for 85 (85) per cent of the sales abroad.

A-Banan Projekt AB

A-Banan Projekt AB (A-Banan) was created to carry out the construction, operation and financing of the Arlandabanan railway line, which is a jointly financed project with the private business sector. Arlandabanan links Stockholm-Arlanda airport with the national railway network managed by the National Rail Administration. The project also includes procuring rolling stock and maintaining air shuttle services between Stockholm Central and Stockholm-Arlanda airport. Among other things, the Arlandabanan is intended to create the conditions for an integration of the local, regional and national railway traffic with the airline operations at Stockholm-Arlanda airport.

OPERATIONS

A-Banan owns and manages Arlandabanan. A-Banan is furthermore responsible for the state's rights and obligations in the project and is to strive for integrated and efficient services by Arlandabanan and to work together with the airport authority to achieve an attractive transport solution for trains and aircraft at Stockholm-Arlanda airport. A-Banan supervises the operation of the railway facility, air shuttle services and other train services on the Arlandabanan. Furthermore, A-Banan informs the National Debt Office, which is responsible for the state conditional loan in the project, about circumstances that have come to A-Banan's knowledge that may affect repayment of this loan. A-Train AB operates the air shuttle services and is responsible for operation and maintenance of the Arlandabanan and A-Banan's facilities at Stockholm Central on behalf of A-Banan. The airport shuttle services are operated under the name of Arlanda Express.

The new Railway Act that came into force on 1 July 2004 can disturb A-Banan's rights and obligations in the project. A-Banan has therefore applied to the Swedish Rail Agency for consent as a main infrastructure administrator of its railway network pursuant to the Railway Act. Discussions are furthermore taking place with A-Train on how the law is to be applied in accordance with the agreements entered in the project.

A-Banan is working together with the responsible authorities to establish commuter services to Stockholm-Arlanda airport. It is intended to start services in August 2006. Work is in progress to secure A-Banan's rights at Stockholm Central by an easement associated with a property owned by A-Banan, which is in the vicinity of the Central Station.

The conditions for financing the project are being discussed with A-Train AB.

DIVIDEND POLICY

There is no dividend policy since the company has no dividend requirements from the owner.

ASSESSMENT

Arlanda Express is a much appreciated service by travellers and the air shuttle services have been operated at a high level of reliability and good standard during the year. Arlanda Express's market share has continued to increase. SJ's services to the airport have also developed very positively. In accordance with the intentions of the Riksdag, the regional and local railway services will also serve Stockholm-Arlanda airport. A-Banan's role will be significantly changed unless A-Banan's position can be secured within the framework of the new Railway Act.

AKADEMISKA HUS

Akademiska Hus AB was created in 1992 in connection with the reorganisation of the National Board of Public Building. The main task of Akademiska Hus AB is to offer Swedish universities and other institutions of higher education purpose-built and sound premises for education and research. The company is also responsible as manager for maintaining the substantial financial and cultural value of the properties. The company is Sweden's largest property company with 90 per cent of its tenants in the public sector.

OPERATIONS

Akademiska Hus AB is the landlord for around 60 per cent of the premises used by universities and other institutions of higher education. There are also some other tenants, central government agencies and institutions and foundations, which are, in most cases, located on campuses and engaged in research-related work. The company invests solely for its own management and ownership of the properties. Operations take place throughout Sweden, from Lund in the south to Kiruna in the north.

FINANCES

In 2005, rental income totalled SEK 4,481 (4,482) million. Profit before tax was SEK 9,270 (1,324) million. At the turn of the year, the lettable area was 3.28 (3.31) million sq.m. and the vacancy ratio was 3.2 (2.8) per cent. In 2005, net investment was SEK 469 (1,866) million, mainly new and construction and refurbishment of properties. The average remaining term of the leases was 6.5 years.

The assessed market value of the company's properties was estimated at SEK 7.2 billion over the level at the beginning of 2004. This is equivalent to an increase in value of 19 per cent. This was accordingly the main explanation for the substantial improvement of earnings of SEK 7.9 billion.

OBJECTIVE

The activities of Akademiska Hus are governed by objectives in four areas: customer benefit, profitability, satisfied staff and reduced impact on the environment. Customer benefit is measured, among other ways, by the Customer Satisfaction Index (NKI). Among other things, this index measures image, service, adaptation, fault reporting and premises. Staff satisfaction is measured by a staff survey in accordance with the Staff Satisfaction Index (NMI). The company's profitability target is for the return on average shareholders' equity to correspond to the five-year government bond rate plus 4 percentage points over a business cycle and for the equity/assets ratio to be $35\,\mathrm{per}\,\mathrm{cent}$. The environmental objectives, where sustainable use of energy is most important, have been set for the year and as a long-term objective.

DIVIDEND POLICY

The Group's dividend target is that 2.5 per cent of the shareholders' equity should be distributed to the owner. Consideration should be taken to the company's capital structure and capital requirements when making decisions on dividends.

ASSESSMENT

In 2005, Akademiska Hus's NKI index was 75 according to the Fastighetsbarometern, which is a good outcome compared with the average for the property sector of 71. NMI was measured at 66, which is also a good outcome. The company's equity/ assets ratio was 44.8 (41.1) per cent at the end of 2005. Return on equity was 34.2 (7.9) per cent. It was decided to pay a dividend of SEK 660 million, which is SEK 100 million more than the target. The financial targets were accordingly achieved. The Group's use of energy decreased slightly in 2005 compared with 2004. Akademiska Hus (and the company's technical director) has received an award, Stora Energipriset, in 2005 for renewal with a high level of energy awareness.

Environmental management system ISO 14001 Reports in compliance with IFRS YES

Board of directors and auditors 2005/2006 | Chair: Claes Ljungh. | Members: Charlotte Axelsson, Sigbritt Franke, Marianne Förander, Per Granath, Birgitta Kantola and Maj-Charlotte Wallin. (Birgitta Kantola resigned and Göran Wendel was elected at the annual general meeting in 2006.) | Employee representatives: Sveinn Jonsson and Parzin Seradji. | Auditors: Peter Gustafsson, Deloitte AB and Jonas Hellström, Swedish National Audit Office.

The fee to the chairman of the board is SEK 152,000 (147,000) in 2006. Fees to the board members elected at the annual general meeting amounts to SEK 75,000 (73,000) in 2006.

ALMI Företagspartner AB is owned by the state and is the parent company of a group with 21 regional subsidiaries in which the parent company owns 51 per cent. Other owners are the county councils, regional self-government bodies and municipal cooperation bodies. ALMI's task is to promote the development of competitive small and medium-sized companies and to stimulate new entrepreneurship with a view to creating growth and renewal in the Swedish business sector.

OPERATIONS

The operations cover the whole process from idea to profitable company and take place in three business areas: Innovation, New companies and Established companies. The services offered are financing and advice. ALMI offers loans to new and established companies, in particular adapted financing forms to innovators and mini loans. ALMI is an alternative when other lenders are unwilling to do so. The provision of credit takes place in collaboration with other lenders and the banks are an important partner. Advice is provided individually or in groups and may take place on one occasion or extend over a longer period. There is specially adapted advice for innovators and new companies. For established companies, advice is mainly concentrated to the areas management, market development, shift of ownership, internationalisation and profitability control.

FINANCES

ALMI's parent company receives operating grants from the state. The subsidiaries in turn receive operating grants from the parent company and the regional owners in proportion to ownership.

The operating grant from the state amounted to SEK 55 million in 2005. Grants from the parent company to the regional companies totalled SEK 144.7 million. Operating grants from the minority owners in the regional companies totalled SEK 134.5 million. The regional companies also receive some compensation from external clients. The group's result before minority interests

was SEK -23.3 million. The parent company's result was SEK -15.8 million. The loss that has arisen will be taken from shareholders' equity. The return on borrowed funds after loan losses was 3 per cent. The risks are to be balanced in such a way that ALMI can maintain the capital in the loan fund nominally intact in the long-term.

OBJECTIVE

ALMI's objective is for more innovative ideas to be successfully commercialised, for more viable companies to be established and develop and for more companies to increase their competitiveness and profitability.

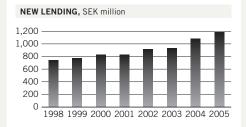

DIVIDEND POLICY

There is no dividend policy since the company does not have any dividend requirements from the owner.

ASSESSMENT

New lending continued to increase and totalled SEK 1,182 million, of which 861 established companies borrowed SEK 553 million, 1,786 new companies borrowed SEK 579 million and 264 loans were provided to innovators totalling SEK 50 million. During the year 360 innovations were commercialised, 3,300 new companies started with the aid of ALMI and a total of 4,880 indepth advisory commissions were carried out in different companies. Furthermore, a large number of short advisory sessions took place within the business areas Innovation and New companies. The effect in ALMI's client companies is measured annually by Statistics Sweden. The survey for 2005 shows that the companies that became customers in 2001 increased the number of their employees by 3,000 in the following threeyear period. Turnover increased by over SEK 8 billion or an average of SEK 2 million per company. The years 2001–2003 were characterised by generally low growth. In a comparable control group assembled by Statistics Sweden, the number of employees instead decreased by 4,000 persons and turnover by 1 per cent.

Apoteket

Under section 4 of the Act (1996:1552) on Trade with Pharmaceutical Products, Apoteket AB has the sole right to sell pharmaceutical products to the general public. Apoteket is to meet the need for pharmaceutical products throughout Sweden and is obliged to supply all pharmaceutical products approved for the Swedish market at uniform prices.

OPERATIONS

Apoteket AB's main task is to sell pharmaceutical products to the public in Sweden. Sales mainly take place through 900 outpatient pharmacies. With a view to ensuring the provision of pharmaceutical products in sparsely-populated areas, Apoteket has a contract with around 850 pharmacy agents. The agents are responsible for providing prescribed pharmaceutical products and selling a limited range of off-prescription pharmaceutical products.

Apoteket's task also includes providing producer-independent information and advice to individual consumers and providing producer-independent information to those prescribing drugs.

With a view to complying with the judgment of the European Court of Justice in the Hanner case, the Government made a number of adaptations in 2005 in the agreement between the state and Apoteket.

An interim report was submitted to the Government in February 2006 on the issue of whether other actors apart from Apoteket should be entitled to sell nicotine replacement therapy products to consumers. The report will be circulated for comment during the spring of 2006.

FINANCES

The net turnover of the business increased by SEK 1,352 million, or 4 per cent, to SEK 35,444 (34,092) million. The sale of pharmaceutical products on prescription was largely unchanged in 2005, both as regards volumes and turnover. Profit after net financial items was SEK 290 (282) million. The positive result has been achieved due to good sales during the second half of 2005,

a reduced cost development in the last quarter and intensive efficiency improvement and productivity work.

OBJECTIVE

The Government's instructions to Apoteket to engage in retail trading with pharmaceutical products with exclusive right mean that the company is to work for rational use of these products throughout the country. The national provision assignment also includes striving continuously for improved access through supplementary channels. The financial targets are laid down in the owner directive:

- The return after tax on adjusted equity is to correspond to the ten-year bond rate with a supplement of three percentage points.
- 2. The equity/assets ratio in Apoteket AB should be approximately 21 per cent.

DIVIDEND POLICY

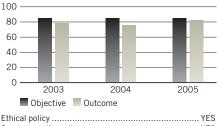

According to the owner directive, dividend should, on condition that the dividend rules in the Companies Act allow it, total an amount corresponding to a third of the profit after tax taking into consideration the target for the equity/assets ratio.

ASSESSMENT

Apoteket AB is considered to have complied with the tasks set by the Government in a satisfactory way. The targets for profitability and the equity/assets ratio have been exceeded. Dividend amounted to SEK 70 million which corresponds to 35 per cent of net profit. The company has a good rating in measurements on knowledge of and attitude to the company. Patient safety in the company's operations is very high. The proportion of incorrect prescriptions in 2005 was 0.2 per mille of the approximately 62.7 million prescription items dealt with. Accessibility, both geographical and in terms of opening hours and reduced waiting times, is continuously improving. In 2005, ten new pharmacies opened, of which five were Apoteket shops. The total opening hours increased by almost 40,000 hours in 2005.

AB BOSTADS

GARANTI

AB Bostadsgaranti provides insurance and guarantees that, among other things, provide purchasers of tenant-owned housing in newly built tenant-owner associations with increased security. The company was established in 1962 from the then Svenska Byggnadsentreprenörföreningen. In 1976, a ten-year guarantee was introduced for purchases of newly-produced houses. This guarantee was made into condition for government grants in (subsequently interest subsidies) for owner-occupied and tenantowned houses. In the same year, the state acquired a half of the shares in the company. The Riksdag justified this decision by it being reasonable that the state acquired influence over the activity in the light of the company's strong position. This formal link between the subsidy system and the guarantee activity has successively been reduced. The state's continued ownership of share of the company is now primarily based on consumer protection interests.

OPERATIONS

AB Bostadsgaranti and its wholly-owned subsidiary Försäkringsaktiebolaget Bostadsgaranti offer guarantees, warranties and insurance products with a focus on the construction and housing sector. At Försäkrings AB Bostadsgaranti, customers can take out a production guarantee, liability, commitment and construction fault insurance while the parent company offers deposit and advance guarantees for tenantowned housing projects. The parent company also has an extensive programme of courses within the sphere of tenant-owned housing. In recent years, housing production has increased and the market for production guarantee, liability, commitment and construction fault insurance has increased due to changed legal requirements, in particular with regard to consumer protection in house building. The operations of the parent company with warranties in accordance with the tenant-owned housing legislation have increased in step with the majority of housing construction being of tenant-owned housing.

FINANCES

Net turnover was SEK 37 (33) million. The explanation for the increase is partly increased construction and a maintained market share. The group's earnings have been affected by insurance claims pertaining to the operations of the subsidiary after necessary provision of reserves. Profit before tax was SEK 50 (o) million. From the 2005 closing of accounts, the group is changing its accounting principles for valuation of investment assets. The parent company has gone over to reporting assets at fair value. Previously, the acquisition value was reported. The subsidiary has previously reported the fair value for shares, but now also reports interest-bearing investment assets at fair value.

OBJECTIVE

The group is to be an active participant in the Swedish market in the field of consumer protection and insurance, mainly in the residential construction sector. The group is to maintain, by effective organisation, a high standard of risk assessment of current construction projects and participating contractors when writing guarantees and insurance. The required return amounts to 7 per cent of shareholders' equity.

DIVIDEND POLICY

The parent company's dividend policy is that 1/3 of net profit is to be distributed.

ASSESSMENT

During the year, the group has achieved the target for return of 7 per cent on shareholders' equity. This year's result was affected to a great extent by changed accounting principles. Taking this into consideration, the dividend policy was not complied with for the 2005 financial year. SEK 2.4 million was distributed to the shareholders. Taking into consideration the increase in housing construction which is anticipated, the type of consumer protection and insurance provided by the Bostadsgaranti group plays an important role in the market.

A/O Dom Shvetsii

A/O Dom Shvetsii manages one property – Sverige Huset (Sweden House) in St Petersburg, Russia.

OPERATIONS

A/O Dom Shvetsii is a Russian limited company owned by Skanska (49 per cent), the Swedish state (36 per cent) and the City of St Petersburg (15 per cent). A/O Dom Shvetsii owns Sverige Huset and has the right of disposal of the site for 49 years, approximately 5,000 sq.m. of lettable area. The largest tenant is the Swedish Consulate-General and the Swedish Trade Council.

ASSESSMENT

A/O Dom Shvetsii's operations are wholly dependent on the level of demand for premises in St Petersburg. Today, the occupancy ratio at Sverige Huset is 100 per cent.

Board of directors and auditors 2005/2006 | Chair: Gunnar Lundberg. | Members: Monica Lundberg, Sten Luthman, Alexander Sergeevich Shashorin, Fredrik Wirdenius. (The annual general meeting took place on 12 May 2006.) | Auditor: KPMG.

No fee is paid to the chairman of the board. Fees to the board members elected at the annual general meeting totalled USD 3,400 (3,400) in 2005.

Chair: Karl-Gunnar Holmqvist

CEO: Jan Sundling

carão ôteeu

Green Cargo was established in 2001 in conjunction with the incorporation of the public enterprise Statens Järnvägar (Swedish State Railways). The objective is for Green Cargo to be a profitable and successful logistics company, which acts commercially in all respects and facilitates sustainable development.

OPERATIONS

Green Cargo is a transport and logistics company based on the railway. The company has a market share of approximately 75 per cent of the Swedish market for freight traffic by rail. Its customers are to be found in Nordic base industry, where forest, steel and paper dominate. A considerable proportion of customers operate both within and outside Sweden. Green Cargo works together with other logistics companies in Europe. Rail transport accounts for over 80 per cent of income. Green Cargo also carries out shipments by lorry and third-party logistics.

FINANCES

The group's income totalled SEK 5,864 (5,950) million. Profit after financial items was SEK 137 (40) million. Costs totalled SEK 5,641 (5,831) million, a decrease of over 3 per cent.

In 2005, the company received a share-holders' contribution of SEK 600 million. This contribution is the base for an investment programme in locomotives and trucks of SEK 3,700 million. Net investment totalled SEK 244 (287) million.

OBJECTIVE

The owner's long-term financial target for Green Cargo is an equity/assets ratio of 30 per cent and a return on equity of 10 per cent.

DIVIDEND POLICY

Ordinary dividend is to amount to half of the net profit for the year, when the equity/ assets ratio has been achieved. In addition, an extra dividend is to be paid if this is needed to achieve an effective capital structure.

ASSESSMENT

Green Cargo's locomotive and rolling stock fleet has an average age of around 30 years and is approaching the point where extensive refurbishment and investment needs to be made. A long-term investment programme has been produced. The programme extends over a ten-year period and involves amounts in billion kronor. An important condition for being able to carry out the programme was the Government's decision in March 2005 on a capital contribution. The capital contribution has made it possible for Green Cargo to enter into agreements with various suppliers and financiers to secure the investments. Since incorporation, Green Cargo has made the operation more efficient in order to adapt to an increasingly competitive and internationalised transport market. In 2003 and 2004, in particular, the company started a rationalisation programme. The effects of rationalisations are the main explanation for the company reporting a good result for 2005. Green Cargo has exceeded the financial targets for 2005 decided upon by the annual general meeting for 2005.

The company's equity/assets ratio amounted at the end of the year to 34.8 (13.3) per cent. The target for the equity/assets ratio is 30 per cent. The strongly improved equity/assets ratio during the year is explained by the positive result, the capital contribution of SEK 600 million and the deferred tax asset of SEK 262 million. Return on equity was 39.6 (10.9) per cent. The company's target for return on equity is 10 per cent. This target is also affected by the deferred tax asset.

Due to the imminent investments, the board proposed that no dividend be paid for 2005. The annual general meeting decided in accordance with the board's proposal.

AB Göta kanalbolag (Kanalbolaget) was established in 1810 the year that the construction of the canal started. The state took over the company in 1978 and it became a subsidiary to the Swedish Forest Service in 1984. The Riksdag considered, in conjunction with the incorporation of the Swedish Forest Service in 1992 that it was a concern of the state to be responsible for the Göta canal being renovated and operated in future in such a way as to preserve the value of the canal as a building of cultural and historical interest and an attractive tourist destination. Since 1 July 1992, the canal company is a wholly state-owned company.

OPERATIONS

The company engages in canal and property activities. The canal business consists of leisure and passenger boat services and certain directly-related activities such as laying up boats, external work, bridge maintenance, sales and museum activities. The property business includes management of forest, land and properties which both are associated with the canal, both historically and practically. The company also engages in extensive maintenance and refurbishment activity and, among other things, restores the company's properties to their original condition. The operations take place in close collaboration with municipalities, county administrative boards and the business sector along the canal.

FINANCES

In 2005, the company had a turnover of around SEK 47 million and reported a loss of approximately SEK 80,000. In all, income from the canal and contract business totalled SEK 18.5 million. Income from canal traffic increased by 13 per cent to around SEK 7.9 million. Income from the forest and property business totalled SEK 8.4 million. Earnings decreased to SEK 3.4 million due to the storm in January 2005. The company's equity/assets ratio was 83 per cent. As in previous years, the state contributed SEK 14.9 million for refurbishment of the canal. Grants of SEK 4.9 million were received from municipalities, county employment boards and other cooperation partners.

OBJECTIVE

The company is to carefully maintain and develop Göta Canal as Sweden's largest historical man-made structure, taking the environment and nature into consideration and to take good care of the company's properties, land and forest holding. Göta Canal is to be Sweden's leading tourist waterway and visitor attraction. Taking into consideration the special nature of the company's activity, no specific financial requirements have been set. In general, the company shall promote a positive financial development of operations with its own funds and grants.

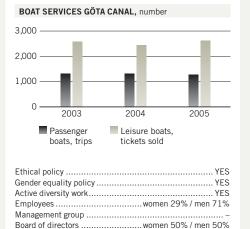

DIVIDEND POLICY

There is no dividend policy since the company has no dividend requirements from the owner.

ASSESSMENT

Göta Canal is now in a very good state. Kanalbolaget's activities have continued to contribute to increasing the value of the canal as a historical manmade structure and an attractive tourist destination. The forest holdings are managed efficiently and have been environmentally certified in accordance with FSC. Various collaboration and marketing projects and the EU project with other stakeholders have contributed to enhancing experiences on and along the canal. Youth hostels, guest harbours and cafes have been appreciated by tourists as well as various arrangements along the canal. The company was awarded the Swedish Tourist Association's prize for the best youth hostel. The operations have attracted international attention. Under the company's management, the very successful "World Canals Conference" was arranged. The company has a sound financial development. The storm in January 2005 led to reduced felling which affected the financial result. Major marketing efforts have been made to describe the Göta Canal area as a tourist destination and area for experiences. The company engages in active gender equality and environmental work.

CEO: Bill Brox

The Riksdag decided to set up Institutet för mikroelectronik i Göteborg aktiebolag (Imego AB) in 1998 in accordance with a proposal from a committee of inquiry on a technical research institute in Göteborg. Imego AB was established in 1999 and was fully operational during 2000. The company carries out self-initiated research focused on micro-electronic based systems.

OPERATIONS

Imego carries out research and development work in close collaboration with Chalmers tekniska högskola AB and the University of Göteborg. The company is one of the largest users of Chalmer's new laboratory for microelectronics, MC2. It is planned that the company will develop new products and processes from idea to complete prototype.

With funds from the initial investment assistance, Imego has made large investments in research equipment and laboratories. Additional investments will be made, in particular in software, equipment for electrical verification and laboratories for chemistry and optics. Production equipment will be obtained, when needed, from contacts with customers and suppliers with unused production capacity.

According to the company's analysis of the market for microelectronic products, the need for sensor systems will continue to increase. Furthermore, the market potential for micromechanics is considered to be greater than for microelectronics. Products where microelectronics are used include nozzles for printers, read and write heads for hard disk drives, pressure sensors, accelerometers for airbags, micromirrors for projectors and simpler medical diagnostic equipment.

FINANCES

The basis for operations is a government grant of SEK 20 million. Income from external projects was over SEK 23 million in 2005 from some 20 projects. One of the

largest projects is a multi-year collaboration with Saab Dynamics. In collaboration with Acreo and IVF, the company has also developed mobile wireless test equipment for sensors name Trysense. The largest projects, financed by government grants, have been to develop methods of construction for sensors, magnetic nanoparticles for biosensors, biomatrix for DNA and the sun protection sensor, Sunsitive.

OBJECTIVE

The company's objective is to establish collaboration with companies, institutions of higher education and institutes relating to microelectronics, micromechanics and sensor systems. Among other things, the research that needs to be performed in clean rooms takes place in close collaboration with the Department of Microtechnology and Nanoscience (MC2) at Chalmers University of Technology where there is a process laboratory for manufacture of micro and nanocomponents (clean room).

DIVIDEND POLICY

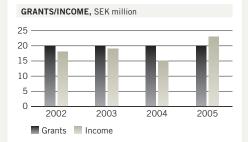

There is no dividend policy since the company's profit is to be used to promote its activities.

ASSESSMENT

An assessment was made of the company's operations during 2004. Among other thing, change of ownership was suggested. In the spring of 2005, the Riksdag has, in accordance with proposals in the Research Policy Bill Research for a better life (Bill 2004/05:80) authorised the Government to sell parts or the whole of the shareholding in Imego AB. Negotiations are in process with various interested parties.

The company is at present still in a buildup phase. One of the company's objectives is that income from commissions should exceed the government grants. 2005 is the first year that this objective has been achieved.

IRECO

In 1997, the Riksdag decided to establish the holding company IRECO Institute for Research and Competence Holding AB with the intention, among other things, of managing the state's shares in incorporated industrial research institutes. Since 2002, the company has been called IRECO Holding AB and is owned by the state (55 per cent) and the Stiftelsen för Kunskaps- och Kompetensutveckling (45 per cent).

OPERATIONS

IRECO owns and manages shares and participation rights in companies engaged in industrial research. The company promotes the industrial research institutes' long-term development, facilitates technical development and the spread of competence in the Swedish business sector, promotes the collaboration between institutes of higher education and the Swedish business sector and promotes an appropriate structure for the industrial research institutes.

FINANCES

Net turnover totalled SEK 237 million. Net profit was SEK 4 million.

IRECO's owners provided SEK 125 million for the period 2003–2005. With the aid of these funds, the company has been able to carry out restructuring of the industrial research institutes in accordance with the objectives specified by the Government in Bill 2001/02:2. Together with VINNOVA, IRECO finances long-term competence development in the institutes. During the year, decisions have been made on payments of SEK 91 million for 2006.

OBJECTIVE

IRECO's vision is to be a partner in a handful of established Swedish research companies, which successfully compete with highly reputed international institute brands to the benefit of the development of the business sector.

The overall objective is to contribute to industrial research institutes efficiently engaging in research to the benefit of the business sector and the community, to their being competitive and solidly based in the business sector. IRECO should be a recognised minority owner of the institute companies, or, when appropriate, a majority owner. In view of the nature of the company's activities, it is not expected to generate a profit. No specific economic or financial targets have therefore been set.

DIVIDEND POLICY

There is no dividend policy since the owner has not made any dividend requirements.

ASSESSMENT

IRECO has contributed in an effective way to all industrial research institutes in the group being reorganised as limited companies. The role of owner has been exercised, among other ways, by participating in the nomination of board members for the institutes. During the year, the company has concluded restructuring of the industrial research institutes in a well-targeted way to fewer, larger units with greater international impact. Studies have been carried out aiming at clarifying the prerequisites for and effects of mergers as a component in implementation of a new institutional structure. Restructuring has resulted in four industrial research groups, IRECO being a partner in three of them: Swerea AB, Swedish ICT Research AB, and STFI-Packforsk AB. Strategic work is being undertaken to meet the industry's need for relevant research. By promoting industrially relevant research and development, the company has contributed to increased growth and greater competitiveness. Seminars have been arranged with the IRECO institutes' main owners and board members. Together with VINNOVA, IRECO has produced criteria for distribution of competence development funds to the institutes for the period 2007–2008.

Board of directors and auditors 2005/2006 | Chair: Anders Narvinger. | Members: Christer Berggren, Madeleine Cæsar, Lennart Lübeck, Tomas Salzmann, Gunnar Svedberg, Lena Treschow Torell. (Anders Narvinger and Gunnar Svedberg resigned and Yngve Stade, new chairman, was elected at the annual general meeting in 2006.) | Auditors: Roland Nilsson and Magnus Ripa, KPMG.

The fee to the chairman of the board was SEK 63,000 (60,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 31,000 (30,000) in 2006.

Kasernen was established in 1990 with the State and Diös Fastigheter AB as owner. At the end of 1991, the state acquired all shares in Kasernen as a consequence of the government reform of provision of premises.

OPERATIONS

Kaserner shall construct, acquire, own, let and manage property with the intention of providing student housing and short-term accommodation primarily for employees in the Armed Forces. In all, the group administers four apartment buildings containing 29 rented housing units with a total of 434 apartments. The group consists of the parent company Kasernen Fastighets AB and the subsidiary Fastighets AB Kasernen in Halmstad. During the year, two subsidiaries, Fastighets AB Kasernen in Skövde and Fastighets AB Kasernen in Uppsala have been merged with the parent company. All properties in Kasernen are let to employees in the Swedish Armed Forces. The company's operations are therefore affected by the changes that have taken place or will take place in the Armed Forces. The company's properties are managed and developed by active collaboration with the Armed Forces. At places where the Armed Forces have restructured or terminated its activity, the company has successively divested its property holding.

During the year, the company's properties in Kristinehamn have been sold. Furthermore, an additional purchase price of around SEK 10 million has been received for sale of a company including a hotel property in Stockholm. Kasernen has taken the initiative to planning work to obtain building rights for housing on part of the Karlsberg area in Stockholm.

FINANCES

Net turnover was SEK 21.0 (22.9) million. Operating profit amounted to SEK 17.6 (12.8) million and profit after financial items was SEK 14.5 (9.9) million. The Group's liquidity at the end of the financial year was SEK 4.3 (18.6) million. The group companies had unused overdraft facilities of SEK 19.5 (23) million. The group's interest-bearing liabilities, which are all taken up in Swedish kronor, amounted to SEK 35 (80) million. The book value of the company's properties totalled SEK 146.6 (174) million. The properties' fair value on closing date was SEK 242 (242) million.

OBJECTIVE

Kasernen is to offer good housing which is fit for its purpose to employees in the Armed Forces. The owner's explicit requirement is that the company should have an adjusted equity/assets ratio of at least 25 per cent. Furthermore, return on adjusted shareholders' equity is to correspond to the five-year government bond rate plus two percentage points. The profitability target for 2005 was 5.3 per cent.

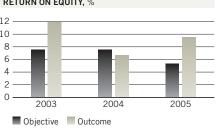

DIVIDEND POLICY

The Group's dividend target is to be 50 per cent of net profit for the year. Considerations shall be taken to he company's financial situation in decisions on dividend.

ASSESSMENT

The operation is conducted in close collaboration with the Armed Forces. The equity/ assets ratio in the group on amounted on closing date to 70.4 (52.8) per cent and return on equity to 9.5 (6.7) per cent. During 2005, Kasernen has fulfilled the financial and other targets set by the owner for the company. Dividend of SEK 5 million was paid for 2005, which is on a par with the dividend target. Kasernen's forecast for 2006 is that profit after net financial items will decrease, partly due to fewer property sales.

DRAMATEN

Kungliga Dramatiska Teatern AB (Dramaten) is Sweden's national stage for spoken theatre. Dramaten is to be Sweden's leading institution in the field of drama and to set an example, as a national theatre, for other institutions with regard to development and artistic quality. Dramaten is also responsible for preserving and promoting the Swedish language and the national culture in the field of the theatre and is to be able to hold its own in comparison with the foremost foreign theatres and in international collaboration through high quality and preserving its national identity.

OPERATIONS

Dramaten's broad and varied repertoire consists of new plays, both Swedish and foreign, modern and classical drama and theatre for children and young people. In 2005, Dramaten had 34 (32) productions in its repertoire of which 23 (24) were new productions. A total of 1,003 (1,069) performances have been performed at the theatre's six stages for 255,527 (241,856) patrons. Booking has been 81 (78) per cent and the proportion of non-Stockholmers in the audience has been estimated at 20 per cent. A production that has attracted special attention during the year has been Fröken Julie (Miss Julie) with Mikael Persbrandt and Maria Bonnevie (directed by Tommy Berggren) at Lilla scenen which played to full house. The focus on children and young people is continuing. More than 25 per cent of the performances have been specially targeted on children and young people with a total audience of 36,718 (39,840) patrons. Thirty-three performances have been given outside the Stockholm region. The foreign touring activity consisted of eleven performances. Staffan Valdemar Holm has been reappointed by the Government as director of the theatre until 30 June 2008.

FINANCES

Dramaten's government grant was SEK 190 million in 2005. Other income, mainly ticket revenue, was SEK 45 million. Dramaten has initiated a sponsoring partnership with SAS Institute. This activity produced a surplus of SEK 4 million.

OBJECTIVE

As national theatre, Dramaten is to be the leading institution in the field of theatre and to have a varied repertoire, with a good balance between classical and modern drama. Every year, it is to perform at least one new work by a Swedish playwright. Dramaten shall further aim to attract the maximum number of visitors to its home stages and to continually develop its work with the public to this end. The repertoire shall as far as possible be made available to a broad public throughout Sweden by, for example, guest performances and collaboration with radio and TV. The level of craftsmanship in the workshops and studios shall be high.

DIVIDEND POLICY

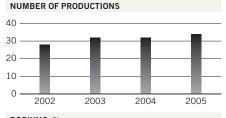

The activity is not to be profit-making and there is therefore no dividend policy.

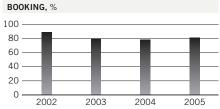

ASSESSMENT

During the year, the activity has been focused to the greatest possible extent on achieving the goals for quality, accessibility and renewal which have been set for the government grant to Dramaten. The degree of goal compliance is good. The assessment is based on qualitative parameters presented above

Shareholders' equity amounts to SEK 27 million and Dramaten's ability to balance the risks in the operation are thereby considered to be satisfactory.

PERAN

Kungliga Operan AB (Operan) is Sweden's national stage for opera and ballet. Operan is to be the leading institution in Sweden in the field of opera and ballet and to set an example for other institutions as regards development, renewal and artistic quality. Operan is also to be responsible for taking care of and promoting the national heritage in the sphere of opera and ballet and to be able to hold its own in comparison with leading foreign opera and ballet venues and, in international collaboration, through high quality and preserving its national identity.

OPERATIONS

The number of Opera's performance and other events increased to 1,075 compared with 759 last year. The repertoire offered 31 productions of opera and ballet which is also an increase compared with 2004. There were 69 concert performances by Kungliga Hovkapellet (the Royal Swedish Opera Orchestra). The average booking at performances on the large stage for opera was 78 (74) per cent and for ballet 92 (87) per cent. During the year, Pippi Långstrump, a ballet by Pär Isberg with music by Stefan Nilsson and Georg Riedel, was performed for the first time. Wagner's four operas in The Nibelungen's Ring were newly performed for the third time in a century with a premiere for The Rhine Gold directed by Staffan Valdemar Holm during the autumn of 2005. The focus on children's and youth activities is continuing.

Lars G. Nordström took over from Hans Dalborg as chairman of the board of Kungliga Operan.

FINANCES

The government grant was SEK 348 million in 2005. Other income was SEK 60 million. Ticket revenue was SEK 45 (46) million. Operations produced a loss of SEK 3.9 million which means that shareholders' equity amounts to SEK 8.7 million.

OBJECTIVE

As a national scene, Operan is to have a varied repertoire of opera and ballet with a good balance between classical and modern works. Operan shall moreover aim to attract the maximum number of patrons and shall constantly develop its audience work in this respect. The repertoire shall, as far as possible, be available to a broad audience throughout Sweden through guest performances, recordings and co-operation with radio and TV. A high level of craftsmanship shall be maintained in the workshops and studios.

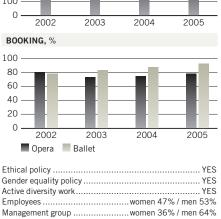

DIVIDEND POLICY

The operation is not to be profit-making and there is therefore no dividend policy.

ASSESSMENT

During the year, the activity has been focused to the greatest possible extent on achieving the targets for quality, accessibility and renewal specified for the government grant to Operan. The degree of compliance with objectives is good. The assessment is based on qualitative parameters presented above. Shareholders' equity amounts to SEK 8.7 million and Operan is thus able to balance the risks in the activity.

In 1993, the AMU group was reorganised from a public authority to a limited company. The company aims to produce and sell courses on the open market. The AMU group changed its name to Lernia AB in 2000. Lernia's task is to pursue the provision of competence in working life.

OPERATIONS

Lernia offers training, manning and services in adjustment and rehabilitation for individuals, companies, agencies and organisations. Lernia Utbildning offers courses in industry, technology, care and social services, among other subjects, and adult upper school level education such as Swedish to immigrants. Lernia Bemanning is market leader in the field of industry, technology and logistics. Lernia Utbildning is organised in six regions and Lernia Bemanning in three regions. Lernia is represented throughout Sweden. Lernia trains approximately 50,000 persons annually and leases around 4,000 consultants to industrial companies.

FINANCES

Lernia's net turnover increased in 2005 by SEK 179 million to SEK 1,742 million, from both increased training and manning services. Operating profit increased to SEK 95 (48) million. Profit after net financial items and tax was SEK 109 (46) million. The improved result is due to the efficiency improvements in Lernia Utbildning taking full effect and a good development of earnings in Lernia Bemanning. During the fourth quarter, SEK 13 million was charged to earnings for restructuring expenses. In 2005 Lernia reported a return on equity of 34 (18.9) per cent. The equity/assets ratio was 59 (48) per cent.

OBJECTIVE

From 2003, the economic and financial targets over a business cycle entail a return on equity after standard tax of a minimum of 13 per cent, an operating margin of at least 4 per cent and an equity/assets ratio of 40–50 per cent.

New economic and financial targets were adopted at the annual general meeting in 2006 – the operating margin is to be at least 5 per cent over a rolling five-year period and the equity/assets ratio is to be within the range of 40–50 per cent.

DIVIDEND POLICY

Lernia's dividend policy means that capital in excess of the capital requirement, defined as shareholders' equity sufficient to carry out a restructuring of the activity that corresponds to the company's operating risk in the short run, is to be distributed to the owner.

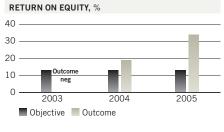

A new dividend policy was adopted at the annual general meeting in 2006 – in the long term 30–50 per cent of the net profit is to be distributed.

ASSESSMENT

The work of broadening Lernia's customer base continues with positive results. Lernia's income from the corporate market continues to increase both in absolute figures and as a percentage of Lernia's total income. The objective is for income from the corporate market, the local government market and the market for labour market training to each amount to about a third of Lernia's total turnover.

Lernia has achieved the profitability target, the target for the equity/assets ratio and for the operating margin. Lernia is again paying a dividend (SEK 25 million). During the year, Lernia Bemanning's position on the market has been further reinforced and operations are expanding at a rate in excess of market expansion.

Board of directors and auditors 2005/2006 | Chair: Tomas Eneroth. | Members: Viktoria Aastrup, Sven-Runo Bergqvist, Matthias Kjellberg, Margareta Lewin, Annika Lundius, Göran Sevebrant. | Employee representatives: Inge Lindroth, Lena Lundberg. | Deputy employee representatives: Olle Eriksson, Ewa Wiklund. Auditors: Stefan Holmström, KPMG and Bertil Forsslundh, Swedish National Audit Office. | Deputy auditors: Ulf Sundborg, KPMG and Henrik Söderhielm, Swedish National Audit Office.

¹⁾ A seven-grade scale where the index consists of a percentage figure corresponding to the average value of 5 on the scale.

Since it was established in 1890, LKAB, has contributed to the shaping of Sweden's industrial history. The ore deposits at Luossavaara and Kiirunavaara had been known for a long time. However, it was first at the end of the nineteenth century that the ore deposits in the north became of commercial interest when a new method of producing steel from phosphorous-rich ore had been invented. The state became a partner in LKAB in 1907 and the company has been wholly state-owned since 1957.

OPERATIONS

LKAB's operations are, based on Malmfälten, to produce and supply refined iron ore products and services to the world market which create added value for its customers. Other closely-related products and services based on LKAB's expertise and which support the main operations can be included in the operations.

FINANCES

LKAB is reporting its best result ever in 2005. The year was characterised by a continued high level of demand for iron ore mainly due to the strong development in China. Net turnover increased by 60 per cent to SEK 14,337 million, which is primarily due to increased supply volumes and price increases. Operating profit increased to SEK 6,109 (1,941) million. Profit after financial items increased to SEK 6,451 (2,023) million. A lower US dollar exchange rate has counteracted the increase in turnover and earnings during the year.

OBJECTIVE

The company's overall financial target is sustainable profitability. The long-term average required return, measured over a business cycle, is 10 per cent of operating assets, corresponding to 8.5 per cent of shareholders' equity after tax. The target has been set in the light of the industry being capital intensive and cyclically sensitive. The equity/assets ratio is to be at least 50 per cent.

LKAB's overall agenda is the focus on quality, service and cost efficiency.

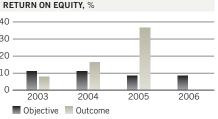

DIVIDEND POLICY

The dividend is to be 30–50 per cent of net profit in the long term and adapted to the average level of profit over a business cycle.

ASSESSMENT

During 2005, the company has succeeded well in a highly consolidated and competitive market as a result of internal measures which, among other things, have led to a good costs structure and increased productivity together with a good market situation. Output, income and earnings are the best in the company's history. LKAB invested SEK 159 million in R&D. The overarching goal is to ensure the competitiveness of the company's product portfolio and to ensure that the company has the right processes. Investment plans in the next ten years amount to around SEK 20 billion. The company has decided to invest SEK 6.4 billion of this amount in a new pellets plant in Kiruna and around SEK 1 billion in efficiency improvements in the ore harbour in Narvik. The company has also started extracting olivine in its own deposits in Greenland. Return on equity was 37 per cent, return on operational assets and the equity/assets ratio 71 per cent. The targets set both for return on operational assets and equity have been exceeded. The company has a very good equity/assets ratio. LKAB is paying the owner a dividend of SEK 1,500 million for the 2005 financial year, which is equivalent in the long term to 39 per cent of net profit. The company's expansion at its places of operation in Malmfälten will lead to structural changes at these locations. LKAB is engaged in active efforts, together with municipalities and other stakeholders, to find good solutions for all those affected. Discussions on the financing of necessary measures are in process. LKAB has participated in the Malmfält group appointed by the Government. The Group is engaged in activities subject to licence according to the Environmental Code.

Chair: Hans Dalborg

INCOME STATEMENT, SEK million 2005

CEO: Lars G Nordström

Nordea Bank AB is now a leading financial group in the Nordic countries. The company has been established by a number of mergers between 1997 and 2001 between the Swedish Nordbanken, Finnish Merita, Danish Unibank and Norwegian Christiania Bank og Kreditkasse. The Swedish state's ownership stake in Nordea is 19.9 per cent.

OPERATIONS

Nordea is the leading financial group in the Nordic countries and the Baltic Sea region and carries out its activities in three business areas: Retail Banking, Corporate & Institutional Banking and Asset Management & Life. The company has an extensive Internet bank and e-commerce operation with 4.4 million e-customers and around 1,100 bank branches. The customer base consists of 9.4 million private customers, 960,000 corporate customers and 1,000 major corporate customers. The company is also a leading asset manager in the Nordic finance market managing EUR 151 billion. The Nordea share is listed on the stock exchanges in Stockholm, Helsinki and Copenhagen.

FINANCES

During 2005, Nordea made substantial investments to increase income and strengthen the company's position in the market. Nordea is reporting record earnings this year. All business areas have had their best year ever. Operating profit totalled EUR 3,048 billion, an increase of 25 per cent excluding capital gains on property last year. Income increased by 7 per cent and costs were unchanged. Loan losses were positive in every quarter and the loan portfolio is considered to be substantially of good quality. Managed assets increased by

15 per cent to EUR 151 billion and income in Asset Management rose by 15 per cent. In 2005, Nordea repurchased 141 million shares of which 29 million were cancelled at the annual general meeting of shareholders in April 2005.

OBJECTIVE

Total return shall be on a level with the five best years from a comparison group of European financial groups. Return on equity is to exceed 15 per cent in 2005 and exceed 17 per cent, or be on a level with the best from a Nordic comparison group, from 2007. Expenses are to be at the same cost level in 2007 as in 2004. In addition, the cost income ratio is to be continuously improved. Nordea has drawn up strategic themes to achieve the financial targets. These include growth of income, operational efficiency, efficient use of capital and attractiveness as an employer.

DIVIDEND POLICY

Dividend is normally to exceed 40 per cent of net profit for the year. The annual dividend is to be adapted to the market's required return and the need of capital to develop business operations.

ASSESSMENT

Nordea's total return for 2005 was 27.5 (29.8) per cent, which put the bank in ten place (3) in the comparison group. Return on equity increased to 18.0 (14.5) per cent. Expenses were unchanged compared with 2004 despite a high level of activity and larger volumes of business. The cost-income ratio continued to decrease to 56 (60) per cent. Dividend for the 2005 financial year amounts to EUR 0.35 (0.28) per share, which is equivalent to a dividend of 40 per cent.

Norrland Center AB was created in 1991 to stimulate the development of the business sector in Norrland, particularly the inland areas, with the aim of creating employment. The company is owned in equal parts by the state through the Ministry of Industry, Employment and Communications, the Norrlandsfonden foundation and Norrvidden Delägare Norr AB.

OPERATIONS

Norrland Center carries out its activities working closely together with a number of paying municipalities in Norrland. Through a well-developed contact network in different areas of society, the Norrland Center shall serve as a coordinating link for business start-ups in Norrland. The company is to act as a guide, advisor and discussion partner.

An important part of Norrland Center's work consists of outreach activities and acting marketing of Norrland as a long-term profitable region for business establishment. Contacts are made with companies and organisations in the metropolitan areas in southern Sweden to interest them in the opportunities and benefits of establishing operations in Norrland. With the aid of factual information and analyses provided free of charge by Norrland Center, each individual company can then make long-term decisions.

FINANCES

Norrland Center's loss after tax totalled SEK -43,000 (-448,000). Its shareholders' equity amounts thereafter to SEK 15 (15) million.

OBJECTIVE

Norrland Center is to be the player that municipalities in Norrland and companies in southern Sweden prefer to use with regard to the establishment and development of activities in Norrland. Operations are to be carried out in such a way that the shareholders' equity, SEK 15 million, invested in the company is kept intact in real terms.

DIVIDEND POLICY

Norrland Center has no dividend policy since the company has no dividend requirements from its owners.

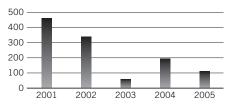

ASSESSMENT

The result of market activities in 2005 is very satisfactory. A large number of companies have expressed an interest in evaluating Norrland as a region for establishment and, as in 2004, some ten companies have also decided to establish and set up new activities in Norrland Center's partner municipalities. These decisions entail about 100 new jobs. Since its start in 1991, Norrland Center has contributed in various ways to establishing and developing around 110 activities in Norrland. The current number of established permanent jobs is around 2,300. However, both the national and the international competition for business establishments is increasingly tough. The future development of business competitiveness in inland Norrland and, in particular, the ability to attract new businesses there, also depends on the design of the regional assistance schemes.

The project situation for 2006 is favourable and is considered to lead to a positive establishment result this year as well.

Board of directors and auditors 2005/2006 | Chair: Lars-Olov Söderström. | Members: Peter Andersson, Nils Åke Astermo, Ursula Tengelin. Auditor: Peter Zell, KPMG.

Chair: Olof Stenhammar

In 1997, the Government sold the state's holding in Värdepapperscentralen VPC AB, whereupon SEK 500 million was set aside for investments in companies that have a central role in the Swedish financial infrastructure. In 1998, the state became a partner in the then OM Group in conjunction with the merger with Stockholms Fondbörs. After the merger with the Finnish stock exchange operation in 2003, the name was changed to OMX AB (publ). The Swedish state's share of ownership is 6.75 per cent.

OPERATIONS

OMX's operations consist of two divisions. The division OMX Exchanges includes the integrated Nordic and Baltic marketplace consisting of the exchanges in Stockholm, Helsinki, Copenhagen, Tallinn, Riga and Vilnius. Within the division OMX Technology, OMX is a world-leading supplier of transaction technology and processing and outsourcing solutions for the financial and energy markets. The OMX share is listed on the stock exchanges in Stockholm, Helsinki and Copenhagen.

FINANCES

2005 was characterised by a high level of profitability, increased exchange activity and an ongoing strategic focus including sales and acquisitions. OMX's total income rose to SEK 3,136(3,106) million and the operating profit increased to SEK 910 (616) million during the year. The increase in income is due to higher income in OMX Exchanges, which is partly explained by increased trading activity and partly by the inclusion of the Copenhagen stock exchange in the group from 1 January 2005. From 1 December 2004 APK is not included in the group. The income of the OMX Technology division decreased, mainly due to the winding-up and sale of activities. Net profit increased to SEK 543 million.

During the year investments in other fixed assets totalled SEK 312 million.

Investments in fixed assets amount to SEK 85 million. Cash flow from acquisitions totalled SEK 937 million, of which SEK 900 million is attributable to the acquisition of the Copenhagen stock exchange. The group's increased borrowing in connection with the acquisition has had a positive effect on the cash flow from financing activities. The cash flow from investing activities also includes a change in financial investments with a duration of over three months.

OBJECTIVE

OMX strives to create profitable growth with a return exceeding the market's required return. To achieve this target in a medium-term perspective, the company has set two guideline financial targets: OMX's return on equity is to be at least 15 per cent and the net debt/equity ratio is to be at most 30 per cent. By achieving these targets, the company expected to be able to pay dividend to shareholders and at the same time retain a sufficiently strong balance sheet taking into consideration the financial level of risk.

DIVIDEND POLICY

OMX's dividend is to comply with the company's long-term earnings trend and capital requirements.

ASSESSMENT

Return on equity amounted to 12 (10) per cent and has not achieved the 15 per cent set as target. The net debt/equity ratio was 12(-4) per cent. The dividend is the first paid since 2000 and the company is paying an extra dividend of SEK 415 million (SEK 3.50 per share), in addition to the ordinary dividend of SEK 355 million (SEK 3.00 per share). The share price has increased by 30 (-5) per cent and closed on 31 December at SEK 110.50 per share. The Stockholm Stock Exchange rose during the same period by 33 (+18) per cent.

Board of directors and auditors 2005/2006 | Chair: Olof Stenhammar. | Members: Adine Grate Axén, Urban Bäckström, Bengt Halse, Birgitta Klasén, Tarmo Korpela, Henrik Normann, Markku Pohjola. (Henrik Normann resigned and Hans Munk Nielsen was elected at the extraordinary shareholders' meeting in 2005.) Auditors: Peter Clemedtson, Öhrlings PricewaterhouseCoopers and Björn Fernström, Ernst & Young.

The fee to the chairman of the board is SEK 750,000 (700,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 250,000 (200,000) in 2006.

CEO: Erik Olsson

Posten AB was created in 1994 after the Riksdag resolved to abolish Sweden Post's monopoly and open up the Swedish postal service for free competition.

OPERATIONS

Posten operates in the markets for administrative communications, direct advertising and logistics services. These markets extend from the flows of physical letters and parcels to partly or wholly electronic services. With around 33,500 staff and a turnover of approximately SEK 25 billion, Posten is one of Sweden's largest groups. Sweden is the main market and Posten provides daily service to 4.5 million households and almost 900,000 businesses. International letter and parcel services are provided through a network of subsidiaries and business partners. Posten handles over 20 million items every day. Posten is the largest haulier in the logistics industry with 2,300 vehicles. According to its licensing conditions for engaging in postal operations in Sweden, Posten is also at present obliged to provide a letter and parcels service for the whole of the community. Posten is also obliged to provide a daily nationwide cashier service.

FINANCES

In 2005, net turnover increased to SEK 25,277 (25,120) million, primarily as a result of volume increases in the direct advertising and logistics range. The price increases in the Cashier Service during the year have not been able to compensate for lost volumes. Volumes decreased by 20 per cent in 2005. Operating profit increased to SEK 1,281 (1,115) million, which includes provisions of SEK -65 (-397) million and capital gains of SEK 5 (206) million. Net profit improved to SEK 1,478 (1,297) million.

OBJECTIVE

Posten's profitability target is 10 per cent of net profit in relation to average share-holders' equity, assuming an equity/assets ratio of 25 per cent.

DIVIDEND POLICY

According to the dividend policy adopted, Posten is to pay a dividend of 40 per cent of net profit taking into consideration the company's financial position and capital requirements.

ASSESSMENT

The result is an improvement in relation to last year and is mostly an effect of continued efficiency improvements. The return for 2005 exceeds the target. The equity/assets ratio amounted to 33 per cent, which is an increase of 8 percentage points compared with last year and is mainly explained by the improved earnings. The result confirms that the organisation has carried out major changes and extensive rationalisation. This is necessary to maintain the company's capacity to develop and a financial position that allows the company to invest in future operations. Posten is paying a dividend of SEK 175 million to the owner for 2005. When paying dividend, consideration has been taken both to capital requirements and the financial position. In terms of quality, Posten is one of the world's foremost suppliers of letter services. In 2005, 95.9 per cent of domestic letters arrived the day after being posted. The requirement on postal companies in the EU is 85per cent. The government requirement for provision of a basic cashier service has had a negative impact on the company's profitability. Transaction volumes in Svensk Kassaservice have decreased by 17 per cent per year on average between 1998 and 2005. Despite the rationalisations carried out where around 100 (244) service points were closed during 2005, the cost per transactions is expected to rise since volumes are expected to continue to decrease.

SAMHALL

The Riksdag decided in 1992 that the then Samhall foundation should become a limited company. Samhall's task is to produce goods and services as part of Swedish labour market policy and, in this way, to create meaningful and stimulating work for persons with impairments. With a strong focus on the individual combined with a profitable business structure, Samhall shall offer a varied range of work. In this way, the company can work to strengthen the position of people with impairments on the labour market.

OPERATIONS

Samhall is now the leading company in Sweden for development through work for people with impairments. The company has over 22,000 employees at about 250 places in Sweden. At the same time, Samhall is one of Sweden's largest sub-contractors, in the fields of electronics, furniture, packaging and mechanics, among others.

FINANCES

Turnover, including additional cost compensation, totalled SEK 7,485 (7,958) million, of which invoicing amounted to SEK 3,112 (3,626) million and additional cost compensation SEK 4,245 million. The lower total invoicing is a result of a smaller number of employees and a deliberate change in the product mix. A shift from traditional industrial activities to industries with a larger input of services entails lower invoicing but on the other hand lower total costs and reduced tied-up capital.

Operating profit was SEK 43 (34) million. The improved earnings have been affected by capital gains on disposal of fixed assets.

OBJECTIVE

Samhall's targets for 2005 were:

- The volume of hours worked: 25.4 million hours of meaningful and stimulating work shall be offered to people with impairments.
- Recruitment of persons with severe impairments. 40 per cent of the new recruitment shall be from persons in this group.
- Number of transfers: At least 5 per cent of the employees shall leave the company for work with another employer.
- Balanced finances.

DIVIDEND POLICY

There is no dividend policy since the shares do not confer a right to dividend. If a profit is made, it is to be carried forward to promote the continued work of the company.

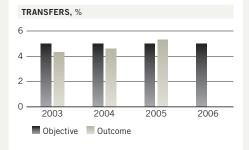

ASSESSMENT

All targets for 2005 were achieved. The number of hours worked was 25.7 million.

Of the new employees with impairments, 43 per cent came from groups with certain severe impairments. 5.3 per cent of the employees left the company for work with another employer. Return on equity was 8.8 per cent and the equity/assets ratio 36 per cent.

In addition, sick leave fell for employees with impairments and was 15.2 (17.3) per cent at the end of the year. The reduced sick leave is partly due to the systematic work carried out with better routines, clarity in the responsibility of managers, increased collaboration with Swedish Social Insurance Agency and company health care. At the same time, the number of persons with sick leave has decreased.

CEO: Jørgen Lindegaard

The main owner of SAS is the Swedish state, which has a 21.4 per cent share. SAS is a listed company and is traded on the stock exchanges in Stockholm, Oslo and Copenhagen. The background to the Swedish state's ownership is the 1951 consortium agreement.

OPERATIONS

SAS is the largest listed airline and travel group in the Nordic countries and the fourth largest airline company in Europe. The SAS group's main task is to provide airline services in northern Europe. In recent years, new airline companies, so-called low cost airlines, have started operations in Europe. A consolidation has started in the airline industry. SAS has undergone extensive changes to counter increased competition. A groupwide programme of savings has been undertaken. A new organisation with subsidiaries for all business areas and airlines has been introduced. In 2005, SAS launched new business models and product concepts.

FINANCES

Turnover increased by 6.5 per cent to SEK 61.9 (58.1) billion. Adjusted for currency effects, turnover increased by 4.0 per cent. Profit before tax was SEK 418 (-1,833) million. Earnings per share amounted to SEK 1.06 (-10.70).

The number of passengers travelling with SAS increased in 2005 by 8.0 per cent to 34.9 million passengers. The total capacity in the group (ASK) increased during the year by 2.4 per cent. The cabin factor increased by 2.8 percentage points to 66.5 per cent. The yield increased from 1.12 to 1.14. The unit cost for the group totalled 0.74 (0.73) in 2005.

OBJECTIVE

The objective is for the SAS group to achieve a total return, that is the total of the share price development and dividend,

of 14 per cent per year over a business cycle. This has been translated into an internal measure of profitability, CFROI¹¹, which is to total 20 per cent annually. The equity/assets ratio target is 30 per cent.

DIVIDEND POLICY

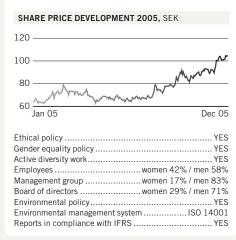

The annual dividend is set taking into consideration the group's result, financial position, capital requirement and relevant cyclical conditions. Dividend over a business cycle is to be 30–40 per cent of the group's earnings after standard tax.

ASSESSMENT

The market value of the state's holding in SAS has increased by 74 per cent during the year to SEK 3,679 (2,027) million on 31 December 2005. Profitability, measured as CFROI, was 13 (9) per cent. The board of directors and management started an earnings improvement programme in 2002, Turn-around 2005, with a view to a longterm structural strengthening of competitiveness. At the end of the year, the programme had been fully implemented and cost savings of SEK 14.2 billion achieved. New cost saving activities of around SEK 2 billion have been identified and are in process of implementation. Restructuring in the airline industry continues to make high demands for efficiency improvements. A number of new players are challenging the traditional airlines with efficient business models and low costs. It is therefore important for SAS to continue to carry out the changes needed to achieve long-term competitiveness in all of the company's operations No dividend is being paid for the 2005 financial year.

¹⁾ CFROI, Cash Flow Return On Investments, is a measure of profitability that is frequently used in the airline industry where the return is measured as operating profit before depreciation and leasing costs divided by the company's adjusted capital employed.

SIS Miljömärkning AB

The Nordic eco-label, the Swan, was created by the Nordic ministers of consumer affairs in the Nordic Council of Ministers and was initially administered as a sub-division of SIS, Standardiseringen i Sverige. This commission was supplemented in 1994 by the EU Flower eco-label system. SIS Miljömärkning AB was established in 1998 with the state as a partner (10 per cent) and SIS as the other partner (90 per cent). After the reorganisation of the standardisation organisation, the ownership of SIS was transferred to Sveriges Standardiseringsråd, SSR on 1 January 2001.

OPERATIONS

The company's activities are based on the development of criteria, information and marketing of the Swan and Flower eco-labelling systems and product control of licensing. The activity is intended to create environmental benefits and contribute to the work on sustainable development. The company's board appoints a committee for the Nordic system and a reference group for the European system to assist in and supervise the work of criteria development. The most important development during 2005 was the company's agreement with ICA Sverige on Swan labelling ICA stores. The goal is for over 300 ICA stores to be Swan labelled. To start with, mostly hypermarkets have been eco-labelled.

FINANCES

The activities are mainly financed by fees from companies that have an eco-label licence and by government grants which accounted for 14 per cent of the income in 2005. Companies that apply for an eco-labelling licence normally pay an application fee and a turnover-based annual fee which is 0.3 per cent (the Swan) or 0.15 per cent (the Flower) of the sales of the ecolabelled product. However, there is an upper limit in order for the fee to be reasonable. The

company had a turnover of SEK 26 million in 2005. The government grant for 2005 covered 57 per cent of the costs of the work with the Flower and 8 per cent of the costs of the work with the Swan. The remaining costs are covered by licensing income from the respective eco-label.

OBJECTIVE

SIS Miljömärkning AB makes an important contribution to the consumer policy objective of working for the development of production and consumption patterns that reduce the burdens on the environment and contribute to long-term sustainable development. By stimulating development and use of products that are preferable from the point of view of the environment, the company contributes to consumption that reduces the strain on the environment and in that way also to a sustainable society.

DIVIDEND POLICY

The activity is not intended to produce a profit for the owners and there is therefore no dividend policy.

ASSESSMENT

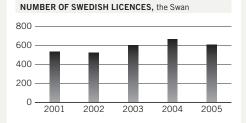

The task of the company is to administer the eco-labelling systems the Swan and the Flower and to comply with the consumer policy sustainability goal. The government grant is to be used to promote the further development of eco-labelling, which is to take place in accordance with Sweden's international undertakings. In 2005, work is to be concentrated on the further development of the Nordic eco-labelling and to contribute to developing forms for collaboration and co-ordination between the Nordic eco-labelling system and the EU system for eco-labelling and to make the EU ecolabelling system more widespread and better known in the Swedish market. This task has been performed well.

SJ AB was established in 2001 when the public enterprise Statens Järnvägar (Swedish State Railways) was incorporated. On incorporation, SJ AB took over the rail passenger services of the public enterprise. The objective is for SJ to be a modern transport company, which acts in a sustainable business-like and commercial way in all respects.

OPERATIONS

SJ is the largest operator of inter-regional rail passenger services in Sweden. The business consists of developing, producing and selling travel based on SJ's own rail services and in partnership with others. The range of services offered includes interregional, regional and local services. SJ operates within two types of transport services, commercial services and contract services. SJ has an exclusive right in the commercial services, i.e. inter-regional services and competes for customers with car, air and bus/coach travel. These services are not subsidised and SJ operates them on a strict commercial basis. Contract services mean that SJ, in return for agreed compensation, provides services on behalf of the government agency, the National Public Transport Agency, or regional transport authorities. SJ competes with national $\,$ and international train operators in procurement of these contract services. Approximately 14 per cent of the number of journeys exceeding 100 kilometres in Sweden take place by train. The main competitor to SJ is the car which accounts for 66 per cent. Air travel accounts for 14 per cent and bus/ coach travel for 6 per cent.

FINANCES

Income totalled SEK 5,744 (5,570) million. Profit after net financial items was SEK 566 (193) million. The company has completed a programme of measures to achieve improvements in earnings equivalent to SEK 700 million. As a component of this programme, SJ has reduced its costs by 3 per cent in 2005.

OBJECTIVE

The owner's long-term financial target for SJ is an equity/assets ratio of 30 per cent and a return on equity of 10 per cent.

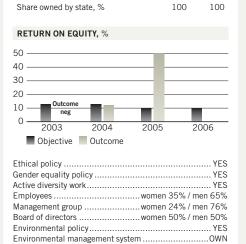

DIVIDEND POLICY

Ordinary dividend is to amount to a third of net profit when the equity/assets ratio has been achieved. In addition, an extra dividend is to be paid when this is required to achieve an efficient capital structure.

ASSESSMENT

The board of directors and the management have engaged in targeted work since 2002 to create a profitable and customer-focused service company which can meet increased competition. The profitability improvements have gone more quickly than intended. The positive improvement in earnings during the year further reinforces financial stability. The equity/assets ratio is 31.7 per cent, thereby exceeding the target. SJ's earnings for 2005 have been affected by a positive tax effect (of a one-off nature) of SEK 637 million relating to accumulated loss carry forwards. Losses were incurred mainly in 2002, in connection with large write-downs of equity. SJ's return on equity was 49.8 per cent. Adjusted for the year's tax effects, the return was 27 per cent. Profitability and thereby return is not expected to achieve these levels in 2006, and the financial targets remain in place. It was decided at the annual general meeting in 2006 that SJ would not pay any dividend in 2005. The equity/assets ratio excluding one-off effects relating to deferred tax assets amounted to 26.6 per cent which are less than the target of 30 per cent. In 2006, SJ will continue to carry out substantial investments in rolling stock. With the aid of the increasingly stable financial situation and investment in 43 new regional trains, the X-40 trains, and refurbishment of the X-2000 fleet, the company is now wellequipped to increase quality and improve punctuality. A number of large procurements of services are expected in the coming years where SJ will encounter competition from both Swedish and international train operators.

CFO: Sven-Runo Bergavist

SOS Alarm Sverige AB is owned by the Swedish state (50 per cent), the Federation of County Councils (25 per cent) and Förenade Kommunföretag AB (25 per cent). The company is responsible for the SOS service in Sweden by receiving and passing on alarm calls on the emergency number 112. The company receives payment from the state for activities related to the emergency number 112 and complies with the transparency directive in its accounting. The company has the right to engage in certain commercial activity.

OPERATIONS

SOS Alarm receives, analyses and transfers alarm calls via 19 alarm centres in Sweden. The company's activity concerning the emergency number 112 is regulated in an agreement with the state. In 2005, SOS Alarm received 3.8 (3.7) million emergency calls to 112. The proportion of non-emergency calls was 63 (61) per cent. The emergency number 112, rescue and health service services account for around two-thirds of the turnover and security and alarm services for a third. SOS sells, for instance, ambulance direction, safety alarms and emergency on-call and crisis services to municipalities and county councils, and security services such as property alarms and after-hours telephone coverage.

FINANCES

Net profit fell to SEK 701,000 (5.8 million) due to increased costs for investments in technology. Profit also decreased due to reduced compensation from the state for 112 although a new agreement is being negotiated which will cover SOS's costs for 112. The agreement has applied from 1 January 2006. Return on equity decreased to 0 (3) while the equity/assets ratio increased to 52 (50) per cent. SOS has succeed in carrying out the entire investment in technology of over SEK 200 million within its own balance sheet, without any years with losses and with retained financial strength.

OBJECTIVE

SOS is to have an average response time to II2 calls of 8 seconds. The company is to submit an annual report to the Ministry of Industry, Employment and Communications on the quality of the II2 service. The company is to have a long-term return on equity of 8 per cent.

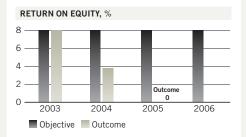

DIVIDEND POLICY

The dividend policy is 5 per cent of share-holders' equity. However, the owners have decided to temporarily reduce the dividend to 3 per cent to secure the company's financial position during the investment phase. The dividend of SEK 4.8 million in accordance with this policy.

ASSESSMENT

The average response time in 2005 was 6.8 (6.8) seconds. The centres in the metropolitan areas did not meet this requirement although response times have improved compared with 2004. Measures have been undertaken to reduce the number of nonemergency calls. SOS considers that there is now no regulatory obstacle to sort out so-called silent calls from, for instance, mobile telephones without a SIM card. This type of call is most often nuisance calls or is due to technical errors. It is estimated that around 600,000 non-emergency calls could be removed and thus markedly increase the quality of the 112 service. SOS has not achieved the target for return due to the large investment in technology that the company is now making. SOS has forecast a poorer return than the target during the investment period. However, these forecasts have been exceeded and the company is now financially strong. The company is undergoing a rationalisation programme and when the investment in technology has been made, it is expected that the target will be gradually achieved. In the light of the company's financial situation, the board has decided to pay a dividend of 3 per cent of equity according to its policy.

Board of directors and auditors 2005/2006 | Chair: Ewa Back. | Members: Hjördis Berg, Annika Castwall, Åke Hillman, Benny Jönsson, Peter Lindell, Christina Salomonson, Ewa Ställdal, Håkan Sörman. (Hjördis Berg and Annika Castwall resigned and Bo Andersson and Ingrid Udén Mogensen were elected at the annual general meeting in 2006.) | Employee representatives: Ann-Cathrin Lööf, Åke Nordin. (Liselott Bäckström has replaced Åke Nordin since 30 March 2006.) | Auditors: Peter Lander, Ernst & Young and Göran Selander, Swedish National Audit Office.

SP Sveriges Provnings- och Forskningsinstitut AB was established in 1993 when the Riksdag resolved to incorporate the previous activity in the Swedish Testing and Research Institute. SP is the parent company of a group which also includes SMP Svensk Maskinprovning AB, SITAC AB, SIK -Institutet för Livsmedel och Bioteknik AB and YKI Ytkemiska Institutet AB.

OPERATIONS

SP is engaged in needs-motivated research and offers a broad range of services in technical assessment and measurement technology. SP is a player with a high level of multi-technical capacity and acts as a bridge builder and problem solver at all levels from development and manufacture to use and recycling. Close collaboration with universities, other institutions of higher education and other institutes serves as the basis for creating a credible and attractive operation. According to the agreement with the state, SP shall be responsible for national metrology by norm maintenance and R&D. Collaboration with certain other research institutions takes place in the jointly owned company United Competence Sverige AB.

FINANCES

In 2005, the group's net turnover increased to SEK 668 (549) million. The turnover includes payment of SEK 66.9 million from the state. Profit after financial items totalled SEK 32.7 (14.5) million. Investment was SEK 48.3 (77.1) million.

OBJECTIVE

The overall objective for SP, as part of the new infrastructure, is to increase the knowledge and competence required to stimulate innovations, growth and renewal in the business sector and in society. With regard to the responsibility for national metrology, the objective is to maintain norms of high standards and with sufficient extent and relevance. The long-term financial objective is that the operation is to generate the result required to finance development and investments in a research and testing institution at a European level. The long-term financial targets for SP are a 2.9 per cent net margin and 4 per cent return on equity.

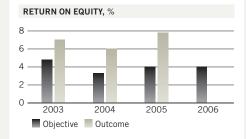

DIVIDEND POLICY

There is no dividend policy since the company does not have any dividend requirement from the owner.

ASSESSMENT

SP has continued to increase the level of competence and the proportion of highlyqualified projects. Collaboration with universities, other institutions of higher education and other institutes has been very good. There is an extensive international exchange of knowledge. The results are spread systematically and will be of use in business and society. The business sector is becoming increasingly international and competitive, which is making demands for continuous renewal. This requires access to resources for research and development. In this perspective, the market for SP's services appears to be good. SP collaborates in a number of applications to competence centres which are now moving on to finished proposals. SP has actively participated in the restructuring of the industrial research institutes that was substantially completed during 2005. On 31 December 2005, YKI Ytkemiska Institutet AB was incorporated in the SP group. The acquired institutes are being successfully consolidated. Reinforced contributions to industrial and research commissions have laid the basis for good financial results. Work on gender equality and diversity is taking place according to plan and is followed up by a special report on activities. SP's environmental management system complies with the requirements in ISO 14001. SP has obtained high customer ratings in an annual survey. The net margin and the return on equity amounted to 4.9 per cent and 7.8 per cent respectively. Both the overall objectives and the financial targets have been achieved.

Chair. Eva Pritt Custofeson

CEO: Curt Bylund

Specialfastigheter Sverige AB was established in 1997 by Vasakronan which previously managed the properties. The shares of the company were subsequently distributed from Vasakronan AB to the state and a company was thereby created which concentrated on owning and managing properties built for special purposes such as, for instance, prison and probation service properties and community youth homes. Specialfastigheter is the single largest owner of prison and probation service properties in Sweden.

OPERATIONS

Through its subsidiaries, Specialfastigheter owns properties built for special purposes, such as rescue services training colleges, prison and probation service properties and community youth homes. The properties are adapted for the long-term support of the tenants' activities. The largest tenants are the National Prison and Probation Administration, the National Police Board, the Swedish Armed Forces, the Swedish Rescue Service Agency, the National Board of Institutional Care and state special schools. Extensive new construction and refurbishment of the Kronoberg block in Stockholm on behalf of the National Police Board was largely completed in 2005. The project has cost just over SEK 1 billion and is Sweden's largest construction project in the twenty-first century.

FINANCES

Specialfastigheter's rental income increased in 2005 to SEK 1,058 (1,015) million due, among other things, to the completion of the Kronoberg block. In 2005, the group's profit after financial items amounted to SEK 187 (148) million. The improvement in earnings is largely due to a new lease for the extension for the National Police Board. Specialfastigheter's rental portfolio is characterised by long leases with public authorities. The average remaining lease term in the rental portfolio is about 15.7 years. The assessed market value of the company's property portfolio was around SEK 10.5 billion at the year-end.

OBJECTIVE

Specialfastigheter is to endeavour to have satisfied tenants by offering premises adapted to the operations and ancillary service throughout Sweden. The company's staff are to strive for continuous improvements by an active dialogue with the tenants on objectives.

The company's return on average shareholders' equity is to have the target, over a business cycle, of corresponding to the five-year government bond yield plus 2.5 percentage points. The company's equity/assets ratio should be 20 per cent. The company's financial targets are being revised due to the new IFRS accounting rules where market valuation of the properties is being made.

DIVIDEND POLICY

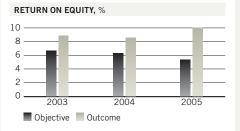

The group's dividend target should be to distribute to 50 per cent of the net profit for the year. In decisions on dividends, consideration is to be given to the company's financial position.

ASSESSMENT

A score of 76 was achieved in the 2005 measurement of the satisfied customer index, which is a good result compared with the real estate industry otherwise. The most recent survey of the satisfied staff index produced a score of 81 out of 100, which is a very good result in comparison with other companies and organisations. The company's return on equity was 10 per cent during the year. The dividend is at the level of the dividend policy and the equity/assets ratio has increased from 20.3 to 21.9 per cent since last year. The targets have been set over a business cycle. Specialfastigheter has complied with the owner's financial targets.

In 2006, the group's turnover and earnings are expected to increase slightly in comparison with 2005. The greatest challenge in the coming year is to cope with the capacity expansion for the company's biggest customers, primarily the National Prison and Probation Administration and at the same time increase the efficiency of property management operations.

Chair: Karl Petersen

CEO: Sten Ekström

Sho

Statens Bostadsomvandling AB

Statens Bostadsomvandling AB (Sbo) is a limited company that complements the activity carried out within the framework of the National Housing Board (since 1 January 2006 the National Housing Credit Guarantee Board) whose task is to assist municipalities with commitments for housing that they can not cope with. The purpose of Sbo's activities is to take over empty housing to develop it for another purpose on commercial terms.

OPERATIONS

The company's main objective is, within the framework of the agreements made with the National Housing Board and the respective municipality, to take over empty housing in the municipal housing stock, to develop it on commercial terms for another purpose or to wind them up by environmental demolition or dismantling/reuse. Sbo can also enter as a partner in municipal housing companies and invest risk capital which is to be subsequently recovered. Furthermore, the company can take over the whole or parts of a municipal housing stock to carry out restructuring and subsequently restore the housing to the municipality or another suitable owner.

FINANCES

During 2005, properties have been acquired in the municipalities of Överkalix (16 apartments) and in Hällefors (150 apartments). The year's acquisitions totalled around SEK 10 (2.3) million. The occupancy ratio has decreased to 73 (80) per cent due to the acquisitions. During the year, 19 empty apartments in Åsarna have been renovated and 11 apartments are now leased to the student home. Sbö's total rental income for the period amounted to SEK 3.5(1.2)million and net profit for the year totalled SEK 4(11.6) million.

OBJECTIVE

Sho has a special societal task of supporting municipalities by dealing on commercial

terms with surplus housing in municipalities with a decreasing population. The target for the company as a whole is that SEK 200 million of the SEK 540 million should have been recovered by the time the company is wound up. This means, translated into individual projects, that 37 per cent of the total project costs are to be recovered when the projects are concluded.

The company also has non-financial objectives in its operations. These are:

- At least 70 per cent satisfied tenants
- At least 70 per cent satisfied collaboration partners
- Reduced energy consumption in Porjus of 50 per cent in kWh within three years (from 2005).

DIVIDEND POLICY

There is no dividend policy since there are no dividend requirements from the owner.

ASSESSMENT

The company has invested in refining the acquired properties and made efforts to create demand for housing with a view to achieving the financial target. In Åsarna, housing has been converted into student homes for the ski upper secondary school and the company has participated in marketing initiatives for this school. In Porjus, measures have been taken to reduce energy consumption and project and marketing measures to bring new activities and new inhabitants there. The company has not yet succeeded in gaining the confidence of tenants in Porjus - only 46 per cent of those who answered a questionnaire said that they were satisfied, while the business partners are 65 per cent satisfied. In Åsarna, the business partners are 90 per cent satisfied. The target of halving energy consumption in Porjus within three years is a priority task with planned measures including heating some properties with pellets and heat pumps.

Board of directors and auditors 2005/2006 | Chair: Lars Magnusson. | Members: Ann Eriksson, Christina Rogestam, Björn Sundström, Björn Wellhagen. (Björn Wellhagen resigned and Ebba Vallgårda were elected at the extraordinary shareholders' meeting on 10 June 2005. Lars Magnusson resigned and Karl Petersen was elected as new chairman at the annual general meeting in 2006.) | Auditor: Per Bergman, KPMG.

Chair: Gösta Gunnarsson

CEO: Bo Johansson

The company was established in 1990 as the (National Road Administration's) Vägverkets Investeringsaktiebolag Väginvest and received commissions through the subsidiaries Stockholmsleder AB and Göteborgs Trafikleder AB to borrow funds on the capital market and then loan these funds to the National Road Administration for certain road investments in the Stockholm and Göteborg regions. In 1998, it was decided that the company would own and manage the state's shares in Botniabanan AB. In conjunction with this, the company changed its name to Statens Väg- och Baninvest AB and management of the shares was transferred from the National Road Administration to the Ministry of Industry, Employment and Communications.

OPERATIONS

The company's operations include different forms of project financing of infrastructure facilities as well as ownership and management of shares, participation rights and other rights in companies in the road and track management sector. During the year, operations have taken place in three areas; Administration of subsidiaries, including monitoring of owner interests and investigation of overall corporate matters, Finance operations focused on borrowing in Stockholmsleder AB, Göteborgs Trafikleder AB and Botniabanan AB, Consultancy operations in audit, cost accounting and financing.

FINANCES

During the year, activities in Stockholmsleder AB and Göteborgs Trafikleder AB have gradually been wound up and the loans in these companies have been transferred to the National Debt Office.

Botniabanan AB's borrowing continues at the National Debt Office and has increased during the year by SEK 2,915 million to SEK 7,795 million.

OBJECTIVE

To safeguard the state's ownership interests in Botniabanan AB.

DIVIDEND POLICY

There is no dividend policy since no dividend requirements have been made on the company by the owner.

ASSESSMENT

The reported result in both the parent company and the group comply with the plans made.

Board of directors and auditors 2005/2006 | Chair: Gösta Gunnarsson. | Members: Lena Erixon, Gunnar Holmgren, Ulrika Rosenberg. | Auditors: Per Wardhammar, Öhrlings PricewaterhouseCoopers and Bertil Forsslundh, Swedish National Audit Office.

The fee to the chairman of the board amounts to SEK 119,000 (118,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 60,000 (59,000) in 2006.

Chair: Sven-Eric Söder

Förvaltningsaktiebolaget Stattum

Förvaltningsaktiebolaget Stattum changed its name from Aktiebolaget Fortia to the present name in 2003. On the same occasion, the name of the then Förvaltningsaktiebolaget Stattum was changed to Sveaskog Holding AB. In accordance with the Riksdag's resolution, Förvaltningsaktiebolaget Stattum underwent restructuring in 2003 with a view to transferring the assets of Sveaskog AB to direct state ownership. Aktiebolaget Fortia is registered as a secondary name of Förvaltningsaktiebolaget Stattum.

OPERATIONS

Stattum is a management company with the task of managing certain shareholdings. The Stattum group now manages shares in the subsidiary Statsföretag and also holds treasury bills at a nominal amount of almost SEK 570 million. The company has been administered by the Ministry of Industry, Employment and Communications.

FINANCES

As a management company, Stattum has no income from operations and operating profit is accordingly negative. Profit after net financial items totalled SEK 7 million from interest income from financial invest-

OBJECTIVE

Stattum has no objective since the company does not carry out any business activities.

DIVIDEND POLICY

There is no dividend policy since the dividend requirement from the owner is set from year to year.

Board of directors and auditors 2005/2006 | Chair: Sven-Eric Söder. | Members: Lars Johan Cederlund, Eva Halvarsson, Margareta Gårdmark Nylén, Hans Ragnhäll, Ewa Widgren. (Eva Halvarsson resigned from the board before the end of her period of office at her own request due to her taking up another post.) Auditor: Roland Nilsson, KPMG

SVEASKOG

Sveaskog is Sweden and Europe's largest forest owner and manages 4.5 million hectares of land. The company is wholly-owned by the Swedish state. The state owns forest because long-term state ownership is an important national resource. The forest is an important raw material for the forest industry and for energy plants and it creates employment and opportunities for recreation. Sveaskog owns half of Sweden's largest wood industry company Setra AB which owns sawmills and additional refinement facilities.

OPERATIONS

Sveaskog manages 3.4 million hectares of productive forest land and is responsible for around 20 per cent of the supply of timber to industry. The company engages in $environmentally-focused forestry \ and \ gives$ priority to conservation on 20 per cent of its productive forest land. Sveaskog has decided to create 34 ecoparks where the company engages in modified forestry with the focus on ecology and recreation. The company sells forest land to individuals and the Swedish Environmental Protection Agency. During the year, Sveaskog started the subsidiary Sveaskog Naturupplevelser AB with the task of facilitating for local entrepreneurs to establish profitable companies with nature-based tourism on state land. Agreements have been entered into to sell the Frövi cardboard factory to Korsnäs AB. The acquisition is at present under consideration by the Commission from the point of view of competition.

FINANCES

Sveaskog's net turnover was SEK 6,155 (6,272) million and its operating profit SEK 871 (1,108) million. The poorer result is due to the storm in January 2005. 52,300 hectares (SEK 793 million) of forest land was sold. 44,700 hectares were sold within the framework of the land sale programme. 6,600 were acquired by the Swedish Environmental Protection Agency as replacement land and to create reserves.

OBJECTIVE

Sveaskog's forest land is to be administered in an exemplary way, both from the point of view of production and the environment, to secure long-term sustainable development. Sveaskog's forest management is to comply in the long term with market requirements for return on equity which the owner has set for the company. The operating profit from current operations (excluding property sales) is to be at least 7 per cent of the operating capital over a business cycle, which is equivalent to 10 per cent of shareholders' equity. The interest coverage ratio is not to be less than 2.0 and the debt/equity ratio should be around 1.0. The financial targets will be reformulated in 2006 due to the sale of Frövi and changed accounting principles.

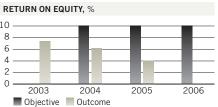

DIVIDEND POLICY

Ordinary dividend is to correspond to at least 50 per cent of the net profit over a business cycle. Consideration is to be taken to Sveaskog's consolidation requirements and financial position in other respects.

ASSESSMENT

Sveaskog's profitability has decreased due to the storm in southern Sweden in January 2005. The company's conservation work has won recognition. The targets for return on equity and forestry have not been achieved. Return on equity was 3.8 (6.2) per cent and return on operating capital 2.8 (3.6) per cent. Frövi is not included in these figures. Frövi has produced a good result. The interest coverage ratio was 2.3 multiples and the debt/equity ration was 0.4 multiples, which is above the targets. The company is paying the same dividend for the 2005 financial year as for the previous year, SEK 355 million, which corresponds to 58 per cent of the result for the year. The objective of managing forest land in an exemplary way from an environmental point of view and of treating 20 per cent of forest land as a nature conservation area is in the process of being achieved. The company has divided its land holding into 160 ecological landscapes and decided on the level of ambition for conservation in each landscape.

Board of directors and auditors 2005/2006 | Chair: Bo Dockered. | Members: Håkan Ahlqvist, Lars Johan Cederlund, Åsa Domeij, Lena Johansson, Birgitta Johansson-Hedberg, Christina Liffner, Maria Norrfalk, (Anna-Stina Nordmark-Nilsson were elected at the annual general meeting in 2006.) | Employee representatives: Pelle Eriksson, Sture Persson, Rolf Sellbrand. | Deputy employee representatives: Karl-Åke Kjellberg, Kurt Larsson. | Auditors: Torbjörn Köhler and Torsten Lyth, Ernst & Young and Filip Cassel, Swedish National Audit Office.

The company does not have a CEO.

SWEDCARRIER

Swedcarrier was established at the turn of the year 2000/2001 in conjunction with the incorporation of the public enterprise Statens järnvägar and its division into separate companies. The Swedcarrier group consists of the wholly-owned subsidiaries Jernhusen AB, EuroMaint AB, SweMaint AB as well as Nordwaggon, which is jointly owned (50 per cent) with Electrolux.

OPERATIONS

Swedcarrier's main business focus is to meet the needs of travellers through the property company Jernhusen for bus and train stations and other appropriate facilities and to realise the market values in other subsidiaries by sales. However, these sales are conditional on the companies subse $quently\ operating\ within\ the\ framework\ of$ a sound market structure. Jernhusen offers properties in the vicinity of communications to, above all, players in the travel and transport market. EuroMaint develops and produces maintenance and technical systems services in the railway, process and engineering industries. SweMaint is a supplier of maintenance services for goods trucks in the Swedish market. Nordwaggon is a logistics company in the railway sector that offers goods truck management, customer-adapted transport solutions and $modern\ railway\ trucks\ for\ goods\ transport.$

FINANCES

Operating profit for 2005 totalled SEK 462 (374) million, an increase of 24 per cent. The major part of the improvement was attributable to Euromaint due to the efficiency of the company's workshops. Two other subsidiaries also increased their earnings. This applied in the first case to Swemaint, where higher utilisation contributed to a doubling of earnings. The balance sheet was strengthened during the year as a result of increased unrealised values in Jernhusen's property portfolio. The visible equity/assets ratio amounted to 24 (20) per cent.

OBJECTIVE

The Swedcarrier group's activities are to produce a competitive return in comparison with corresponding external companies. In the case of Jernhusen, the development of net operating income and the long-term development of earnings are used as a measure of the efficiency of the day-to-day administration. The efficiency of the engineering companies (EuroMaint and Swe-Maint) is assessed on the basis of the operating margin. In the long term, the group's capital structure is to be such that the equity/assets ratio exceeds 30 per cent and the interest coverage ratio should amount at least to a multiple of two. The group's loans at the National Debt Office are to be replaced as soon as possible by market finance.

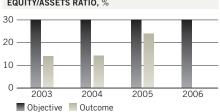

DIVIDEND POLICY

The group's dividend policy is that at least 50 per cent of the net earnings for the year should be distributed. No dividend is to be paid before the company has achieved its target for capital structure (equity/assets ratio).

ASSESSMENT

2005 was a new record year for the group, which meant that the target for the interest coverage ratio was achieved. All subsidiaries reported improved profitability. Jernhusen exceeded its target for return on equity by at least 12 per cent (outcome 16 per cent), with support of unrealised property gains and shareholders' equity below the longterm target level. Euromaint and Swemaint achieved their operating margin of 6 and 5 per cent respectively, which meant that the companies approached their long-term objective of 8 and 6 per cent respectively. The major subsidiaries Jernhusen and Euromaint, reinforced both their financial status although further consolidation is needed for them to achieve their targets for capital structure, and thus make it possible for Swedcarrier to pay dividend to the owner.

Board of directors and auditors 2005/2006 | Chair: Katja Elväng. | Members: Eva Halvarsson, Stig Holm, Rolf Lydahl. (Eva Halvarsson resigned at the annual general meeting in 2006.) | Employee representatives: Örjan Ersson, Bertil Hallén, Torgny Larsson. | Auditors: Ingemar Rindstig and Magnus Fredmer, Ernst & Young, and Bertil Forsslundh, Swedish National Audit Office.

The fee to the chairman of the board is SEK 207,500 (200,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 83,000 (80,000) in 2006.

Chair: Stig Jönsson

CEO: Hans-Erik Wiberg

Swedesurvey AB exports Swedish expertise in the field of surveying with the focus on real estate systems and information, and geographical information and information technology. This expertise is mainly obtained from the National Land Survey. The operations range from legislation to surveying and satellite pictures and often take place in the form of institutional co-operation.

OPERATIONS

The core activity is the transfer of knowledge and development of the survey organisations of other countries, in particular development of systems for registration of property, property information and geographical information. Close collaboration with the Land Survey enables Swedesurvey to supply holistic solutions with expertise from all parts of the survey operation. Rapid changes in the form of, for instance, high population growth and concentration to cities and coasts and increased competition for land and water resources, with subsequent environmental and climate problems, mean that access to land and how it is used plays an important role in the development planning of many countries. Services are received on commercial grounds with financing directly from the customer or alternatively through bilateral/multilateral organisations. The most important markets are Eastern Europe and Africa. Operations are also conducted in the Balkans, in Asia and Latin America. Competitors consist of a few in the Nordic area, and mainly in the rest of Western Europe, the United States, Australia and Canada.

FINANCES

Operations have developed positively in many respects. Demand for the company's services has increased greatly during the year and the total order inflow in 2005 is the largest in the company's history. The active order stock at the end of the year was SEK 205 (150) million, consisting of over 60 ongoing commissions. Over 20 new commissions were secured at a total contract value of around SEK 127 million. Operating income has also increased during the year and the trend of the last few years with falling operating income has thus been $reversed. \ The \ company's \ turn over \ amounted$ to around SEK 85 (80) million. The result was SEK 0.9 (1.1) million.

OBJECTIVE

The company's objective, working together with the National Land Survey, is to be a leading, well-known and well-reputed supplier of services and products within property systems and geographical information that develops and increases exports of Swedish services with satisfactory profitability. The company's target for 2006 is to increase turnover to at least SEK 100 million and achieve a result of at least SEK 2 million.

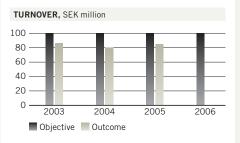

DIVIDEND POLICY

The company does not have an established dividend policy since the surplus is reinvested in the company with a view to securing the formation of capital and the long-term development of the operation.

ASSESSMENT

Important business objectives for 2005 were achieved, with the exception of the financial targets - turnover and result. New markets with good development potential were opened, including Macedonia, Croatia, Serbia and Romania. A new collaboration agreement between the company and the National Land Survey with a clearer division of roles and a developed business process has laid a good foundation for continued positive development. The company has participated in 20 competitive tendering procedures, of which 11 have been won. Contract operations have been carried out in over 30 countries. Swedesurvey contributes to a great extent to combating poverty, promoting women's rights, increased security, and a better global and local environment.

Board of directors and auditors 2005/2006 | Chair: Stig Jönsson. | Members: Eva Gianko, Christina Gustavsson, Monica Lagerqvist-Nilsson, Hans-Erik Wiberg, Anders Ågren. (Hans-Erik Wiberg resigned and Siv Hellén were elected at the annual general meeting in 2006.) | Employee representative: Gerd Lindroos. Auditors: Annika Wedin, Öhrlings PricewaterhouseCoopers and Örjan Måhlberg, Swedish National Audit Office.

The fee to the chairman of the board is SEK 0 (0) in 2006. Fees to the board members elected at the annual general meeting total SEK 35,000 (34,000).

Swedfund ...

Swedfund is a wholly state-owned risk capital company whose mission is to contribute capital and expertise for investments in Africa, Asia, Latin America and Central and Eastern Europe. Swedfund was established in 1979 as a foundation but was reorganised after a Riksdag resolution in 1991 to Swedfund International AB (Swedfund). The main motive for incorporation was to combine the activity with a commercial approach. Since the start in 1979, Swedfund has made more than 150 investments in different parts of the world.

OPERATIONS

Swedfund contributes risk capital in the form of shares or loans, mainly in connection with direct investments, but also by investments in risk capital and investment funds. Cooperation in developing countries, including the countries in the western Balkan peninsula, is to take place with the countries that according to OECD/DAC's definition qualify for development finance. Cooperation is to be concentrated on the poorest countries. The individual investments are expected to make a contribution to the country's development. The commitments shall also be of such a kind that they could not be financed as well be financed by the private market. In 2005, the board made 23 investment decisions and entered into 19 agreements (of which nine are share investments in Russia, Africa, India and China, among other places). During the year, a multi-year shareholding in a cement company in Tanzania has been divested and return flows from fund holdings in Africa, the Baltic republics, China and Latin America have been received. The company considers that continued investment activities at approximately the present level require a capital contribution from the Government. Swedfund's board therefore made a request to the Government in December 2005 for additional capital. The Government is at present considering the company's request.

In 2005, the company reported profit before appropriations and tax of SEK 94 (190) million. The reduction in relation to the previous year is explained by income from a substantial sale of shares that year. Total capital amounted in 2005 to SEK 1,471 (1,371) million with an equity/assets ratio of 80.9 (81.9) per cent.

OBJECTIVE

The company's overall objective is to contribute to the development of viable companies in developing countries and countries in Central and Eastern Europe. The operation is to be carried out in a way that combines the development objective with a businesslike approach. Swedfund shall endeavour to promote Swedish interests. The average return on equity before tax shall, according to the owner's guidelines, exceed the average interest rate on government debt with a one-year maturity. The return is measured over rolling three-year periods. The board has decided that the proportion of portfolio companies in the total portfolio with a positive return on the company's total capital is to increase from 63 per cent to 70 per cent during the current three-year period.

DIVIDEND POLICY

There is no dividend policy since the company does not have any dividend requirements from the owner.

ASSESSMENT

Swedfund has complied well with the target for the most recent three-year period with an average return of 11.05 per cent to be compared with the average interest on government debt of 2.71 per cent. The current portfolio contains 55 manufacturing companies of which 33 show profitability in their latest financial statements. According to the company's business plan, the relationship between the book value of investments in portfolio companies in relation to the balance-sheet total is to increase from 29 per cent at the turn of the year 2002 to 50 per cent at the end of 2005. At the turn of the year, the book value of investments was 43 per cent of the total assets.

Chair: Lana Frivan

CEO: Roberto G Bauducco

Swedish National Road Consulting AB (SweRoad) is a wholly state-owned company managed by the National Road Administration in accordance with a Riksdag resolution of 1982. The operations are carried out in close community of interests with the National Road Administration. The resource base is mainly the knowledge and experience at the National Road Administration. The National Road Administration's export activities are carried out in the form of cooperation with the equivalent authorities abroad and in the form of projects procured, in among other ways, by development assistance funding. SweRoad implements and manages international collaboration projects and carries out the procured commercial activities in its own name.

OPERATIONS

SweRoad carries out consultancy services outside Sweden, mainly to public authorities in the road and transport sector, traffic safety and institutional development. The services are provided on commercial terms with financing directly from the customer or through national and multilateral development assistance. The company's operations have taken place during the year in some twenty countries in Europe, Africa, the Middle East and Asia. Furthermore, foreign staff are administered on behalf of some Swedish public authorities. During the year, the company has continued to implement its quality assurance system and procured a new business system. A large strategically important project in Laos has been won in international competition and projects in Denmark, Iceland and Vietnam have been started.

FINANCES

Invoicing amounted in 2005 to SEK 65 million. Expenses amounted to SEK 63 million. Operating profit was SEK 2 million. Net profit totalled SEK 2 million primarily due to the Tax Agency which will very probably grant a repayment of special wage tax on pension costs for personnel who have been employed abroad for over a year in the period

between 1999 and 2004. The commissions are mainly finances by strong financial institutions and donors of development assistance with good solvency, and the project risks are accordingly relatively small.

OBJECTIVE

SweRoad is part of the National Road Administration, whose strategic intention for export operations is to make a reality of the National Road Administration's vision "We make the good journey possible" - by making Swedish road and transport expertise available for the rest of the world. This shall lead to the National Road Administration's international expertise being systematically developed and maintained in such a way as to comply in an efficient way with the goals of transport policy and to be able to safeguard the interests of Sweden, the Administration and other actors. The National Road Administration's staff shall therefore have the opportunity to work abroad and to learn about the cultures and working methods of other countries. The operations are based on the National Road Administration's common fundamental values - democracy, the rule of law and efficiency. These fundamental values apply to SweRoad. Activities are guided by the policy documents adopted by the National Road Administration and which also apply to SweRoad. The company has a business ethics policy and ensures that no violations of human rights take place within the company's sphere of influence.

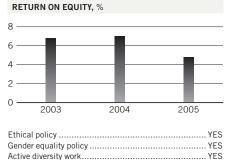

DIVIDEND POLICY

Dividend principles for the period from 2005 to 2008 have been produced by the administrator, the National Road Administration.

ASSESSMENT

The operations for 2005 have not lived up to expectations due to lower order inflow than expected, mainly due to delayed decisions on the part of the client's financiers (international institutions and development assistance organisation).

The fee to the chairman of the board is SEK 79,400 (78,600) in 2006 (two price base amounts). Fees to the board members elected at the annual general meeting total SEK 39,700 (39,300) in 2006 (one price base amount).

Chair: Olof Johansson

CEO: Magnus Ehrenstråhle

BILPROVNINGEN

The Riksdag resolved in 1997 that AB Svensk Bilprovning should continue to have sole right to carry out vehicle inspections as stipulated in the Road Traffic Ordinance. The company's objective is to promote road safety and to protect the environment by checking the standard of vehicles. Vehicle inspection services shall be available throughout Sweden. The state owns 52 per cent of the company, the remainder being owned by different private interest organisations.

OPERATIONS

Mandatory inspections and registration inspections in accordance with EU directives and national laws and regulations account for 97 per cent of operations. Prices are to be the same throughout Sweden and availability is to be good. In addition, certain services are provided on a competitive basis such as crane and lift inspections, voluntary brake tests and environmental checks and quality checks. These are carried out in the company's owns subsidiary.

FINANCES

Net profit fell by just over 18 per cent to SEK 72,469 (88,921) million mainly due to some inspections taking place at longer intervals which led to a reduced volume. The equity/assets ratio increased to 46(43)per cent. Bilprovningen invested SEK 142 million in 2005, among other things, in new - or refurbished - facilities which are to ensure a more efficient operation and a better working environment. The strong financial position made it possible to retain prices unchanged at the same time as earnings are expected to decrease in 2006 without jeopardising the financial position.

OBJECTIVE

The company is to promote road safety and the environment by control of the vehicle standard and to offer good availability throughout the country. The Government's decision on the pricing of Bilprovningen's

inspections stipulates that the company is to break even over a longer period of time. The equity/assets ratio shall be around 35 per cent according to the board's decision. In 2006, the owners are to reach an agreement on new financial and societal targets for Bilprovningen. It is expected to be able to decide on the financial targets at the annual general meeting in 2006 while the societal targets will be produced during the year.

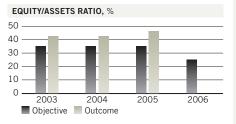

DIVIDEND POLICY

The owners have reached agreement that Bilprovningen can distribute 1 per cent of equity, although at most 50 per cent of net profit. Bilprovningen carries out statutory agency tasks as a monopoly and the state does not aim for a dividend to be paid although it accepts the joint owners' demand for a small dividend. A new dividend policy is to be decided upon with the overview of the financial targets now being undertaken.

ASSESSMENT

By means of production planning and new appointment procedures, Bilprovningen has succeeded in retaining good accessibility and has in principle eliminated the queues. The financial result has decreased slightly more than planned and the financial status is strong. At the same time, the company is now making substantial investments which is increasing the work load on the company and is a charge on earnings. The company is paying a dividend of SEK 5.2 (4.7) million which is in accordance with policy. Customer satisfaction is at high level, rising to 74 (66) per cent among corporate customers and 88 per cent among private customers in 2004. A new survey will be made in 2006. Through its work, Bilprovningen contributes to better road safety and a better environment. During 2006 the company will work together with the board to see how Bilprovningen's societal task can be better described and assessed.

SEK

AB Svensk Exportkredit (SEK) was created jointly by the state and the Swedish commercial banks in 1962 with a view to providing Swedish industry with better access to longterm financing and thus increase its competitiveness. Since 2003, the state has been the sole owner of SEK. SEK shall promote the development of Swedish business and the Swedish export industry through its activities.

OPERATIONS

SEK engages in financing operations and can otherwise participate in Swedish and international financing operations on a commercial basis. SEK also administers, on behalf of the state, the Swedish system for state-aided export credits at fixed interest (known as the CIRR system) and the state's development assistance credit system. In 2005, SEK's total volume of new customer financing solutions amounted to SEK 43.5 (27.5) billion in 2005. SEK 37.5 billion of this amount is for new lending in 2005, compared with SEK 22.7 billion in 2004. New export credits increased to SEK 11.3 (6.6) billion. New lending to the public and financial sector increased considerably. The largest part of lending to the public sector is for infrastructural investments. Lending to the financial sector largely concerns indirect lending to small and medium-sized companies.

FINANCES

Return on equity amounted to 10.6 (14.9) per cent after tax. Operating profit for 2005 was SEK 498(612) million. The result for 2004 was positively affected by a recovered loan loss of SEK 45 million. Net interest income totalled SEK 759 (802) million. Net interest income from debt-financed assets increased. The decline in total net interest income was due to a reduction of income from the investment portfolio. SEK's capital adequacy ratio was 15.9 (16.3) per cent at the end of 2005, which is equivalent to twice the minimum requirement according to Swedish law. Adjusted capital adequacy ratio (including SEK's guarantee capital of SEK 600 million) was 17.3 (17.9) per cent. SEK's rating for long-term liabilities is AA+ from Standard & Poor's and Aa1 from Moody's.

OBJECTIVE

SEK provides medium and long-term credits for Swedish export transactions and for investments. SEK is to promote the development of the Swedish business sector and Swedish export industry and otherwise to participate in international financing activity on a commercial basis. SEK is focusing on increasing its range of products and adapting activities to customer requirements. Operations are to be conducted so as to provide a satisfactory return on invested capital.

SEK's board establishes the company's business plan annually with financial targets and other objectives for a three-year period and evaluates these continuously. The most recently adopted business plan is for the three-year period from 2006 to 2008.

DIVIDEND POLICY

SEK's dividend policy aims at generating in the long term a market return on equity for the shareholders at the same time as the company is always to have risk capital which exceeds the legal requirements. The Government declared that SEK would have a restrictive dividend policy in the light of the reduction of core capital that took place in conjunction with the change of ownership in 2003.

ASSESSMENT

During the year, SEK has fulfilled its role of promoting the development of the Swedish business sector and Swedish export industry by the provision of credit focused on the export industry and financing of infrastructural investments.

Aktiebolaget Svenska Miljöstyrningsrådet (Swedish Environnmental Management Council) was established in 1995, among other things, to perform the tasks of Swedish registration body pursuant to the European Eco Management and Audit System, EMAS. Since 2003, the Swedish Environmental Management Council has also been responsible for administration and further development of the internet-based tool for ecologically sustainable procurement, the EKU tool. The company is owned jointly by the state, the Swedish Association of Local Authorities, the Federation of County Councils and the Confederation of Swedish Enterprises. The state's ownership is 85 per cent.

OPERATIONS

The Swedish Environmental Management Council is to support industry, the business sector and public administration by further developing its environmental work in a systematic and cost-effective way, and by providing those who describe the purpose and result of their environmental work openly with a form of recognition which can be understood nationally and internationally.

The Swedish Environmental Management Council manages and further develops three voluntary systems in the environmental field. EMAS describes how preventive environmental management work can be developed in stages, including planning, implementing, monitoring and continuously improving the environmental performance of an organisation. EPD is an international system for environmental product declarations entailing a fact-based method of describing the environmental performance of products and services based on a holistic perspective - from extraction of raw material to final waste management.

The third system is the EKU tool which provides guidance for procuring units within the state, local government and business sector to be able to include environmental aspects in connection with purchasing and procurement in the best way. Work on producing criteria as a support in procurement of a number of common product areas is an important part of the activity within the sphere of environmentally-compatible procurement.

FINANCES

Operations are financed by registration and annual fees from the organisations belonging to the EMAS and EPD systems. Moreover, the company participates in various project activities which produce some income. The company receives a government grant of SEK 3 million for work with the EKU tool for ecologically sustainable procurement. The grant has been increased to SEK 5 million for 2006. Turnover totalled SEK 6 (6) million. The equity/assets ratio was 79.7 (67.5) per cent.

OBJECTIVE

The financial objective is for the activities relating to EMAS and EPD to provide a sufficient surplus to make possible expanded and improved information services. One goal of the EKU activity is to gradually make it easier for procurers when stipulating requirements to enable the time and resources invested to lead to the greatest possible benefit to the environment, as well as resulting in a good agreement.

DIVIDEND POLICY

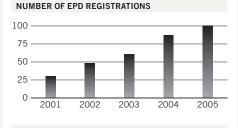

The activity is not intended to produce a profit for the owners.

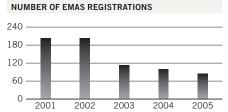

ASSESSMENT

A review of the company's activity was carried out for the amendment to the articles of association that was adopted in 2003. A new collaboration agreement has been concluded with the owners in the light of the changed articles of association and taking into consideration the entry of the Federation of County Councils as a partner.

During the year, the number of EMAS registrations has continued to decrease slightly, as has been the case in northern Europe. The number of environmental product declarations continues to increase slightly. Within the EKU area, the Swedish Environmental Management Council engages in active work to develop criteria for different product groups. The expectations of the stakeholders place increasing demands on the development of the EKU tool.

Board of directors and auditors 2005/2006 | Chair: Axel Wenblad. | Vice Chair: Eva Smith. | Members: Gunilla Blomquist, Annaa Mattsson, Lars Parkbring, Thomas Rostock, Sven-Olof Ryding, Inger Strömdahl, Ewa Torslund, Peter Wenster. (Thomas Rostock has resigned and Mats Calmerbjörk been appointed as per 1 November 2005). | Auditors: Jan Nordlöv and Stefan Älgne, KPMG.

Chair: Olof Rydh

CEO: Claes-Göran Borg

The Swedish Space Corporation (Rymdbolaget) launches rockets and balloons for research purposes and carries out reception of data from satellites at Esrange near Kiruna. The company develops space systems, mainly satellites, and airborne monitoring systems in Solna. Two-thirds of the personnel work at Esrange.

OPERATIONS

The Space Corporation engages in activities in four business areas: Esrange, Satellite Operations, Space Systems and Airborne Systems. Since spring 2005, the Space Corporation has been majority owner (75 per cent) of NanoSpace AB. The company engages in development in the field of micro-electro-mechanical systems for space applications. The activities at Esrange are carried out on the basis of agreements with research institutions in some European countries. During the year, collaboration with balloons started with NASA. Furthermore, the construction of the hotel was completed, which now offers 97 rooms for visiting customers and researchers. The collaboration with the Defence Materiel Administration in NEAT - North European Aerospace Text range - has intensified during the year. The development of the satellite system Prisma has continued on behalf of the Space Corporation and in close collaboration with the Swedish and European space industry. During the year, studies have also been made for a number of other projects, including the Swedish project SVEA. The development of the space system carried out in Solna is highly dependent on orders from the Swedish Space Corporation, and from the European space organisation ESA.

FINANCES

The net turnover of the Swedish Space Corporation amounted to SEK 422 (328) million, mainly through an increase in Space Systems. Net profit for the year amounted to SEK -14 (122) million. Earnings were greatly affected by the earnings from shares in associated companies. The equity/assets ratio amounted to 74.6 (76.7) per cent.

OBJECTIVE

Esrange is to reinforce its position as a leading facility for launching of probe rockets and balloons. Communication and control services for satellites are to be developed based on the current activities in Kiruna. The objectives are partly to reinforce the market position for reception and processing of data from polar satellites, to enter into partnerships for satellite control and to develop consultancy activities in the field. The development of space systems is to expand and obtain a higher share of its sales outside ESA/the National Space Board. The financial target is to provide a sustainable 11 per cent return on adjusted shareholders' equity. A new financial target was adopted at the annual general meeting in 2006 – the sustainable return on shareholders' equity is to be 10 per cent.

DIVIDEND POLICY

A dividend is to be paid of 35 per cent of net profit exceeding SEK 10 million. A new dividend policy was adopted at the annual general meeting in 2006 – 30 to 50 per cent of net profit is to be paid in dividend.

ASSESSMENT

The Swedish Space Corporation has had a good year in 2005 even though the turnover did not reach the expected level for the year. The result was poorer than expected at the beginning of the year, partly due to the postponement of launching several satellites that are to be taken care of by the Space Corporation. The commercial development in IP-TV at Stockholm Teleport has also been delayed. Increased development costs in Airborne Systems have also pulled down the result. Furthermore, the writedown of shares has been a charge on the result. The return on equity was negative during the year (20.1 per cent) and the financial target was thereby not achieved. A dividend of SEK 30 million was decided on for 2005 which exceeded the dividend policy.

The Swedish Ships Mortgage Bank (the bank) was established in 1929 with the task of facilitating finance for Swedish shipping companies and contributing to the renewal of the Swedish merchant fleet. The activities of the bank are subject to the Swedish Ships Mortgage Bank Act (1980:1097). The bank is not a limited company but a form of association of its own with a status under public law. The Government appoints the board of directors and grants the board discharge from liability.

OPERATIONS

The bank is to contribute to the renewal and modernisation of the Swedish merchant fleet. The bank finances shipping operations which are Swedish-owned or foreign-owned with substantial Swedish interests and primarily advances long-term loans against security in Swedish or foreign ships. The bank conducts its operations on fully commercial terms and in competition with other credit institutions. The bank is also commissioned by the Government to administer the affairs of the Board for Shipping Support.

FINANCES

The result amounted to SEK 56 million which is a decrease of SEK 7 million compared with the previous year depending on the low interest rate situation in the capital market which entailed a lower return on the securities portfolio. The reserve fund amounted to SEK 1,195 million. The bank has granted but not paid loans of around SEK 700 million and loan payments for 2005 totalled SEK 419 million. At the end of 2005, the loan stock was SEK 5,460 million. Total assets were SEK 6,654 million.

The return on equity was 4.9 per cent. Total assets are still strong and permit expansion.

OBJECTIVE

The bank is to be the first and natural partner for shipping companies. The bank's share of the total market is to increase through continued active marketing in among other ways. This is to take place by high demands for a businesslike approach and a good balance between competitiveness and profitability. The bank is to be able to offer shipping companies attractive and favourable financial solutions.

The bank has a strong balance sheet which permits considerable expansion. The capital adequacy ratio should be at least 12 per cent and the equity/assets ratio 10 per cent.

DIVIDEND POLICY

There is no dividend policy since the owner does not make any dividend requirements. The bank's profit is to be allocated in its entirety to the statutory reserve in accordance with the bank legislation. The bank does not therefore pay a dividend.

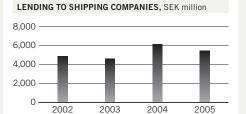

ASSESSMENT

The shipping industry is characterised by strong demand. Through efficient management of operations with few employees, the bank has contributed to the renewal and modernisation of the Swedish merchant fleet through attractive financial solutions. The market share is continuing to increase. At present, the market share of the fund is around 20 (18) per cent. The affairs of the Board for Shipping Support have been managed in an effective way. The bank's special expertise in shipping and its high level of services is appreciated by the shipping industry. The equity/assets ratio and the capital adequacy ratio amounted to 18 per cent and 21.1 per cent respectively. The bank has complied well with the financial targets set for the activity and had neither loan losses nor doubtful credits. During the year, the bank carried out good training for both employees and the board.

Chair: Anders Gustafzon

CFO. Jospan Kärrhrink

AB Svenska Spel was established in 1996 when Svenska Penninglotteriet AB and AB Tipstjänst were merged. The activity that Svenska Spel is to engage in is shown by Government Bill 1995/96:169. Svenska Spel has been granted a licence by the Government to arrange lotteries, number games and betting at sports competitions and slot machine games. The current licence for games, lotteries and slot machine games applies until 31 December 2006. Moreover, Svenska Spel or a wholly-owned subsidiary is licensed until 31 December 2007 to arrange casino games.

OPERATIONS

The ambition of the state is to endeavour for the gaming market to develop in a positive way within the framework of social responsibility, well-developed service and without the risk of the security of the operation being neglected. This is to be achieved while retaining and developing continued good profitability for organisations and the state.

Svenska Spel's assignment from the Government is through renewal and development to meet consumer demand for attractive lotteries and games. The assignment also includes to take particular account of international competition and to be able to offer a competitive alternative that meets the stringent demands of gaming responsibility.

FINANCES

The AB Svenska Spel group's gaming income fell by 3.1 per cent in 2005 compared with the previous year and totalled SEK 19,586 (20,207) million. Profit after financial items totalled SEK 4,569 (4,803) million, which is a decrease in the result of 4.9 per cent or SEK 234 million.

A fundamental reason for the decrease in the result is the reduction that took place in slot machine games (–6 per cent) primarily due to measures relating to gaming responsibility and also a smoking ban in restaurants that was introduced on 1 June 2005.

Svenska Spel is exempted from lottery and income tax. The company's profits are paid in to the popular and sports organisations and the Swedish state in the way specified by the Government.

OBJECTIVE

Svenska Spel's internal objective is expressed in the result objective laid down by the board. The result objective is geared to a long-term target and includes a balance between result level and assumption of responsibility. For 2005 the group's result objective after financial items totalled SEK 4,597 million. The deviation from this objective was SEK 28 million.

DIVIDEND POLICY

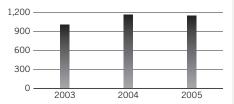

According to Svenska Spel's articles of association, no dividend payments shall made to the shareholder when distributing profit. All profits are to be disposed of in the way stipulated by the Government.

ASSESSMENT

In 2005, Svenska Spel met the targets set by the Government and Riksdag. Of the company's profit of SEK 4,569 (4,803) million, SEK 3,417 (3,634) million goes to the state and SEK 1,151 (1,169) million to organisations.

SVEDAS

Svensk-Danska Broförbindelsen SVEDAB AB (SVEDAB) was established by the Riksdag in 1991. Its objective, together with the company established by the Danish state, A/S Øresund, was to construct and operate the fixed road and rail link between Malmö and Copenhagen. The companies have set up a jointly-owned consortium - Øresundsbro Konsortiet (the Consortium).

OPERATIONS

SVEDAB shall – directly or indirectly through the Consortium - own and manage the Oresund Bridge and the Swedish landbased approaches to the Öresund Bridge. The group consists of the parent company SVEDAB and the Consortium (50 per cent owned), which is responsible for the Öresund Bridge. The Öresund Link has been financed by loans and is not to be a charge on the state budgets of the two countries. The expenses for construction, interest expense and current operating expenses are to be covered by charges from those using the Öresund Bridge. Sweden and Denmark have jointly decided that the operators using the rail part of the Öresund Bridge shall pay a fixed and unchanged charge per year. However, road users are to bear the larger part of the financing of the link.

FINANCES

The positive development of the Öresund Bridge has continued during 2005. The number of travellers has increased by 9 per cent and the income from road traffic rose by 11 per cent. This year's result shows that increased road income, low interest expense and lower operating costs have led to a reduction in the debt of the Öresund Bridge. It has been possible to make repayment four years earlier.

OBJECTIVE

The objective is to operate the fixed road and railway link between Copenhagen and Malmö.

DIVIDEND POLICY

The company has no dividend requirement from the owner.

ASSESSMENT

The very positive development of the Öresund Link is continuing and it has continued to increase integration between Sweden and Denmark this year and to make rail and road transport with the rest of Europe more efficient. At the same time, the link reduces the impact on the environment compared with the previous ferry traffic. Traffic is continuing to increase. The traffic forecast for 2005 has been exceeded by a broad margin. Road traffic has increased by 15 per cent compared with the previous year. Private car traffic has also increased by 15 per cent and lorry traffic by 17 per cent, while bus/coach traffic fell by 3 per cent. Rail traffic was unchanged compared with the previous year but goods traffic rose by 3 per cent. In all, 18 (17) million people crossed the Öresund Bridge. Just under 12 million people travelled by car or bus, which is an increase of 10 per cent, and just under 7 million travelled by rail, an increase of 6 per cent.

SBAB shall contribute to diversity and competition on the residential mortgage market. In 1985 SBAB took over the task of financing state residential mortgages which had previously been financed over the state budget. Competitive lending started in 1991 when SBAB was given, among other things, the right to offer first-mortgage loans in competition with other providers of mortgage finance. The special position on the housing credit market ceased in 1992 when all lending began to be run under own management and on the same terms as other mortgage institutions.

OPERATIONS

SBAB is the main challenger on the residential mortgage market with a market share of around 11 per cent. SBAB runs its operation with effective processes and uses the internet and the telephone as the most important channels of communication. A large proportion of private customers seek loans via the internet, which is one of the reasons why SBAB can offer one of the market's lowest residential mortgage interest rates. Continued good growth in lending to private customers has led to an increase in the portfolio to around SEK 156 (131) million, excluding securitisations.

In December 2005 the Riksdag resolved to approve the expansion of SBAB's assignment to include accepting deposits from the general public. Development of the core business of residential mortgages and corporate loans continues but during 2006 work is also going on to develop savings products. In 2005 SBAB, as the first residential mortgage player in Sweden, SBAB abolished the top loan for residential mortgage customers. This means that customers can borrow up to 95 per cent of the value of their home at the same rate of interest. SBAB insures its credit risk between 85 per cent and 95 per cent.

FINANCES

Operating profit totalled SEK 666 (678) million. Net interest income amounted to SEK 1,296 (1,214) million. This increase is the result of good development of retail market lending although falling interest rates have affected the yield negatively. Net commission totalled SEK -70(-38)million. Commission costs have increased as a result of the positive development of SBAB's cooperation. Expenditure has increased and totalled SEK 596 (505) million. The reason for this is higher volumerelated costs and staffing costs for 2005. In addition to this, SBAB has carried out many extensive development projects, partly as a result of adaptation to changes in legislation. Loan losses were low and the net total came to a positive SEK 36 million.

OBJECTIVE

The required return means that the operation, when seen over a business cycle, should give a return on equity equivalent to the interest for the five-year government bond plus 5 per centage points after tax, calculated over a business cycle.

SBAB should effectively contribute to competition on the home loan market. This objective is mostly measured through pricing on the market and is assessed continuously.

DIVIDEND POLICY

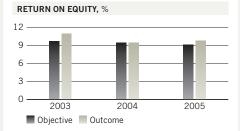

A third of net profit after tax in the fully state-owned company shall be distributed to the owner.

ASSESSMENT

SBAB's return on equity expressed as an average during the five-year period 2001–2005 totals 9.8 per cent and the required return for the same period was around 9.1 per cent, which means that SBAB has exceeded the owner's required return.

SBAB is not paying a dividend for the 2005 financial year. The reason is the capital requirement which SBAB has due to the strong growth during 2005 in lending to private customers and the future expansion and attendant capital requirement.

SYSTEM BOLAGET

Systembolaget AB is the special, stateowned company which, under the Alcohol Act (1994:1738), has an exclusive right to engage in retail trade with spirits, wine and strong beer. Systembolaget's operations are regulated not just by the Alcohol Act but by an agreement between the company and the state and by a state owner directive. In 1997 the European Court of Justice made a ruling that a state retail trade monopoly for alcoholic beverages organised and adapted as in the case of the Swedish Systembolaget did not contravene EC law. The state owns Systembolaget for reasons of alcohol policy.

OPERATIONS

The main task for Systembolaget is to sell alcoholic beverages to the general public. This exclusive right has a socio-policy objective and restricts the availability of alcohol. This restriction is enforced by the company's control of shop establishments and by ensuring that alcoholic beverages are not supplied to persons under the age of 20 or who are noticeably under the influence of alcohol or where there is reason to believe that the products are intended to be unlawfully supplied to someone. Systembolaget shall be a modern, efficient retail company which sells alcoholic beverages in a responsible manner and promotes a good drinking culture. Systembolaget has 411 shops in 323 places in the country and 560 agents throughout Sweden.

FINANCES

Net turnover increased to SEK 18,083 (17,708) million, primarily as a result of higher sales volumes for wine and beer. Profit before tax totalled SEK 513 (240) million. A total of 359 (348) million litres of alcoholic beverages were sold. The sales volume of wine and strong beer increased by 3.1 per cent and 3.5 per cent respectively while spirit sales fell by 2.3 per cent.

OBJECTIVE

The company should develop and clarify its social responsibility to help reduce the

negative effects of alcohol and give a good service to its customers while at the same time running its operation in a financially efficient way. The profitability target for equity should correspond in the long term to the ten-year bond rate with an addition of four percentage points, at present 7.4 per cent.

DIVIDEND POLICY

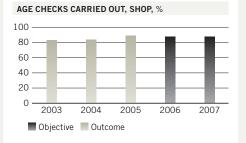

The dividend should total an amount equivalent to at least half of the profit after tax after taking into consideration the target for the equity/assets ratio, which is around 30 per cent. If profit consistently exceeds the profitability target, the customer should be allowed over time to benefit from this through adjustment of the trade margin.

ASSESSMENT

Return on equity totalled 18.9 (11.5) per cent. The equity/assets ratio came to 38.4 (38.9) per cent. Dividend totalled SEK 330 million, which corresponds to 100 per cent of the profit. One of Systembolaget's most important tasks is to prevent the sale of alcohol to persons under the age of 20. Tests of how the age check is working in stores and among the company's agents are made regularly. Age checks improved during 2005 and came to 89 (84) per cent, which is the highest value achieved since measurements based on the current method started in 2001. The result exceeds the 2007 target of requesting identification in at least 88 per cent of the inspection visits, both in the shops and among the agents. The improved result is an effect of the long-term work of ensuring that persons under 20 years of age are not able to purchase alcohol.

Systembolaget's opinion surveys show that 55 (53) per cent of Swedes wish to preserve the company's monopoly. This is close to the board's target for 2005. Public confidence in Systembolaget since 2001 has never been as high as in 2005. Systembolaget's social task is the most important reason why Swedes wish to preserve Systembolaget.

TeliaSonera

Telia was created in 1993 by incorporation of the National Telecom Agency. In 2000, Telia was listed on the stock exchange, whereupon the state's ownership decreased to just over 70 per cent. After authorisation from the Riksdag which permits the Government to change the ownership without restrictions, Telia was merged with the Finnish company Sonera to form TeliaSonera. Swedish ownership thereafter totals just over 45 per cent.

OPERATIONS

TeliaSonera is the biggest telecom operator in the Nordic countries and the Baltic States with an operation in fixed and mobile telephony plus internet and data communications. In Turkey, Russia and parts of Eurasia (Azerbaijan, Georgia, Kazakhstan and Moldova) TeliaSonera also owns operations that focus solely on mobile telephony. TeliaSonera does not consolidate its holdings in Russia and Turkey, but the company's long-term ambition is to achieve majority control of Turkcell. At the end of the year the group had around 80 million customers, 29 million being in the consolidated operation. The growth in mobile telephony has been considerable during the year, with 15 million new customers in Turkey and Russia, and 3 million new mobile customers in the Nordic countries and the Baltic States.

FINANCES

TeliaSonera's sales income increased from SEK 81.9 billion to SEK 87.7 billion as a result of strong volume growth within mobile and broadband. The tough price competition on the Finnish mobile market and on the Swedish market for fixed communication, however, had a negative effect on profitability and the group's earnings before depreciation (EBITDA) fell from SEK 30.2 billion to SEK 29.4 billion (excluding one-off items), which gives an EBITDA margin of 34 (37) per cent. Net profit fell by 4 per cent to SEK 13.7 billion and earnings per share thus came to SEK 2.56 (2.77). Investments increased by 12

per cent to SEK 11.6 billion. The reduced EBITDA and the higher investment level were offset by lower tax payments and positive changes in working capital and resulted in the group's non-restricted cash flow increasing from SEK 14.1 billion to SEK 15.6 billion. Sales and acquisitions gave a liquid outflow of SEK o.1 billion net, repurchase of shares gave a liquid outflow of SEK 10.2 billion, ordinary dividend a liquid outflow of SEK 5.6 billion while dividends to minority shareholders in subsidiaries, changes in financial receivables etc gave a liquid outflow of SEK 1 billion net. Visible net loan liability increased from SEK 7.0 billion to SEK 8.4 billion.

OBJECTIVE

TeliaSonera has chosen not to announce any financial targets.

DIVIDEND POLICY

TeliaSonera's dividend policy is to distribute 30–50 per cent of the net profit excluding minority shares in subsidiaries.

ASSESSMENT

For 2005 there is an ordinary dividend payment of SEK 1.25 per share totalling SEK 5.6 billion. An increased dividend is made against the background of the strong 2005 result and expected profit improvement in 2006. The dividend level lies within the framework of TeliaSonera's dividend policy. In addition to the ordinary dividend, Telia-Sonera has previously announced that the company plans to restore SEK 30 billion to its shareholders during the period 2005-2007. The company issues an extra dividend of SEK 2.25 per share, totalling SEK 10.1 billion, which will be the second stage of the three-year plan that has been announced for dividend over and above policy. Telia-Sonera's share price was relatively volatile during 2005 but in total the share price rose by 7 (+6) per cent while the exchange (OMX All Share Index) rose by 33 (+18) per cent.

Board of directors and auditors 2005/2006 | Chair: Tom von Weymarn. | Vice Chair: Carl Bennet. | Members: Eva Liljeblom, Lennart Låftman, Sven-Christer Nilsson, Timo Peltola, Paul Smits, Caroline Sundewall. (Paul Smits resigned and Lars-Erik Nilsson were appointed at the annual general meeting in 2006.) Employee representatives: Elof Isaksson, Yvonne Karlsson, Berith Westman. | Deputy employee representatives: Magnus Brattström, Stefan Carlsson, Arja Kovin. Auditors: Göran Tidström and Håkan Malmström, Öhrlings PricewaterhouseCoopers.

The fee to the chairman of the board is SEK 800,000 (750,000) in 2006. The fee to the vice-chairman is SEK 550,000 (550,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 400,000 (400,000) in 2006.

Chair: Håkan Tidlund

CEO: Bengt Broman

TERACM

Teracom AB, previously part of the National Telecom Agency, has since 1992 been an independent network operator distributing radio and TV programmes for SVT, TV4, SR and many other TV and radio channels to Swedish households. Today the broadcasts reach around 99.8 per cent of the Swedish population. At times of increased preparedness for emergency situations, Teracom fulfils a vital function as an information channel to the Swedish people.

OPERATIONS

Teracom distributes radio and TV to households throughout the whole of Sweden via a nationwide infrastructure and service organisation. The customers are public service companies and commercial companies. Teracom also offers open broadband networks to different regions in Sweden. Teracom also offers the opportunity for 3G operators to rent space in the company's infrastructure. To focus on the core operation and utilise the convergence between media and telecom the company was reorganised during the autumn. The parent company now has a joint sales organisation for its operation, Marketing and Sales. In addition to this the organisation has been divided up into different sections, namely Technical, Operation and Customer Service, Establishment and four corporate functions. Technical is responsible for technical systems and develops products and services, Operation and Customer Service is responsible for operation, service and maintenance of the company's network, products and services, and Establishment handles the establishment of installations and emplacements. There is also the Pay-TV operation run by the subsidiary company Boxer TV-Access.

FINANCES

The group's turnover increased during the year by 28 per cent to SEK 2,733 (2,141)

million. The operating margin was strengthened considerably from 8 to 13 per cent and the operating profit was SEK 361 (163) million. Pay-TV represents an increasing proportion of the company's turnover and operating profit and in 2005 comprised 42 (32) per cent of the group's total sales. This is an increase in the number of Pay-TV subscriptions of 42 per cent to 531,000. The year's net profit has doubled from SEK 137 to 278 million. During 2005 Teracom made investments of SEK 546 (466) million, mostly in the regional broadband networks and the expansion of the digital TV network which was started in the autumn. Cash flow before financing activity was SEK 381 (82) million and reflects the group's increasing profitability.

OBJECTIVE

The target for the group's equity/assets ratio is 40 per cent. The objective should be for a long-term return on equity of 10 per cent.

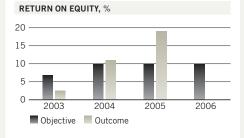

DIVIDEND POLICY

The dividend policy should total 40–60 per cent of the net profit. A prerequisite is that the conditional shareholders' contribution has been repaid.

ASSESSMENT

Teracom has a number of years of heavy investment behind it and also needs to invest in infrastructure. Despite this, the company has strengthened its financial position and can now show a positive result for the third year in succession since the financially strained situation during 2001–2002. The equity/assets ratio totalled 44 (38) per cent and return on equity totalled 19 (11) per cent. The dividend of SEK 150 (0) million represents 54 per cent of the net profit and is a first instalment on the conditional shareholder contribution of SEK 500 million that was made in 2003.

Board of directors and auditors 2005/2006 | Chair: Håkan Tidlund. | Members: Minoo Akhtarzand, Ingrid Engström, Lars Grönberg, Tobias Henmark, Claes Ljungh, Annika Nilsson. (Annika Nilsson resigned and Hillevi Larsson were appointed at the annual general meeting in 2006.) | Employee representatives: John-Olof Blomkvist, Claes-Göran Persson. | Deputy employee representatives: Stig-Arne Celin, Peter Howe. | Auditors: Anders Wiger, Ernst & Young and Leif Lundin, Swedish National Audit Office.

Chair: Claes Dahlbäck

CEO: Bengt Baron

Until 1994 V&S Vin & Sprit AB (V&S) had a monopoly on the import, export, production and wholesale trade of alcoholic beverages. As these markets were being opened up to free competition, the Riksdag resolved that V&S should be one of several competing companies in the market for these parts of the alcoholic trade.

OPERATIONS

V&S's operation includes the purchasing, production, packaging, distribution and marketing of alcoholic beverages. V&S is one of the world's ten largest international alcoholic beverages companies and is divided into three business areas: V&S Absolut Spirits, V&S Distillers and V&S Wine with wines and strong wines in northern Europe. Distribution in the northern area is mostly carried out through the company's own distribution channels in Sweden, Denmark and Finland. In Norway V&S is represented by the half-owned Amundsen, in Estonia by the subsidiary V&S Eesti and in Poland by V&S Luksusowa Zielona Góra. In the United States distribution is handled by Future Brands, which is 49-per cent owned. On most of the other more important markets distribution is handled by Maxxium, of which V&S owns 25 per cent.

FINANCES

The sales volume during 2005 totalled 24.9 (24.6) million 9-litre boxes. The group's invoiced sales excluding alcohol taxes increased to SEK 9,839 (9,264) million. The group's operating profit for 2005 increased to SEK 2,070 (1,633) million, which gives an operating margin of 21 (18) per cent. The operating profit increase of 27 per cent is explained both by improved price/product mix and reduced costs. The development of the dollar exchange rate has generated a positive contribution of around SEK 49 million. The year's net profit totalled SEK 1,506 (1,099) million. During the year the group's investments totalled SEK 1,227 (284) million and mostly relate to shares in subsidiaries and capacity and environmental investments in Åhus. Cash flow from operating activities totalled SEK 1,126

(1,315) million and liquid assets fell by SEK 836 (+504) million. Together with unused overdraft facilities, the group has a liquidity reserve of SEK 5,862 (6,357) million.

OBJECTIVE

The group's recorded equity/assets ratio should total at least 35 per cent. The greatest individual value in V&S (the Absolut trademark) is not to be found in the balancesheet, which is why target figures such as "return on equity" are misleading. The company's dividend policy has therefore been designed to impose demands on dividend level and profit development.

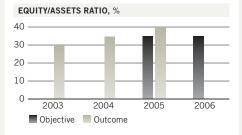

DIVIDEND POLICY

The group's dividend is expected in the long term to total 10.5 per cent of the average recorded equity. In determining the dividend, the company's financial position and expected capital requirements should be taken into consideration.

ASSESSMENT

V&S has gone from being a Swedish alcoholic beverages company to an international player with one of the world's strongest trademarks (Absolut Vodka) in a decade. In 2005, a total of 44 per cent of the group's sales came from North America while only 14 per cent of sales came from Sweden. Since such a large proportion of the company's income is generated in dollars, the company is extremely vulnerable to the exchange rate, and this impacts on economic development. However, the company works constantly to develop its product portfolio and cultivate the markets. In just four years the proportion of the group's total sales represented by North American sales fell from 52 to today's 44 per cent. The proportion of income from the vodka product group moved during the same period from 73 per cent of sales in 2001 to 59 per cent in 2005. V&S issues a dividend for 2005 of SEK 600 million, which represents 10.6 per cent of the average equity and the equity/ assets ratio at the end of the year was 40.0 (34.9) per cent.

KPMG.

Chair: Egon Jacobsson

CEO: Håkan Bryngelson

Vasakronan is a commercial real-estate company which owns office properties in Stockholm, Göteborg, Malmö, Lund and Uppsala. According to a Riksdag resolution of 1998, Vasakronan is responsible for improvement, development, administration and termination of commercial, property-related assets without long-term motives for state ownership and with the objective of achieving the highest possible long-term return on equity. Vasakronan is owned by Civitas Holding AB, which in turn is owned by the state.

OPERATIONS

Vasakronan manages 1.7 million square metres of property space, mostly offices. Vasakronan Service Partner, with around 100 employees, offers services to the tenants.

During the year InfraCity north of Stockholm was sold for SEK 1.4 billion. After the end of the year the company's holding in Norrporten AB was sold to the other joint owners through which Vasakronan received properties in Uppsala valued at around SEK 1 billion in part-payment. Investment and improvement projects are ongoing in all parts of the holding.

During 2005 the rental market has continued to be weak with tough competition for tenants. The overall vacancy level in Vasakronan fell during the year from 12 to 8 per cent, partly as a result of the sale of InfraCity.

FINANCES

The result of administration totalled SEK 1,194 (1,030) million. For 2006 the company expects an unchanged result. Vasakronan has been operating since 2005 in accordance with IFRS, which means among other things that properties are recorded at market value and that value changes affect the result. The market value at the end of 2005 was SEK 32.8 billion, an increase in terms of a comparable holding of 3 per cent. Properties at around SEK 1.6 billion have been sold.

OBJECTIVE

Vasakronan's financial target is designed to give a high total return, high dividend capacity, high growth capacity and financial stability. The target with regard to return is a return on equity equivalent to the risk-free interest plus 5 percentage points. The equity/assets ratio target, set against the background of property management being a capital-intensive operation, shall be at least 35 per cent in the long term. The interest coverage ratio shall be at least a multiple of 2.

The non-financial objective is that the main stakeholders, customers, employees, capital market, media and politicians should see Vasakronan as Sweden's leading real-estate company.

DIVIDEND POLICY

The dividend should be 3 per cent of equity, but not more than 30 per cent of the profit after financial expenses and standard tax. In addition to the dividend-related result there should be realised surplus values on property sales (net sales payment minus acquisition cost with additions for investments).

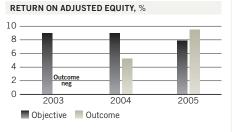

ASSESSMENT

Vasakronan's position on the premises rental market is strong. The property holding is well allocated and the tenants are very satisfied according to surveys jointly made in the sector. Vasakronan achieved a satisfied customer index rating of 79 against the sector average of 71. A slightly better business cycle in, among other places, the Stockholm area is reflected in the stabilisation of rental levels but continued weak competition where Vasakronan is coping well.

For 2005 the yield objective was 7.9 per cent while return was 9.5 per cent. The targets for the equity/assets ratio targets and the interest coverage ratio were exceeded for 2005.

For the financial year 2005 a dividend of SEK 254 (165) million was paid, which is equivalent to 30 per cent according to the dividend policy.

Board of directors and auditors 2005/2006 | Chair: Egon Jacobsson. | Vice Chair: Lars V Kylberg. | Members: Håkan Bryngelson, Lars Johan Cederlund, Hans Dahlgren, Birgitta Kantola, Christina Liffner. (Håkan Bryngelson resigned at the annual general meeting in 2006.) | Employee representatives: Ronny Bergström, Marianne Gustafsson. | Auditor: Ingemar Rindstig, Ernst & Young.

Chair: Sten Olsson

CEO: Håkan Steinbüchel

Vasallen AB was established in 1997 to work with municipalities and local businesses to develop and improve closed-down military buildings in order to turn them into attractive, vibrant parts of the town. When this process is completed, the properties will be sold on commercial terms.

OPERATIONS

Vasallen owns and is currently developing former military sites in 14 places: Kiruna, Boden, Östersund, Sollefteå, Falun, Strängnäs, Kristinehamn, Vaxholm, Södertälje, Visby, Linköping, Borås, Ängelholm and Karlskrona. The total property holding amounts to around 740,000 square metres of property space. The group's rental level totals 73 (74) per cent and most of the tenants come from the public sector. The sites are organised in subsidiary companies and the head office is in Örebro.

During 2005 Vasallen purchased seven sites that were no longer needed by the military following the defence review in 2004. The sites were in Visby, Strängnäs, Kristinehamn, Östersund and Vaxholm. Vasallen also sold several companies and properties during the year for a total of SEK 461 million.

FINANCES

Vasallen's turnover decreased during the year to SEK 369 (374) million. Rental income fell substantially to SEK 142 (255) million as a result of sales while contract income totalled SEK 222 (114) million. The profit from the sale of properties and companies totalled to SEK 63 million. The year's net profit of SEK 73 (96) million represents value changes in respect of the properties of SEK 67 (-23) million. During the year the property values have been written down by SEK 65 (65) million. Vasallen's property holding was valued at the end of the year at SEK 870 (989) million.

Investments increased to SEK 243 (163) million, of which the main projects were Arena Rosenholm in Karlskrona and premises for the National Board of Forensic Medicine and the National Laboratory of Forensic Science in Linköping.

OBJECTIVE

Vasallen's objective is to enhance the value of the property holdings and obtain a high level of rental income in order to make the properties attractive as acquisition objects in the commercial market. Since the start, Vasallen has acquired a total of 24 former military sites. Of these, 11 have so far been converted and sold.

Vasallen's return on average shareholders' equity over an enhancement cycle should be equivalent to the 5-year bond rate plus 2.5 per cent. Each subsidiary company should also achieve a positive operating profit after three years' operation and after five years' operation a positive profit after net financial items.

DIVIDEND POLICY

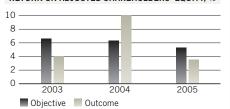

The dividend should amount to 30–50 per cent of the profit after deductions for tax.

ASSESSMENT

During the period 1998–2005 the return averaged 6.9 per cent, which is in accordance with the target. The dividend of SEK 76 million is equivalent to approximately the full year's earnings and exceeds the target. Most of the subsidiaries that Vasallen has owned for three years have achieved an operating profit. Fewer than half of the subsidiaries that have been owned for five years, however, have achieved a profit after net financial items. Weak business development in many places is having a negative effect upon the opportunities for developing the properties at the rate needed to achieve these objectives. In the property industry's annual customer survey, known as Fastighetsbarometern, Vasallen achieved the highest satisfied customer rating of 811).

Board of directors and auditors 2005/2006 | Chair: Sten Olsson. | Members: Jens Engwall, Marianne Förander, Lena Hedlund, Lars Johnsson, Jan-Peter Jonsson, Bo Netz, Holger Wästlund. (Bo Netz resigned and Biljana Petrovic were appointed at the annual general meeting in 2006.) | Employee representatives: Ann Eriksson, Richard Westling. | Auditor: Per Wardhammar, Öhrlings PricewaterhouseCoopers.

The fee to the chairman of the board is SEK 109,000 (105,000) in 2006, vice-chairman SEK 78,000 (75,000). Fees to the board members elected at the annual general meeting total SEK 54,000 (52,000) in 2006.

¹⁾ Explanation of satisfied customer index, the scale. Fastighetsbarometern's satisfied customer index measures, among other things, image, service, adaptation, reports of faults and premises. The industry average for 2005 was 71 and the results for the companies taking part ranged from 54 to 81.

Chair: Dag Klackenberg

CEO: Lars G Josefsson

Vattenfall AB (VAB) was established in 1992 after a Riksdag resolution in 1991, which aimed to make the management of the state's capital more effective, promote competition on the same terms as the competitors and take advantage of business opportunities abroad. The Riksdag has decided that VAB should be run in a commercial manner and should meet market return and dividend requirements. Within the framework of commercial operations VAB should be the leading company in the changeover to an ecologically and financially sustainable Swedish energy system.

OPERATIONS

VAB produces, distributes and sells electricity and heating mostly in Sweden, Finland, Germany and Poland. VAB has a market share of around 20 per cent in the Nordic countries, around 17 per cent in Germany and is the fourth largest electricity company in Europe. VAB is Europe's biggest producer of heating. VAB has five strategic ambitions: to be number one for the environment and for the customer, to maintain profitable growth, to be an attractive employer and to become a benchmark for the industry. The price of electricity in the Nordic countries rose by about 3 per cent compared with 2004 and in Germany by about 64 per cent. VAB is now carrying out an extensive investment programme involving just over SEK 45 billion in Sweden through to the year 2015.

FINANCES

Net profit more than doubled to SEK 19,235 million but this includes the cost of closing Barsebäck at a net figure of SEK 3.1 billion. The operating profit (EBIT) increased by 28 per cent to SEK 24,744 million, excluding items affecting comparability. The major part of the EBIT increase comes from Germany, which accounts for just over 40 per cent of EBIT. The result from the Nordic countries is helped by increased hydroelectric production and in Germany the result was boosted by higher prices. Poland also achieved an improved result (18 per cent).

OBJECTIVE

The long-term target is for VAB to achieve a return of 15 per cent on equity, for the interest coverage ratio to be a multiple of 3.5-5, and for a rating within the single A category. VAB's business objective within the commercial framework is to be the leading company in the conversion to ecologically and economically sustainable Swedish energy provision. The Government has judged that VAB should be responsible for at least 5 TWh of new electricity production from renewable energy in wind power, bioenergy and solar energy in Sweden from the 2002 level to 2010 on condition that the support systems that are in place are maintained, relevant permits given in reasonable time and the company has the opportunity to acquire rights on commercial terms. New financial targets were agreed at the 2006 annual meeting.

DIVIDEND POLICY

The dividend policy is to maintain a longterm stable dividend normally equivalent to a third of the profit after tax. At the 2006 annual meeting a new dividend policy of between 40–60 per cent of the net profit was agreed.

ASSESSMENT

Return on equity over a rolling five-year period was 17.2, the interest coverage ration excluding items affecting comparability was 8.4 and the rating single A minus. Dividend came to SEK 5,800 million, the largest ever. The dividend adjusted for the Barsebäck payment is equivalent to 36 per cent. The company's financial targets have thus been met and exceeded. As regards renewable energy, the board has agreed an action programme to achieve the target of at least 5 TWh. Due to lengthy planning and permit-provision processes it may take slightly longer than 2010. VAB has invested in Lillgrund, which will be Sweden's largest wind energy site, and is assessing wind power in Kliegers Flak. Together these can produce around 2.2 TWh of new wind power within the time period. Further projects are being carried out and evaluated.

Chair: Curt Persson

FO. Eva-Britt Guetafeson

Venantius is a credit market company. Its original assignment was to handle in a responsible way insolvency situations as they arose in the loan stock taken over from SBAB and to monitor the state's total costs relating to this work. The present focus of the assignment is to restore credit commitment to the ordinary credit market. In 1997 Venantius also took over the remaining assets and obligations in the Securum group and now has to run and phase these out.

OPERATIONS

Venantius has worked to assist in the reconstruction of (in particular) tenantowner associations. The long-term objective is to wind up the company's assets. Venantius is not to compete with other mortgage institutions over new customer loans. The assets consist of loans to tenantowner associations and property companies. In addition to this, there are residual claims, guarantees of responsibility, bankruptcies and disputes plus undertakings in the form of guarantees. These claims represent considerable amounts. During 2005 VF Finans (formerly Securum/Retriva) received SEK 58 million in respect of residual claims. Venantius also has responsibility for the liquidation and final archiving of records for a large number of companies and other assets, originally attributed to the Securum group. This monitoring and administration is expected to continue for a considerable time. Resources are therefore also required for this task after all the loan claims have been dealt with.

FINANCES

The group recorded a profit before tax of SEK 523 (894) million. Net interest income has fallen and totalled SEK 361 (447) million. The reduction is primarily due to a fall in loans. The year's recoveries total SEK 236 (624) million. The segment of the group

which derives from the former Securum group has made a positive contribution of SEK 78 million.

OBJECTIVE

The objective is to sell residual loans at long-term market value and actively monitor bankruptcy claims and pursue residual claims in order to obtain the best possible financial outcome.

DIVIDEND POLICY

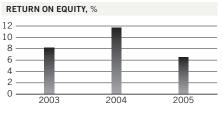

Dividend opportunities from the company are limited at present by the terms of the guarantees issued by the National Debt Office and by the fact that liquid resources must be made available in order gradually to redeem loans that are due.

ASSESSMENT

When Venantius was established, total loan losses over the period were estimated at between SEK 8-12 billion, which means that at the end of the project there should be a remaining capital of between SEK 1-2 billion from an original SEK 8 billion. When Securum/Retriva was acquired, it was calculated that this should bring the company over the period a further SEK 0.7 billion in equity. It was estimated that the state would be able to receive back a capital amount of between SEK 1.7-2.7 billion. Venantius' equity at the end of the year totalled SEK 7.8 billion, minus SEK 0.6 billion which was distributed in December. This substantially exceeds the original requirement. Of this, SEK 5.2 billion derives from the parent company's original operation and SEK 2.6 billion from Securum/ Retriva.

The return on equity totalled 6.5 (11.7) per cent. Dividend for 2005 totalled SEK 3 billion for the purpose of making the capital structure more efficient.

FO: Thomas Brühl

On 1 July 1995 the state and the tourist industry formed a jointly-owned company -Sveriges Rese- och Turistråd AB. The company is responsible for marketing Sweden as a tourist destination abroad and is also responsible for the trademark Sweden and "Sverigebilden", i.e. the image of Sweden, in the Swedish market. The tourist industry is of enormous importance both in terms of socio-economics and growth policy and is the object of state commitment in most countries. With very few exceptions, the world's largest industry has support from public through to national tourist organisations. The company changed its name in March 2006 to VisitSweden AB.

OPERATIONS

VisitSweden's main task is to take responsibility abroad for the overall marketing of Sweden as a travel destination. The state finances the company's core operation and the overall image marketing, "trademark Sweden", while the industry finances specified activities and product marketing in connection with the company's operation. The head office is situated in Stockholm. There is representation abroad in Denmark, Finland, Italy, Japan, China, the Netherlands, Spain, United Kingdom, Germany and the United States. The company has cultivated the following prioritised markets: Denmark, Estonia, Finland, France, Italy, Japan, China, the Netherlands, Norway, Russia, Spain, the UK, South Korea, Germany and the United States. This process is carried out through activities geared towards potential visitors, press, sales connections and transport companies. An important part of the marketing, apart from the traditional channels, is the Internet portal www.visitsweden.com.

FINANCES

Net turnover totalled SEK 129.9 (129) million. The state's basic contribution totalled SEK 86.9 million.

OBJECTIVE

The overall objective for the tourist policy is that Sweden should have a strong power of attraction as a tourist destination and a tourist industry with long-term competitiveness. The company should help to promote an increase in tourism through overall marketing of Sweden abroad as a tourist destination. The company should also work to ensure that companies and organisations in Sweden are able to improve the company's profitability and that Sweden as a nation is able to receive increased income and thereby increased prosperity.

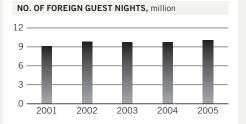

DIVIDEND POLICY

There is no dividend policy since the company has no dividend requirements from the owner.

ASSESSMENT

VisitSweden has run its operation in accordance with the direction laid down by its owners. International travel throughout the world increased by 5.5 per cent during 2005. In Europe the increase was around 4 per cent. Sweden as a destination showed a similar development during the year. Seen in the context of the last 15 years, foreign travel to Sweden has developed better than in the rest of Europe. The financial year 2005 was a record year for Swedish tourism. The number of guest nights in Sweden increased by 5.4 per cent. These are the highest volumes ever recorded. Accommodation revenues in hotels, youth hostels, holiday villages and campsites increased by 8.5 per cent. The number of foreign guest nights increased by 3.7 per cent. Sweden has the largest market share of foreign guest nights among all the Nordic countries. Sweden increased its market share from 27.8 per cent during 2004 to 28.6 per cent during 2005. Sweden has thus taken market shares from the rest of the Nordic region.

Board of directors and auditors 2005/2006 | Chair: Elizabeth Nyström. | Members: Anders Blomqvist, Leif Byman, Nils Carlsson, Elisabeth Haglund, Jan Kårström, Karin Mattsson, Olle Wästberg. | Deputy board members: Bengt Klaesson, Gunilla Mitchell. | Auditor: Alexander Hagberg, Ernst & Young.

The fee to the chairman of the board is SEK 90,000 (90,000) in 2006. Fees to the board members elected at the annual general meeting total SEK 45,000 (45,000) in 2006.

Voksenåsen 👯 Oslo

Voksenåsen A/S is Norway's national gift to Sweden. The operation has the task of strengthening affinity between Swedes and Norwegians and increasing the mutual understanding about each country's social life, language and culture.

OPERATIONS

Voksenåsen is a meeting place for cultural and societal life in Norway and Sweden. Voksenåsen's programme of activities consists of around 60 of its own events per year. These activities range from topical political and cultural events to a more long-term development of Swedish-Norwegian relations. Voksenåsen strives to build a comprehensive contact network of authorities and organisations in both countries. Most of the activities are focused on a broad segment of the public or on special vocational and interest groups; others have a more specialised youth profile such as Sommar Akademi Voksenåsen.

For Voksenåsen A/S 2005 has been an important year. In addition to marking the dissolution of the union in 1905, where Voksenåsen played a central role for the Norwegian-Swedish event both as organiser and partner with visits, exhibitions and seminars as special programme points, a reconstruction of the hotel and conference centre has been started.

FINANCES

Voksenåsen receives a grant of SEK 9.3 million from the Swedish Government for its programme of activities and the cost of premises. The operation should otherwise be financially self-sufficient.

OBJECTIVE

Voksenåsen's objective is to be a natural meeting place and a well-utilised forum of debate for cultural and societal life in Norway and Sweden. The programme of activities should promote affinity between Swedes and Norwegians, safeguard freedom of expression and work for respect and tolerance in a multicultural society.

DIVIDEND POLICY

The operation should be non-profit-making, so there is no dividend policy.

ASSESSMENT

The degree of target fulfilment is good. Voksenåsen has worked with great awareness throughout the year to reduce the company's financial vulnerability.

During the last few years Voksenåsen has also helped to bring to fruition a number of book publications highlighting the relations between Sweden and Norway. The official jubilee publication was presented on 11 June 2005 by authors Bo Stråth and Francis Sejerstedt to each country's Head of State, Carl XVI Gustaf and Harald V.

During the year there was also a commemoration of the fact that it was 50 years ago that Prime Minister Einar Gerhardsen presented Voksenåsen as a gift to Tage Erlander.

Companies undergoing restructuring

ZENIT SHIPPING AB, 556031-2919

Zenit Shipping AB was founded in the 1930s as a subsidiary of the privately-owned AB Götaverken for the purpose of acting as a buyer of ships built on the yard's own account. In connection with the nationalisation of Götaverken when Svenska Varv AB was founded in 1977, Zenit Shipping was given a more active role. During the shipping crisis, trade debts for which customers could not honour their payments were assigned to Zenit Shipping AB.

The Riksdag resolved in the spring of 1983 to reconstruct Svenska Varv, and Zenit Shipping was used as an instrument in this process.

All bad debts were assigned to Zenit Shipping with the result that Svenska Varv's balance sheet was cleared. SEK 3,000 million was contributed to Zenit Shipping AB.

An arrangement was reached with the Swedish National Debt Office in 1985. This meant an undertaking whereby conditional additional funds would successively cover the losses incurred during the liquidation of ships within a framework of SEK 1,700 million. Up to the end of 1989, the company had received SEK 1,181 million. The amount was fully repaid between 1990–1995. Of the remaining contribution of SEK 1,093 million, SEK 107

million has so far been repaid. At most, Zenit Shipping controlled 6,400,000 dwt spread over approximately 40 ships. All ships have been disposed of in accordance with a Riksdag resolution.

Zenit Shipping has been assigned the task of liquidating the company with the best possible result. In 2005, the company continued to wind up its commitments from previously-owned ships. Funds received are used for repayments to the Swedish National Debt Office for previous conditional contributions. Zenit Shipping's activity is expected to be wound up during 2006.

SAKAB AB, 556129-9537

SAKAB AB (formerly Svensk Avfallskonvertering AB) was established in 1975 with the task of as sole company, taking care of the final disposal of environmentally hazardous waste. SAKAB offers environmental services for hazardous waste. As well as receiving waste, this activity includes pre-processing, intermediate storage and mainly processing of waste. The company works for a non-toxic environment and is the obvious and leading solver of problems within the sphere of hazardous waste.

In 1990, the Government was authorised, after a resolution by the Riksdag, to sell shares in SAKAB. It was required that at least 51 per cent of the shares were to be retained by the state and the municipalities (the Swedish Association of Local Authorities). In 1991, the Government made a further request to the Riksdag for authorisation to sell the state's shares in SAKAB. The Riksdag again granted the Government consent to sell shares in

SAKAB. No comments were made this time on restrictions in the sale of shares.

On sale of the shares, the Government adopted directives according to which the state was to have continued insight into SAKAB by retaining a minority holding of around 10 per cent of the shares in SAKAB, by board representation and in other ways. In August 1992, the state sold 90.1 per cent of its shares to WMI Sellbergs AB. At the time of sale, the state was given an opportunity of selling further holdings within three years. This possibility was made us of in autumn 1995 when the remaining shares, with the exception of one share, were sold to WMI Sellbergs AB. The remaining share ensured that the state would have a continuing insight into the company, among another ways, by being represented on the board. Since I January 2000, Sydkraft (now E.ON Sverige AB) has been the main owner of SAKAB. The French group SITA owns 9 per cent and one share is owned by the state. In conjunction with the

sale of SAKAB to Sydkraft, the name was changed to Sydkraft SAKAB AB.

The Riksdag abolished the monopoly of treatment of hazardous waste from 1994. With this decision, SAKAB's sole right to handle hazardous waste in Sweden ceased. In the light of this, the Government requested the Riksdag in May 2003 to authorise the Government to sell the state's share in Sydkraft SAKAB AB. The Riksdag adopted the Government's proposal in October 2003.

On 15 March 2005, it was decided to change the name of the company, Sydkraft SAKAB AB, which is subsequently to be known as SAKAB AB. The change of name was not due to a change in ownership, however.

The decision on authorisation to sell the state's share in SAKAB AB was taken by the Government on 16 March 2006. A transfer agreement was signed in connection with this decision

A historical overview

A historical overview of the state-owned companies is given below. The account is given in summary form stating interesting and important events, both major and minor. The purpose is not to give a complete and thorough historical description but to give a background to present-day active government ownership.

- 1968 The government initiates co-operation within the nuclear power sector. ASEA-ATOM is formed, owned jointly by ASEA and the Government.
- 1969 The Ministry of Industry is formed and the majority of state-owned companies are allocated to it.
- 1970 The Swedish state-holding Statsföretag is set up in order to co-ordinate large limited companies within sectors such as mining, steel, forestry, and petrochemicals. Apoteksbolaget is founded.
- 1971 Värdepapperscentralen (VPC) is set up as a central service organisation in conjunction with legislation on simplifying share transfers (SFS 1970:596). Apoteksbolaget assumes sole rights in Sweden with regard to the retailing of pharmaceuticals.
- 1972 KabiVitrum is founded.
- **1974** PK-banken is formed through the merger of Postbanken and Sveriges Kreditbank.
- 1977 Svenska Varv is formed in conjunction with the Government taking over Salén-Invest's shares in Götaverken.

 The group also includes Arendal, Cityvarvet, Finnboda Varf, Karlskronavarvet, Uddevallavarvet and Öresundsvarvet. An extensive restructuring programme is commenced.

- 1978 Scandinavia's leading steel producer, SSAB, is formed from a reconstruction of Sweden's three largest producers of commercial steel. The state and Statsföretag own 75 per cent and Gränges 25 per cent of SSAB.
- 1979 Kockums is incorporated into Svenska Varv.
- 1980 SSAB and Statsföretag jointly account for 20 per cent of Sweden's industrial investment. Tobaksbolaget forms the basis of the formation of Procordia as a wholly-owned subsidiary group of Statsföretag focusing on consumer goods.
- 1981 The official communication "Redogörelse för företag med statligt ägande" (Report on state-owned companies) is presented and submitted to the Riksdag for the first time. The Government transfers its 50 per cent shareholding in ASEA Atom to ASEA. The JAS industrial group is set up, with the Government as part owner through the Swedish National Industries Corporation (FFV).
- 1982 Posten (the Swedish Post Office) markets the fax machine as "remote copying". Svenska Varv is reconstructed.

 Closure of the large shipyards continues.
- 1983 Swedes order a total of 607,900 telephones from the Swedish Telecommunications Administration (Televerket).

- 1984 Nokia acquires 70 per cent of the TV manufacturer Luxor.
- 1985 The monopoly on telephones held by the Swedish Telecommunications Administration is brought to an end. Statsföretag changes its name to Procordia. Procordia is restructured through the sale and acquisition of companies.
- 1986 The 100 per cent state-owned Sveriges Petroleum (SP) merges with Oljekonsumenternas förbund (OK), the Swedish oil consumers association, to form OK Petroleum with the Finnish state-owned company Neste as part owner. The first partial privatisation of SSAB is carried out through the acquisition of Gränges' shareholding and the sale of one-third of the shares in SSAB to a small number of institutions.
- 1987 Procordia is listed on the stock exchange in conjunction with a new issue. The Swedish Civil Aviation Administration resolves on a new programme of investments that includes a new domestic terminal and a third runway at Arlanda Airport. The Swedish Maritime Administration becomes a public enterprise and is permitted to use its depreciation funds to finance investments. The state takes over Grängesbergs Gruvor from SSAB.

- 1988 Statens Järnvägar (SJ) is split up. Banverket, the National Swedish Rail Administration, becomes responsible for the track network and SJ for train services
- 1989 The centenary of the National Telephone Network. Grängesbergs Gruvor ceases operations. LKAB opens up a new main mining level in Malmberget. Procordia, Pharmacia and Volvo's food company Provendor merge to form the new Procordia group with Volvo and the Swedish state as the largest owners, each having 42.5 per cent of the votes. SSAB-shares are listed on the A-list of the Stockholm Stock Exchange.
- 1990 PK-banken acquires Nordbanken. The holding company, Förvaltningsaktiebolaget Fortia is established. SJ sells substantial property holdings for SEK 1,800 million. The majority-owned ASG is listed on the stock exchange and the X2000 high-speed train is introduced on the Stockholm-Gothenburg line. The Swedish Civil Aviation Administration group is formed with a clear division between its commercial activities and its role as an administrative authority.
- 1991 The Riksdag resolves to wholly or partially privatise 35 companies and liquidate the holding company Förvaltningsaktiebolaget Fortia. Posten encounters competition in the letter market when

CityMail begins operations. The public enterprise FFV is restructured into a limited company.

- 1992 The Swedish Forest Service (Domänverket) becomes Domän AB. Vattenfall becomes Vattenfall AB. In conjunction with this, the grid network and foreign connections are separated to form a new public enterprise, Svenska Kraftnät. A public offer for the government's shareholding in SSAB is made in the form of a rights issue in combination with government bonds. A new housing loan system is introduced and Statens Bostadsfinansieringsaktiebolag, SBAB becomes fully exposed to competition. SAS acquires 50 per cent of Linjeflyg to form a fully integrated domestic airline. Atle and Bure are set up with some of the money from the defunct wageearners' investment fund and those companies which had paid in profitsharing tax become part-owners. Trygg-Hansa acquires Gota. Gota files for bankruptcy and is acquired by the government in December. Securum is set up to deal with the problem loans that arose in Nordbanken as a result of the financial crisis.
- 1993 State property management undergoes a change when the National Board of Public Buildings (Byggnadsstyrelsen) ceases to exist and authorities and public enterprises are permitted to operate freely in the property market. Vasakronan takes over the state's com-

mercial properties worth SEK 17.3 billion. Procordia grows by acquiring companies, including Erbamont, an Italian company. Volvo and the Swedish government agree to work to divide Procordia into two parts. Through an exchange of shares with Volvo, the state becomes the majority shareholder of one of these, Pharmacia AB, which focuses on pharmaceuticals. Volvo becomes the majority owner of AB Procordia, which operates in such sectors as food and tobacco. Posten's monopoly on the distribution of letters ceases. The government sells 75 per cent of its shares in the defence group Celsius and the share is listed on the A-list of Stockholm Stock Exchange. Assi AB and Domän AB are merged into AssiDomän AB, which bids for NCB. Fortia is liquidated. Securum contributes SEK 10 billion to save Nordbanken.

- 1994 On I January 1994, A-Banan projekt AB is set up in order to construct the Arlanda Link, a train link between Stockholm and Arlanda Airport. This is the first infrastructural project in Sweden to be jointly financed by the government and the business sector. During the year, the remaining shareholdings in SSAB, OKP, and parts of AssiDomän AB and Pharmacia are sold.
- 1995 New alcohol legislation comes into force and V&S Vin & Sprit's monopoly ceases. Pharmacia and the American pharmaceuticals company UpJohn merge.

PK-banken acquires Nordbanken. ASG is listed on the stock exchange.

The Swedish Forest Service and Vattenfall are formed into companies. The power grid becomes a public enterprise, enska kraftnät. The Government sells SSAB. SSAB exposed to competition, SAS buys Linjeflyg. Securum is formed

Vasakronan takes

AssiDomän AB and Pharmacia are sold on the stock market A-Banan projekt AB is formed in order to co-finance the Arlanda Link.

The electricity market is opened up to full competition.

The Ministry of Industry, Employment and Communications is formed witha special division for state ownership matters. Sveaskog AB is separated from AssiDomän. The Government sells SAQ Kontroll and VPC

SJ is split into SJ AB, Green Cargo AB and AB Swedcarrier Sveaskog acquired AssiDomän.

2000

Telia and Sonera decide to merge on 26 March. Assi Domän is delisted from Stockholmsbörsen on 28 January 2002.

The Riksdag accepted the Government bill on Green Cargo AB. Vattenfall and Vasallen were awarded a prize in October at the seminar Genomlyst 2004 for good financial reporting.

2005

V&S Vin & Sprit's monopoly ceases Pharmacia merges with UpJohn.

Penninglotteriet and Tipstjänst become AB Svenska Spel, MeritaNordbanken is formed

Telia and Telenor Talks are discontinued in the autumn.

1999

Telia's shares are listed on the stock exchange. Celsius is sold. The Öresund Bridge is inaugurated Vattenfall expands in Germany and Poland Merita Nordbanker becomes Nordea AB.

2001

The state's shares in Svenska Skogsplantor are transferred to the wholly state-owned Sveaskog on 1 April. The Swedish state becomes sole owner of SEK after acqui sition of ABB's 35 per cent share

The Stockholm Stock Exchange started to apply the Code and SBAB's mission was expanded to include accepting deposits from the general public.

2004

35 companies is over the commercial decided by the Riksdag. The public enterprise FFV is made a limited company.

Privatisation of

property of the Govern ment. The Government becomes majority owner in Pharmacia and releases food and tobacco to Volvo. The Post Office Administra tion becomes Posten AB.the monopoly for distribution of letters ceases. Celsius is listed. AssiDomän AB is formed.

- 1996 The situation of the AmuGruppen becomes critical during the autumn and the government contributes SEK 600 million to save the company from bankruptcy. This is the first year of full competition in the electricity market. The disposal of Securum's assets as a result of the realisation of security is almost complete.
- 1997 SBL Vaccin is sold to Active in Malmö.

 Svenska Penninglotteriet (the national lottery) and Tipstjänst AB merge and become AB Svenska Spel. A ruling by the European Court of Justice allows Systembolaget to retain control of its monopoly on the retail sales of alcohol.

 Merita and Nordbanken make public their intention to merge and form

 Merita Nordbanken
- 1998 The Ministry of Employment and Productivity, the Ministry of Communications, the Ministry of Economics and Trade are merged to form the Ministry of Industry, Employment and Communications. Responsibility for sector policy and ownership issues is separated to a greater extent.
- 1999 The remaining shareholding in Pharmacia & UpJohn is sold. The merger between Telia and Norwegian Telenor is approved during the spring, but at the end of December, the parties decide to terminate the co-operation and Telia and Telenor continue as separate companies. Sveaskog AB s formed through the transfer of forest assets from Assi-Domän. The government sells its share in SAQ Kontroll and VPC.
- 2000 A restructuring of both the Swedish and the international defence industry takes place when the stake in Celsius-equivalent to 25 per cent of the share capital and 62 per cent of the votes is sold to Saab. Telia is listed on the stock exchange in June and becomes Sweden's most popular share. The Öresund Bridge between Malmö and Copenhagen is inaugurated on 1 July and the public enterprise Svenska Kraftnät is tasked with rolling out broadband infrastructure to all municipalities. Vattenfall becomes one of Northern Europe's

- largest energy companies through the acquisition of the East German energy companies VEAG and LAUBAG for SEK 14 billion The public enterprise SJ is restructured into limited companies. The Ministry of Industry, Employment and Communications introduces an index intended to gauge the e-maturity of state-owned companies. Nordea AB becomes a Nordic bank after the merger with UniDanmark and Norwegian Kreditkassen. The Swedish state's shareholding is reduced to 18.2 per cent. Vasakronan AB wins a prize for the best annual report in 2000.
- 2001 At the beginning of the year, SJ is restructured into three operating companies/groups: SJ AB, Green Cargo AB and AB Swedcarrier with subsidiaries. V&S Vin & Sprit commences cooperation with Jim Beam Brands and the distribution company Maxxium regarding the group's international products. Sveaskog AB acquires AssiDomän AB. The shareholders in SAS' three parent companies exchange their shares for an equivalent number of new shares in SAS AB, the newly-formed parent company of the SAS group. The Riksdag votes in favour of extending the opening hours of Systembolaget's liquor stores to Saturdays on a permanent basis in all of Sweden from 1 July 2001.
- 2002 Telia and the Finnish company merge to form TeliaSonera, thereby creating the leading telecommunications operator in the Nordic countries with approximately two and half times as many subscribers as the nearest competitor both in the fixed and mobile networks and one of Stockholmsbörsen's largest companies After the merger, the largest shareholders in TeliaSonera are the Swedish state with 46 per cent of the votes and capital and the Finnish state with 19 per cent.
- 2003 In response to a proposal from the government, the Riksdag resolves in March to transfer the state's shares in Svenska Skogsplantor to Sveaskog (also a wholly state-owned company), which took place on 1 April.

The Swedish state acquired ABB's

holding of 35 per cent of Svensk Exportkredit (SEK) and became sole owner of SEK after the acquisition.

2004 In June, the Riksdag adopted the government bill on Green Cargo. The bill aims at creating a long-term sustainable solution for Green Cargo and provides the company with good prerequisites to continue to develop its operations, not least by making possible different forms of collaboration with other undertakimgs. Bothia Garanti AB changed its name to Statens Bostadsomvandling AB (Sbo) Vasallen and Vattenfall were awarded a prize for good financial reporting in connection with the Ministry of Industry, Employment and Communications' seminar Genomlyst-2004, a seminar which focused on reporting by state-owned companies.

2005 "The Swedish Code for Corporate Governance" (the Code), which is intended to contribute to improved governance of Swedish limited companies, started to be applied by the Stockholm Stock Exchange from 1 July. The Code was also the focus for the customised training for board members of state-owned companies arranged for the second year running. Two new state-owned companies, Innovationsbron AB and Arbetslivsresurs AB, were created and in December the Riksdag decided to expand SBAB's mission to include accepting deposits from the general public. SAS was announced as winner in the competition Genomlyst2005.

2006 The state sold the last share in SAKAB AB on 16 March. Sveriges Rese- och Turistråd AB changed its name in March to VisitSweden AB.

The summary contains the changes that have taken place between 1986 and May 2006 excluding the holding in Securum.

Accounting principles and references

The companies included in the consolidated accounts are limited companies in which the state's shareholdings are managed by the Government Offices and the Swedish Ships Mortgage Bank. Limited companies managed by other authorities including the Riksbank and by foundations are thus not included in the consolidated accounts.

Companies, where the state has an ownership share of less than 20 per cent or which are in process of being wound up, are not included in the consolidation. Associated companies, with an ownership share exceeding 20 per cent, have been included according to the ownership share as regards the result. The newly established company Arbetslivsresurs AR AB is not included in the summaries.

The public enterprises, that is the Civil Aviation Administration, the National Maritime Administration and Svenska Kraftnät, are no longer included in the summaries.

The reporting to the Government Offices from state-owned companies is based on the usual form of presentation in the business sector. However, the income statement, the balance sheet and the cash flow statement have been abridged.

Certain adjustments, for which the Swedish Government Offices are responsible, have been made in the reported data for consolidation. The business descriptions that present each company are based on the companies' own information. The key ratios reported may differ from the companies own key ratios due to different calculation methods (see definitions on page 105).

As regards the consolidated accounts, the following applies:

- ▶ The arrangement of the income statement is the same for all companies, including the financial companies that have submitted their report in accordance with the Annual Accounts Act for Credit Institutions and Securities Companies. The reason for this is that a consolidated income statement can only have one format. The financial companies have therefore had to adapt their reports to the format used by the majority of the companies in question. Consequently, the financial companies have reported their operating profit gross in a form that applies for non-financial companies.
- Associated companies have been included in accordance with the equity method, so that the result from participations in associated

companies corresponding to the share owned by the state has been included in the consolidated income statement on one line in the operating profit. Similarly, the owner's share of the associated company's shareholders' equity has been included in the consolidated balance sheet.

- ▶ Subsidiaries in which there is a minority interest, have been adjusted in the income statement and balance sheet. This adjustment is made so that the minority owner's share of the subsidiary's result is shown as a deduction in connection with the net profit/loss from shares in the associated companies. The minority owner's share of the subsidiary's capital is reported as a separate item in shareholders' equity in the consolidated balance sheet.
- ▶ Intra-company transactions included in the consolidated accounts have not been eliminated in the consolidation, which does not comply with the usual consolidation technique. The reason for this is that the basis required for this elimination is not available at the companies submitting the reports.
- ► Certain key ratios have not been calculated for the financial companies and thus not either for the two groups companies operating under market conditions and companies with special societal interests. The reason for this is primarily that the capital tied up by financial companies in the business is of a different nature compared with most other companies.
- ► Certain of the companies included in the consolidated accounts have adjusted their historic comparison figures due to IFRS. Following on from these changes, the comparison figures and key ratios for 2004 have been updated.

OWNERSHIP CHANGES DURING THE YEAR

No ownership changes have taken place during 2005.

TRANSITION TO IFRS

As from 2005, all listed companies within the European Union (EU) must prepare their consolidated financial reports in accordance with the International Financial Reporting Standards (IFRS, previously IAS). According to the current guidelines for financial reporting, the reporting of the state-owned companies is to comply with usual practice for the listed companies. In accordance with IFRS transitional rules, the rules will be

applied on I January 2005 with retroactive recalculation from the changeover for 2004. As a general rule, recalculations of the financial reports for the period after the transition date shall be treated as if IFRS had been applied historically although there are certain exceptions from the general rule. A reconciliation will be made in the interim report for the first quarter of 2005 and in the annual report for 2005 between the balance sheets and income statements of the affected companies according to IFRS and the company's current accounting principles.

Among the largest transitional effects for the state-owned companies in the application of IFRS are that investment properties and certain financial instruments are reported at fair value.

The company's financial reports are also affected by changed requirements for classification and information according to IFRS. These changes can also affect the respective company's key ratios. See the respective company's annual report to see the effect that IFRS has had on a particular company.

Definitions and abbreviations

Average no. of employees – Recalculated as annual employees.

Capital employed – Total assets reduced by non-interest bearing liabilities.

Debt/equity ratio

Page 76 (Sveaskog) – Interest-bearing net liability divided by adjusted shareholders' equity.

Dividend – The information on dividend for 2005 refers to dividend decided upon at the 2006 annual general meeting.

Some of the companies have distributed additional dividend for the 2002 financial year in 2003. Additional dividend is dividend decided upon at an extraordinary shareholders' meeting held after the annual general meeting.

Equity/assets ratio – General. Shareholders' equity including minority share in relation to total assets.

Page 90 (*TeliaSonera*) – Adjusted shareholders' equity and minority share expressed as a percentage of total assets.

Page 95 (*Vattenfall*) – Shareholders' equity in relation to total assets reduced by arbitrage transactions.

Interest coverage ratio

Page 76 (*Sveaskog*) – Operating profit plus financial income divided by financial expenses.

Page 93 (*Vasakronan*) – Operating profit divided by net financial items.

Page 95 (Vattenfall) – Operating profit plus financial income excluding discounting effects attributable to provisions and return from the Nuclear Waste Fund divided by financial expenses excluding discounting effects attributable to appropriations.

Net indebtedness – Short-term and long-term interest-bearing liabilities and interest-bearing provisions less interest-bearing current and fixed assets including shares in associated companies.

Operating capital – Total assets reduced by non-interest bearing liabilities and interestbearing assets.

Return on capital employed (Rsyss) – Profit after net financial items plus financial expenses as a percentage of average capital employed.

Return on equity (Re) – General. Net profit attributable to shareholders in the parent

company in relation to average shareholders' equity attributable to shareholders in the parent company.

Page 48 (Akademiska Hus) – Profit/loss after financial items with a deduction for full tax in relation to average shareholders' equity.

Page 53 and 64 (Green Cargo, OMX) – Net profit for the year divided by average shareholders' equity.

Page 77 (Swedcarrier) – Rolling 12 months' net profit as a percentage of average share-holders' equity.

Page 89 (Systembolaget) – Profit after standard tax as a percentage of adjusted share-holders' equity at the beginning of the year.

Page 90 and 94 (TeliaSonera, Vasallen) – Net profit (excluding minority shares) expressed as a percentage of average adjusted shareholders' equity.

Page 91 (Teracom) – Net profit with deduction for standard tax divided by average shareholders' equity.

Page 95 (Vattenfall) – Net profit attributable to shareholders in the parent company as a percentage of opening shareholders' equity attributable to shareholders in the parent company excluding hedge provision.

Return on net assets – Operating profit plus discounting effects attributable to provisions in relation to a weighted average value of the year's net assets. Net assets are defined as total assets with a deduction for non-interest bearing liabilities, provisions, interest-bearing receivables, funds in the Nuclear Waste Fund and liquid assets.

Return on operating assets – Operating profit in relation to average operating assets where operating assets refer to assets which are not financial and affect net financial income.

Return on operating capital (Rop) – Operating profit as a percentage of average operating capital.

Return on total capital (Rt) – Profit/loss after net financial items with reinstatement of financial expenses as a percentage of total capital.

Sick leave – Total sick leave among all employees during the year in relation to the ordinary working hours of all employees. Information about sick leave is not provided if the group that the information relates to consists of

less than 10 persons or if the sick leave can be attributed to a single individual.

Total capital – Total assets.

Industry-specific key ratios

FINANCIAL COMPANIES

Capital adequacy ratio – Capital base in relation to risk-weighted amount.

Cost/Income ratio – Total operating expenses in relation to total operating income.

Tier 1 capital ratio — Tier 1 capital in relation to risk-weighted amount.

AIRLINE COMPANIES

Cabin factor – Occupancy rate. Measured as the number of paying passengers in relation to the number of available passenger seats.

CFROI, Cash Flow Return On Investments – A yield measure used in the airline industry. Return is measured as operating profit before depreciation and leasing costs divided by adjusted capital employed.

Unit cost – Total operating expense of airline operations including the capacity cost for aircraft reduced by non-traffic related income per number of available passenger seats multiplied by the route flown.

Unit income (yield) – Average traffic income per number of paying passengers multiplied by the route in kilometres flown.

GAMBLING COMPANIES

Winners' share – Proportion of gambling income repaid to the winners.

Abbreviations

n.app. – Not applicable.

n.a – Not available.

EMAS – EU Eco Management and Audit Scheme.

EPD – Environmental Product Declarations.

 $\textbf{EKU}-E cologically \ sustainable \ procurement.$

FSC – Forest Stewardship Council

IFRS – International Financial Reporting Standards.

ISO 14001 – An environmental management system in accordance with the international environmental standard ISO 14001 provides a well-known stamp of quality stamp for environmental work.

TWh – Terawatt hour, energy unit.
